Mr. Wiser Cured of Indigestion.

"Some time in 1909 when I had an attack of indigestion and everything looked gloomy to me I received a free sample of Chamberlain's Tablets by mail. I gave them a trial and they were such a help to me that I bought a package and I can truthfully say that I have not had a similar attack since," writes William B Wiser, Douglasville, Pa.

President Wilson to take the Stump Upon Returning From Paris.

Washington, June, 15.—President Wilson is to take the stump. He is coming back from Europe within 30 days. Probably he will get in time to make a speech on the Fourth of July at some central point like St Louis. He wants the people of the country to understand the meaning to them of the treaty and the league of nations. First as a matter of courtesy, he will address Congress presenting the treaty itself in person.

Booze is Not a Good Cure.

When a man comes to you all doubled up with pain and declares he will die in your presence unless you procure him a drink of whiskey, send him to a doctor or else give him a dose of Chamberlain's Colic and Diarrhoea Remedy. There is a mistaken notion among a whole lot of people that booze is the best remedy for colic and stomach ache.

NEW TANLAC PLANT IS NOW COMPLETE.

Magnificent New Laboratory has Daily Capacity of 36,000,000 Bottles.

What is said to be one of the largest pharmaceutical laboratories in the United States has been completed at Dayton, Ohio, for the manufacture of Tanlac, the well known medicine, which according to recent reports is now having the largest sale of any medicine of its kind in the world.

The erection of the new plant was made necessary by the rapid growth of the business, as the older plant was found to be wholly inadequate to supply the ever-increasing demand which at the present rate of sale will amount to more than five million bottles for the present year alone.

By the erection of a new plant the manufacturers of Tanlac are given to the world just one more evidence of the remarkable growth and expansion of their business, and of their absolute confidence in its future.

This announcement will be read with interest not only by the many thousands of Tanlac agents scattered throughout every state of the Union and throughout Canada, but to the millions who have used it beneficially as well.

The new building occupies 60,000 square feet of floor space. It is six stories in height, practically fire proof throughout, and is of striking architectural design. It also has private railway facilities.

This beautiful new structure now stands in striking contrast beside the older building where Tanlac was first made.

Visitors to the laboratories are strongly impressed with the extremely modern character of the equipment. Everything is provided and splendidly arranged to promote systematic and rapid production. The very latest machinery and devices known to invention and pharmaceutical science are here used.

The interior throughout is finished in spotless white, and all of the large force of employees wear white uniforms, which they are required to change daily. The main offices on the first floor are all finished in Carara marble and mahogany.

The entire process of manufacture is conducted absolutely sanitary conditions. Even the bottles made expressly to contain Tanlac are washed and sterilized electrically by the ultra violet ray process. They are then filled by automatic machinery and the finished product is therefore never touched by human hands.

When Tanlac was introduced into Canada history repeated itself, and the demand which had been created in the United States was quickly duplicated in the Dominion Provinces. As a result, it was recently found necessary to establish another Tanlac Laboratory, at Windsor, Canada which is somewhat on a smaller scale than the plant at Dayton, but is no less modernly equipped.

These new facilities give a daily capacity of 36,000 bottles, but as Tanlac is being rapidly introduced into foreign countries it is probably only a question of a few years before even larger facilities will become necessary. While the manufacturers are necessarily working for capacity

production, it is a fundamental rule of the Tanlac Laboratories that the quality of the medicine shall never be sacrificed to secure quantity output.

Uniform quality is guaranteed by a series of careful inspections by expert chemists, from the time roots, herbs and bark are received in their rough state from all parts of the globe until their medicinal properties have been extracted by the most approved processes. The finished medicine is then bottled, labelled, and shipped out to the tens of thousands of druggists throughout the United States and Canada, to supply a demand never before equalled for this or any other medicine.

The executive sales offices are located in Atlanta, Georgia, and occupy almost the entire floor of the Fourth National Bank Building of that city.

Tanlac is now sold in Salisbury by the Smith Drug Co, S M Purcell and the Empire Drug Company and by leading druggists everywhere. Advertisement.
