They Were False Prophets.

It was really pathetic to hear of the calamities that would befall the State if the grog-shops and the stills were put out of business in North Carolina. The farmer was told that corn would be a dragon on the market; the orchards would be unprofitable; business would fall in all the towns; and crime would increase. From day to day the actual experience has shown that all these predictions are being shown to have had no foundation. The latest comes from the State of Wilkes. The Wilkesboro Chronical says:

"Along just before the prohibition election came off, we were told in pathetic, tearful tones that if prohibition carried the orchards would be worthless and would have to be cut down and made into fire wood. Now since prohibition carried the demand for orchard lands has phenomenally increased and one who owns such lands can scarcely be induced to sell. Where are those orchards that were to be destroyed by the ax?—News and Observer.

The young couple will be at home, in Salisbury, after July 10th. Miss Barlow was one of the teachers last year in the graded school.

Towns Need Advertising.

Towns no less than business firms need to advertise. A town may not fail quite so quickly as a private enterprise from lack of advertising, but the death is just as certain in the long run. A town needs to have outsiders know its advantages, its actual conditions as to industries, or opportunities for business, cost of living, etc. Many an excellent town suffers from the fact that its advantages are not widely known, just as many a worthy commodity suffers because it has not been advertised.

The newspapers are undoubtedly one of the greatest means of advertising their town. "By their newspapers men shall know them" is the semibiblical phrase that applies to towns.

The western real estate town can teach the average eastern city many things on the subject of advertisement. There is a case of advertisement or die completely, and they rather prefer to advertise. The result is that people are interested and money is invested in the towns.

It is the same old fact that never changes—namely, that advertising is necessary and that the more a thing is advertised up to a certain very high limit the greater the net returns will be. Towns are no exception to the general rule.—Ridgway, (Pa.) Advocate.

Cough Caution

Never, positively never poison your lungs. If you cough even from a simple cold only—you should always heal, soothe, and ease the irritated bronchial tubes. Don't blindly suppress it with a stinging poison. It's strange how some things finally come about. For twenty years Dr. Shoop has constantly warned people not to take cough mixtures or prescriptions containing Opium, Chloroform, or similar poisons. And now a little late though—Congress says "Put it on the label. If poisons are in your Cough Mixture, Good! Very good! Hereafter for this very reason mothers and others, should insist on having Dr. Shoop's Cough Cure. No poison marks on Dr. Shoop's labels—and none in the medicine, else it must by law be on the label. And it's not only safe, but it is said to be by those that know it best, a truly remarkable cough remedy. Take no chance, therefore, particularly with your children. Insist on having Dr. Shoop's Cough Cure. Compare carefully the Dr. Shoop package with others and note the difference. No poison marks there! You can always be on the safe side by demanding
