to office.

"Cannonism Has Undermined the Party."

Hamilton Fish, one of the wealthy New York members of the House, who never has worked with the insurgents except once when he voted with them on the Ballinger-Pinchot committee matter, startled the House recently by atauthority," declared Governor tacking the rules and indirectly the speaker of the House. None of the older insurgents has made tion of the Southern Anti-Saloon pronounced insurgent more speech in this House. Fish was private secretary to his father when the first Hamilton Fish was Secretary of the Treasury under Grant. He was twice speaker of the house in the general assembly of New York State and has been classed with the aristocrate in the said : House. In his speech Mr, Fish

are farming? I had an experience similar to that of the stockman quoted above. Twenty-one years ago I located in Providence township, Mecklenburg county, and opened an office for the practice of medicine. I owned no land at that time and bought all my feed for my horse, cow and hog. I had no trouble to get it. Half the farmers that I practiced for could have sold enough corn and roughness to pay their medical

> accounts. But now there is not a farmer in the community who raises corn to sell. And yet this is considered one of the best farming sections in the county, so it is. But some-

agree with the liveryman. We are ruined if we don't change our way of farming.

A Cheaply Made Grop of Corn.

Messrs. Editors: I am sending you a cut of my corn from which gew my seed for 1910. Some places in this corn had as many as 27 ears in a space of 36 inches I made 109 bushels to the acre with no manure applied this year. The land had been cowpenned 2 years before and since had been planted in crops grazed off by hogs. The patch was planted from seed where I gathered

1,000 ears from 2 X stalks. Will give you the exact cost of cultivating this crop: Breaking land, per acre, \$1.50

harrowing, 50 cen's; planting, 75 cents; thinning, 50 cents; plowing, \$1.50. Total, \$4.75. Seven furrows made the crop; two furrows to the row three

times, and one in the middle

The stover was shredded, making 4 tons, which was worth \$40. Deducting the cost of making, \$4 75, from the stover leaves \$35.-25 clear on the stover, with the corn still to add. 109 bu. of corn.....\$109 00

Total\$144.25

Hoot Mayor off Stage.

Pittsburg, April 1 .- The indignation of four thousand citizens and of many women who wish to be, over the political corruption now being unearthed by the grand jury and by councilmanic confessions and denunciation of civic expressed to-night at a mass meeting in Exposition hall. Mayor William A. Magee, who sought to address the meeting was hooted off the stage. The resentment shown was at his alleged failure to work promised reform in the red-light district, delayed action

Oemocratic Primaries and Conventions.

local matters.

The Democratic State Executive Committee has very wisely arranged for a uniform date for the holding of precinct meetings, or primaries and county conventions. June 25th has been fixed for precinct meeting and July 2ud for the county conventions throughout the State.

The state committee left it not grow, but because in plant--Progressive Farmer and Gazette, optional with the various commit- ing with a corn planter you

gets warmed up. And it warms up slowly when left hard and generally finds time to kick. and firm, without any opportunity for air to get into it. We will knowing that he who does not take likely have a large acreage of cotboth copies of our semi-weckly, ton the coming season. But good methods are important if large THE ROWAN RECORD, will find yields are wanted. And the bigger the yield per acre, the greater therefore urge all who can to take the profit over the cost of the work and interest on the invest-\$1.00 per year and the subscriber | ment in land. If you're just determined to put out a big acreage of cotton, and take the risk of unprofitable prices next fall, put it

out right and get as much cotton as you can. And if you think the acreage will be so large as to cut

Corn Planting Time.

If you have, as you shuld have, a crop of crimson clover to turn for corn, do not be in a hurry about it. The largest crop of corn I saw last summer after clover was planted after the clover was dead and had done all that it could do, We have plenty of time to make corn in the South without hurrying in the spring, and it is far better to let the clover mature and then turn and harrow vice generally was vehemently it and plant on the fresh and warm soil where the corn will grow off rapidly.

But in turning the clover do not try to turn it over flat, but edge it up nicely. Turned under flat it may interfere with the rise of the capillary moisture and the crop may suffer from drouth. But edge up the furrows, even if a little clover is left on top. It will of traction problems and other do no harm at all.

You may have bought seed corn. Do not plant it till you have tested its germination by taaking few grains from each ear you intend to use, putting them in squares marked on a piece of cotton cloth laid on a box of wet saw dust and covered with a gunny sack and placed in a warm place. You can soon see the. percentage that will germinate. It pays to test the seed and avcid blanks in the rows.

Take off the tip and butt grains of the ears, not because they will

No official statement Hinson, W J Swink, F M Thompon this subject is expected from son, C V Freeze, R C Chambers, J the Speaker. His friends believe R Holshouser, W T Howell, B A that it would not be advisable for Hampton, J L Watson, D L Robhim to weaken the organization of inson, W A Lyerly, # A Safrit, J the House at this time by disclosing S Bartsell, Henry Young, L A his intentions. They argue that Holshonser, M A Powlass, W T in view of the recent battle in the Howell, B L Corriber, Lee Trex-House all the force that was re- ler, S W Welch, Mrs. M J Cowan, tained by the Republican majority J A Painter, Lewis J Riblin, A F is needed if the administration Overcash.

program as to legislation is to succeed.

There are rumors circulated with considerable freedom about the

Capitol that before the congressional elections some change may be expected in the President's Cabinet, but none of these stores can be confirmed. In fact, no one professes to have any first hand information on the subject. At the same time the general impres. sion seems to be that an effort will be made to strengthen the Cabinet

in a political way. Among the retirements oftenest mentioned as possible are those of Secretary Dickinson of the War Department and Postmaster General Hitchcock. Also it is stated that Mr Ballinger may resign from the Interior Department at the close of the present investigation, if the change can be made without subjecting himself to the charge of 'retiring under fire."

\$100 Reward \$100.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all than as a cemetery for the graves its stages, and that is Catarrh of men in the military, naval or Hall's Catarrh Cure is the only civil service of the Confederate

Federal Government to Take Charge of a Confederate Cemetery.

If the House adopts the recommendation of its military committee, the Confederate cemetary at Springfield, Mo., will be taken over by the United States government and a new precedent will be established that is expected to cement closer than ever the North and South. The bill has the approval of Scoretary of War Dick-

The Confederate cemetery at Springfield adjoins a national cemetery. It has been offered by the proper authorites to the Federal government. Under the provisions of the bill, which was introduced in the Senate by Senator Warner of Missouri, and passed by that body, the offer is accepted under the conditions that the government shall take care of the property, its monuments, graves, et :, , keep the usual records of these buried there and see that it is never used for any other purpose
