Ralph E. Johnson To Conduct Services **During Revival Meeting**

Ralph E. Johnson, evangelist singer, who will lead the singing and conduct services for young people during the revival meeting to be held at First Methodist church beginning next Sunday, is well-known throughout the Southern states as a soloist and musician as well as leader of song. During the meeting he will employ a xylophone, orchestra bells, a piano and a pipe organ.

Bishop U. V. W. Darlington, who will do the preaching during the meeting, and Mr. Johnson are both expected to arrive in the city Saturday. The meeting begins with the Sunday morning service and there will be two services each day-at 11 in the morning and 7:30 in the evening besides special services for young people at an hour to be announced later.

Dr. J. H. Barnhardt, pastor of First Church, extends an invitation to every one in this section to attend these services.

GETS GOOD WIFE BY ADVERTISING IN THE HOME PAPER

Hickory-Not all newspaper romances are fiction.

Here's the story of one right here in Hickory that proves it pays to advertise-providing one does it judiciously.

William Hefner, a respected Longview citizen, was living alone and decided there must be some good women somewhere who would make life happier and whom he could make

In order that he might get acquainted with some women of about his own age, Mr. Hefner advertised in The Record, stating frankly what his purpose was.

More than thirty replies came to him. The address was to a Record box and Mr. Hefner picked out the one that he considered most likely suited to him as a life mate. That woman was Mrs. Clara Holler, at

the eastern edge of the Highland section. The two got acquainted and Mr. Hefner courted Mrs. Holler for about a year. The two decided that they could make no

mistake by casting their lot together—so they were married by the Rev. C. K. Wise of Good Hope church. The happy couple now resides in Mr. Hefner's old home in

The bride has five grown children—four daughters and one son-all residents of this The groom has six children, five daughters

and one son-all residents of Kansas and the southwest.

"I think I got the best woman I could have found in forty-eight states, The Record helped me to locate her," Mr. Hefner declared smilingly, when he called at the newspaper office to prove that not all mail-order courtships are dangerous.

"It all depends upon the people and whether or not they are serious," Mr. Hefner con-

SUDDEN DEATH HALTS SUICIDE

Washington-Suicide apparently was cheated by an internal hemorrhage when Walter B. Robinson, 50, fell dead in the kitchen of his home here.

By his side when he was found hours later was an unfired pistol. There was blood on his face. Coroner J. R. Nevitt ordered an autopsy, which revealed Mr. Robinson had died of "pulmonary odema."

110 Vermont Towns Have No Physicians

Burlington, Vt.-There are 110 doctorless towns in Vermont, a recent survey by state officials disclosed. Thirty-four per cent of Vermont's 458 physicians are located in cities and an additional 33 per cent in towns of more than 2,500 population.

ROWAN FARM GLEANINGS

By W. G. YEAGER County Agent

Two farm products have been steadily increasing in price during the past month and two only and these are butter fat and eggs, two products that will do more to reclaim the south from its cotton dilemma than all the legislation that the statute books can carry in the humble opinion of the writer. The present story of butter fat is so well illustrated in a short statement from the pen of Mr. A. C. Kimrey, Dairy Extension Specialist of N. C. State college that we will give space to it here.

PROFIT IN SURPLUS FEEDS

The outlook is favorable for dairymen to sell their surplus feedstuffs to cows and double their money even at present prices for butterfat, declares A. C. Kimrey, dairy extension specialist. He says the present relation between the farm price of dairy feeds and butterfat is very favorable and bids fair to remain so during the coming winter.

"At the present time," says Kimrey, "\$14.00 worth of feed at farm prices, when fed to average good cows, produces 100 pounds of butterfat. When this butterfat is sold today for butter-making purposes, it will bring about \$28.00. But in addition to this income from the butterfat, there will be left on the farm around 1600 pounds of skim milk worth 35 cents a hundred pounds. This has a value of \$5.60 or may be fed at home to poultry or hogs."

