Hauling Snakes with Wood.

J. C. Lingle, of Faith, was in town yesterday and told us his experience Saturday with a lot of copper head snakes. He had gone to get a load of wood for the house and put it on the wagon and hauled it a distance of about two miles. A boy told him he saw a snake crawling in the wood on which he rode and upon unloading it he came across a large copperhead and killed it. Later in the afternoon he was cutting up the wood and came across a hollow stick which caused him to remember the snake and, thinking possibly there were more, was a little careful in handling it. When he split this stick open there he found a nest containing six more good sized young copperheads. He proceeded to kill all of them, but had a lively job of it.

Suits Against Southern Settled.

Last October Arthur Owen, generally called Bill, took a freight train going west. He was in company with some bad characters, for the want of a ticket the conductor put him off at Cleveland and the next morning he was found beside the railroad track with his skull crushed. It was thought that he met with foul play, but he was lying near the tracks of the Southern Railway and that was sufficient to bring a suit against the company. The case was heard before the Rowan Superior Court last week and a compromise was effected. Robert Yount, colored, who with three others were killed, near Elmwood, sometime ago by a freight running into a loaded hand car, was also the cause for a suit for damages. A compromise was effected and the Southern paid \$600 for Yount's death. The other cases are pending.

The Men Who Succeed

As heads of large enterprises are men of great energy. Success today, demands health. To all is to fail. It's utter folly for a man to endure a weak, run down, half alive condition when Electric Bitters will put him right on his feet in short order. "Four bottles did me more real good than any other medicine I ever took," writes Chas. B. Allen, Sylvania, Ga. "After years of suffering with rheumatism, liver trouble, stomach disorders, and deranged kidneys, I am again, thanks to Electric Bitters, sound and well." Try them. Only 50 cents at all druggists.

Trying to Break up Blind Tigers.

Some time ago the aldermen of Charlotte passed an ordinance requiring the clubs of that city to put up a bond of \$5,000 guaranteeing that they would not violate the law, or should they do so the bond would be forfeited and their charter surrendered, or something to that effect. This proved of considerable advantage to the city in its efforts to enforce the law. There being so much violation of the law here and so much complaint as a result, Alderman M. C. Quinn, at the meeting of the Salisbury Board of Aldermen Tuesday a week offered a similar ordinance for Salisbury, but it did not even get a second. It was brought up again last night and Mr. Quinn insisted that it be read and that after the usual thirty days it be taken up for consideration. The ordinance is as follows: "That every organization, chartered or otherwise, of men organized as a social club whose members are allowed to keep intoxicating liquors in said club for their individual consumption shall file with the city clerk of the city of Salisbury, a bond in the sum of two thousand dollars (\$2,000.00) conditional that if any member or employee of the club violates any state or city law in reference to the sale of intoxicating liquors in said club, then said bond shall be in full force and effect and binding; otherwise to be null and void, the said bond to have three sureties who can justify said bond to be approved by said clerk."

French Market Coffee Has Never Been Successfully Imitated It Cannot Be... COFFEE roasted the ordinary way is only partially roasted, according to French ideals. The French Market Coffee way is the scientific way, producing a perfect roast. Slowly—carefully—the roasting goes on until exactly the right moment arrives. The slow roast reduces about 10 per cent more weight than the ordinary roast. All excess of oil vanishes. Yet the delicate flavor and aroma is there, intensified and enhanced. Chilled, Ground and Hermetically Sealed. DIRECT from the roasters, the coffee is chilled in a cold-air-blast machine. This chilling closes the pores of the bean, thus preventing a single breath of the entrancing aroma to escape in the vapors. Quickly—by automatic machinery—this freshly roasted, freshly ground, freshly chilled, delicious coffee is placed in tin cans, and hermetically sealed. So it comes to your table as perfect as when it left the roasters—untouched by human hands. Famous for Over a Hundred Years. EVEN when French Market Coffee could be had only in the old French Market at New Orleans, over a hundred years ago, it was celebrated all over the South. Andrew Jackson, Henry Clay and other famous men of olden times visited the French Market to enjoy the rarely delicious beverage. But now you all may serve it daily on your own table. For the rare old French blend has been perpetuated by the French Market Mills, and the hermetically-sealed process places genuine French Market Coffee within the reach of all. For Sale at Your Grocer's. Try it once and you'll agree "There is only one real old French Market flavor." The coffee with a history. Bale Your Hay and Sell It. THERE is always a ready market at a good price for baled hay. It can be handled easily. It prevents waste. Baling is most profitable when you use I H C pull power presses requiring either one or two horses; or I H C motor presses using 3, 4, or 6-horse power I H C engines. Both styles have three separate bale chamber sizes, 14 x 16 inches, 16 x 18 inches, 17 x 22 inches. Many farmers feed their own stock silage and shredded corn stover and sell their high-priced hay. A big majority of them Use I H C Hay Presses. I H C pull power press has a greater capacity than any other horse press of its size. The stroke is the lowest and narrowest made. An adjustable bale tension insures compact bales. A roller tucker makes each bale neat and smooth in appearance. The I H C motor press consists of a bale chamber and an I H C engine, mounted together on substantial trucks. When not baling hay you have a portable I H C engine, which can be used to saw wood, pump water, shell corn, grind feed, separate cream, or to run any farm machine for which its power makes it suitable. Two perfect machines in one. Call on the I H C local dealer in your town, or, write for an I H C hay press catalogue. International Harvester Company of America (Incorporated) Charlotte N. C.
