SENDS MESSAGE FROM AIR.

Sends Wireless Messages From a Scouting Aeroplane at San Francisco.

San Francisco, Jan. 21.—Lieut. Paul W. Beck of the United States signal service demonstrated today to the army's satisfaction the practicability of sending wireless messages from a scouting aeroplane to field headquarters.

Flying with Philip Parmalee in a Wright byplane equipped with a wireless sending instrument and with a wire antennae 100 feet long trailing from the car. Lieutenant Beck transmitted half a dozen messages to the wireless station on the aviation grounds. The first message was to the Associated Press. It had been prepared in advance by a representative and its text was known only to the writer. Lieutenant Beck tucked it in his pocket and did not open the paper until he had reached an altitude of 500 feet.

The airship was at times about two and a half miles from the field while the officer was flashing communications to the wireless station and the receiving operator stated that no difficulty would have been had in reading the message had the distance been twenty miles.

Resolutions of Respect.

The following resolutions of respect were adopted by Bethany Local No. 788, of the Farmers Union, at Rockwell, N. C.

Whereas, Our Heavenly Father who doeth all things well, has seen fit to call from his earthly labors to his eternal home, our brother and esteemed friend, J. Albert Earnhardt, therefore be it

Resolved I, That we, the members of Bethany Local, No. 788, of the Farmers Educational and Co-operative Union of America, at Rockwell, N. C. do bow our hearts in grief on account of the decease of our brother, whose life was an example that many of us would do well to follow, not on account of any great public deed (for he was not a man of the public) but more on account of his retired life and the many examples set therein, who was always loyal to duty's call, ever ready to do what he could for the uplift of himself, family and community, also on account of his earnest christian life with its many excellent examples and influences which had much to do with the shaping of character in his community. We shall miss him, but we submissively bow to the will of our Heavenly Father.

Resolved II, That we extend to his adopted daughter our sympathy in her distress, recommending her to our Heavenly Father, the truest, the noblest, the best, the father of the orphan, the father of us all, he maketh everything work together for the good of those who love him.

Resolved III, That a copy of these resolutions be spread upon our minutes, a page of which shall be dedicated to his memory, that a copy be sent to his adopted daughter, a copy be sent to "The Carolina Union Farmer," and a copy to THE CAROLINA WATCHMAN for publication.

Respectfully submitted,
G. H. PEELER,
Geo. L. BROWN,
B. A. EARNHARDT,
committee.

Eczema, Ringworm,

GIVES ANOTHER ENDOWMENT.

Andrew Carnegie Makes a Donation of \$10,000,000 to the Carnegie Institute.

New York, Jan. 20.—The donation of an additional endowment of \$10,000,000 to the Carnegie Institution of Washington by Andrew Carnegie, the founder, was announced today. This brings Mr. Carnegie's gift to the institution up to a total of \$25,000,000.

Coupled with the formal announcement was a declaration by Mr. Carnegie that the work of the institution had cleared from blame the captain of a British ship who ran his vessel upon the rocks, by proving that the British admiralty charts, by which the captain was guided, were two or three degrees astray.

The discovery of 60,000 new worlds by Professor Hale at the observatory on Mount Wilson, Cal., also was announced.

Mr. Carnegie also announced that a far more powerful telescope than man has ever made is now under construction for the Mount Wilson observatory. With it he hopes to make possible the discovery of still more celestial bodies. The new telescope will have a lens of 100 inches diameter. Mr. Carnegie declares that the "whole world is going to listen to the oracle on the top of Mount Wilson, and in a few years we shall know more about the universe than Galileo and Copernicus ever dreamed of."

Mr. Carnegie's latest donation to the institution, like his first, is in bonds. The institution was founded on January 28, 1902, when Mr. Carnegie gave to a board of trustees \$10,000,000 in registered bonds yielding 5 per cent interest. The purpose of the institution, in Mr. Carnegie's words, is "in the broadest and most liberal manner to encourage investigation, research and discovery, show the application of knowledge to the improvement of mankind and provide such buildings, laboratories, books and apparatus as may be needed".

Sends Lifeboat Over Niagara In Test.

A new form of lifeboat which has the appearance of a submarine has been invented by James Mitchell of Arrow River, Manitoba. Robert Leach, a resident of the Niagara River frontier, has volunteered to go over Niagara Falls with the boat and the test is to be made in June, according to present plans. One model of the boat has already been sent over the falls with satisfactory results. A picture of the boat appears in the February number of Popular Mechanics Magazine.

SAVED FROM AN OPERATION

By Lydia E. Pinkham's Vegetable Compound

Peoria, Ill.—"I wish to let every one know what Lydia E. Pinkham's remedies have done for me. For two years I suffered. The doctors said I had tumors, and the only remedy was the surgeon's knife. My mother bought me Lydia E. Pinkham's Vegetable Compound, and today I am a healthy woman. For months I suffered from inflammation, and your Sanative Wash relieved me. Your Liver Pills have no equal as a cathartic. Any one wishing proof of what your medicines have done for me can get it from any druggist or by writing to me. You can use my testimonial in any way you wish, and I will be glad to answer letters."—Mrs. CHRISTINA REED, 105 Mound St., Peoria, Ill.

Another Operation Avoided. New Orleans, La.—"For years I suffered from severe female troubles. Finally I was confined to my bed and the doctor said an operation was necessary. I gave Lydia E. Pinkham's Vegetable Compound a trial first, and was saved from an operation."—Mrs. LILY PEYBOUX, 1111 Kerlerec St., New Orleans, La.

The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound is a remarkable remedy for those distressing feminine ills from which so many women suffer.

The Origin of Royster Fertilizers.

Mr. Royster believed that success awaited the Manufacturer of Fertilizers who would place quality above other considerations. This was Mr. Royster's idea Twenty-seven years ago and this is his idea to-day; the result has been that it requires Eight Factories to supply the demand for Royster Fertilizers.

Express Companies Superfluous.

Discussing the high express rates, H. H. Windsor, in the February number of Popular Mechanics Magazine, cites the opinion of Judge Mabey, of the Canadian Railway Commission, that express companies could be dispensed with and the whole business carried on satisfactorily by the railroads instead, and adds:

"That this appears the logical thing to do becomes more apparent when our own express companies attempt to excuse their high rates on the grounds of having to overpay the railroads for hauling their cars. In fact, the express companies admit having become such active bidders against each other, that the railroads are receiving as high as 55 per cent. of the gross earnings, leaving only 45 per cent. to the express company out of which to render service and pay dividends. In other words, for a package taking a rate of \$1, the railroad gets 55 cents for hauling it in a car, while the express company for 45 cents calls for the package, takes it to the shipping office, enters a record, hauls to train at destination hauls from train to office or delivers to consignee, and has to stand liable for loss in transit. The very fact that express companies continue to pay big dividends under such conditions is a confession that the rates to shippers are easily 25 per cent. too high, which should still leave the railroads a profitable price for simply hauling the car.

SPECTACLES AND EYE GLASSES

That are properly fitted not only give perfect vision but comfort. Why not enjoy the blessings of youth by wearing a pair of our scientifically fitted glasses. We can satisfactorily fit any eye that can be fitted the more difficult, the better. We make a specialty of fitting eyes that other people have failed to fit. Give us a trial, we will do you good.

We duplicate all broken lenses. Nothing made in lenses that we cannot duplicate. It makes no difference where it comes from, bring it to us and we will duplicate same.
