Backing Up the Purchaser

If we didn't have an eye to the future, and if we didn't care what you or anybody else was going to think of us, we could sell engines and other machines for much less money, but we could not put I H C quality into them. The kinks would start coming in right away, and soon there would be no market for I H C engines.

I H C engines stand for everything that is opposed to such a policy. The I H C way is to build always for the respect and good will of the American farmer, and to that end it has been successfully working for many years. The dealer who sells you an I H C engine expects on its merits to do business with you again. The purchaser of an

I H C Oil and Gas Engine

buys security and safety with it. He banks on the many years of square dealing and the reputation back of all I H C machines. He knows it is the best engine bargain because it gives him efficient service in all kinds of farm work—pumping, sawing wood, spraying, running repair shop, grindstone, cream separator, etc. He knows that I H C responsibility for it lasts as long as the engine is in service on his farm.

I H C oil and gas engines operate on gas, gasoline, naphtha, kerosene, distillate, and alcohol. Sizes range from 1 to 50-horse power. They are built vertical, horizontal, portable, stationary, skidded, air-cooled and water-cooled. I H C oil tractors range in size from 6-12 to 30-60-horse power, for plowing, threshing, etc.

Look over an I H C engine at the local dealer's. Learn from him what it will do for you, or write for catalogues to
