Mountain Park 3,500 Feet Above Sea Level.

Black Mountain, July 18.—Sunset Park, a pleasure resort, recently completed on Mashburn's Mountain, 3,500 feet above sea level, and located at the edge of town, was officially opened last night. Over 200 people from Black Mountain and Montreat made the trip over the new road that is built in a series of switchbacks to the park, and spent the evening in dancing and other forms of pleasure. The park is on the crest of the mountain and contains picnic houses, dance hall, Mount Mitchell tower, which enables the only view of the famous peak in this section, rest houses and a large cafe and hotel, which is built on the edge of the mountain in three stories. This contains many sleeping rooms, large dining room, reception room, dance hall and restaurant.

There is a 12-foot porch that extends out from the building and commands a view of the picturesque Swannanoa Valley as far as Asheville on the west, Seven Sisters, Pinnacle and many other lofty mountains to the north, and Ridgescrest, the Swannanoa tunnel and Marion on the east.

Black Mountain boasts of having the only real mountain park of its kind in the United States. The park is lit by hundreds of Japanese lanterns and makes a beautiful sight to look at from the town. Many other improvements will be added as fast as workman can do the work and the place will soon take on the appearance of a regular Coney Island in the clouds.
