Some Farmers Still Use Oil Lanterns to Light Their Barns

Of course—back in the old days—30 years ago—you couldn't get anything better. But—these last few years have so changed living conditions that up-to-date farm families won't be satisfied any longer—with poor light.

The modern farmer is quick to see the value of good light—its safety and the convenience it brings him and his family. There are now hundreds of thousands of farmers who have chosen the

Pilot-Carbide-Outdoor Lighting and Cooking Plants

for it gives them not only all the fine, bright, inexpensive light they can use—but cooking fuel as well.

This wonderful machine stands out of doors—on top of the ground, anywhere. It has totally changed the old-fashioned methods of barn and house lighting.

You can now flood your barn with safe brilliant light—instantly. No matches needed. No dangerous lanterns to tip over or upset.

Think what this means to you! Think how much better and quicker you can work, with plenty of good bright light in place of a smoky, dim oil lantern.

You will find the barn lighting feature alone worth the entire investment for the PILOT. And its use in the house, as well,

means added happiness—safety—comfort and convenience for your whole family.

Just because your father and grandfather used oil lamps and lanterns is no reason why you should, any longer, put up with their danger and poor light. Light the modern way, the safe way, with the PILOT.

Find out today about this modern light plant. You owe it to yourself. You owe it to your good wife and to your children. You can well afford the little it will cost.

THE SOUTHERN RAILWAY COMPANY

An Ambition and a Record

THE needs of the South are identical with the needs of the Southern Railway; the growth and success of one means the upbuilding of the other.

The Southern Railway asks no favors—no special privilege not accorded to others.

The ambition of the Southern Railway Company is to see that unity of interest that is born of co-operation between the public and the railroad; to see perfected that fair and frank policy in the management of railroads which invites the confidence of governmental agencies; to realize that liberality of treatment which will enable it to obtain the additional capital needed for the acquisition of better and enlarged facilities incident to the demand for increased and better service; and, finally—

To take its niche in the body politic of the South alongside of other great industries, with no more, but with equal liberties, equal rights and equal opportunities.

"The Southern Serves the South."

Monterey County Needs Good Farmers

Notwithstanding the fact that Monterey produces millions of dollars worth of potatoes, sugar beets, apples, peaches, barley, alfalfa, dairy products, live stock, etc., there is much land that only needs farmers and settlers to make it more intensively productive. This is a rich coast county with a mild, even climate.

YOU CAN SEE THIS COUNTY WITHOUT LEAVING HOME.

We have issued a beautifully illustrated booklet telling of Monterey County, and the opportunities there for YOU. Send us ten cents for this booklet and a sample copy of SUNSET MAGAZINE—the one big National Magazine telling of the life and development of the West. Address,