Mr. Kimrey finds another income from the feed that is not generally considered. He says 75 per cent of the plant food in the feedstuffs will go back to the farm as manure thus helping to reduce the bill for commercial fertilizer. Therefore, if \$14.00 worth of farm feed can be converted into \$33.60 by feeding it to cows, the man who has both cows and feed may be assured of a reasonable and constant cash income. What is true of butter fat is

equally true of poultry. There has been no time in past ten years when poultry properly handled would turn as large a net profit on investment and feed as at the present time. With eggs at 30 cents or higher for next several months and grains at about one cent per pound means that the farm flock will return to the farm owner fully double the present market price for the surplus grains. If carefully fed to the poultry flock. The wise farmer will be getting his laying house in condition if not already so, ample roost space, proper ventilation, convenient laying boxes, sufficient hopper room for dry mash and in that connection no progressive poultryman would think of trying to make profitable eggs on scratch grains alone, even if grains are cheap on the farm. The experiments of the Missouri Experiment Station shows that a flock of hens fed grain alone laid an average of five eggs per month while those receiving laying mash along with the grain laid an average of 17.8 eggs per month or a difference of 12.8 eggs per month. Why this difference? Experiments have shown that the grains develop the yolk of the egg, but as it takes both yolk and white to make an egg and then a shell to cover it, the hen cannot get sufficient material out of the whole grain to do her full duty by the egg basket. We are told that it takes about fifteen days to develop a yolk and one day to develop a white and shell. The dry mash provides the quickly available material that is used to build both white and shell and the hen that will return to her owner a profit over the next 12 months will have all the laying mash that she can consume at her disposal over about a thirteen hour day (artificial light) during the year.

We are told that the hen can store the yolk making material in her body for considerable time but not that that goes to make the whites and there again comes the necessity of the lay-

Getting back to the house, the wise poultryman will have grit boxes and shell boxes, green feed and alfalfa is one of the best ones, also a dry floor in his house for moisture in the laying house is one thing that sure will spell trouble and spell it quickly. The dry floor should be littered with dry straw and then changed sufficiently often to avoid moisture. He will also practise close sanitation for there in lies the secret of successful poultry keeping. If he finds occasion to change from one laying mash to another he will make the change slowly and the method most generally recommended is to introduce the new mash in an additional hopper right beside the old mash and after about two weeks the old mash can be removed with no ill effects upon the production of the flock. The farm raised grains should make up the bulk of the poultry ration, about one third fed as grain and two thirds mash, the mash if farm mixed to be carefully done from an exact table of ingredients. The home made laying mash as recommended by the poultry department of North Carolina Experiment Station is composed as follows: 250 pounds yellow corn meal; 200 pounds wheat midlings; 200 pounds heavy oats, pulverized; 200 pounds fish meal or meat meal 55 per cent protein; 100 pounds wheat bran; 40 pounds steamed bone meal and 10 pounds iodized salt, making a thousand pounds of mash.

Barley may be substituted for oats, pound for pound and it is advisable to use equal portions of fish meal and meat rather than either alone.

Plans To Map Lakes

Augusta, Maine. - The United States Geological Survey service will map the Rangeley Lakes district both from the ground and the air this summer. United States Army planes will be used in the aerial charting.

Warden Fools Quail

Raiford, Fla.-Warden John Blitch, of the State prison farm, has introduced mass production methods in the quail business.

The warden sees to it that eggs are removed daily from quail nests on the prison farm preserve. Instead of one clutch of eggs yearly the females lay the year round, endeavoring to fill the nests.

Rooster Attacks Baby

Aurora, Utah.-Little Iris Jean Kennedy, 3, toddled into a barnyard the other day and was severely injured by an infuriated rooster. It inflicted deep cuts and bruises about the child's face and body. Medical assistance was required.

U. S. Judge Locked Up

Kansas City, Kan.-Judge Richard J. Hopkins, of the United States District Court here, now can appreciate the feelings of a prisoner. In conference with Federal officials here he was locked in by a janitor at closing time. A telephone call brought a parole officer from his home with a key.

Mule Keeps Officers Busy

Deland, Fla.-It took three policemen to take a lone brown mule into custody, that had violated a city ordinance by strolling down a main thoroughfare. The mule's "arrest" was the only one recorded for the day.

Rewards Bandit Captor

Boston-Boston has bought a new pair of trousers for John Tanza, newsboy. The trousers replaced a pair he ruined hurdling a fence while pursuing a filling station thief. Thanks to John's efforts, the robber was caught.

Kissed Back of Own Neck

Roanoke, Va.-While physicians were grafting a piece of skin from the back of his leg to the back of his neck M. T. Vest bent over and kissed the skin from his neck as it was held in a pair of tweezers. Vest claims to be the only man who has kissed the back of his own neck.

Skates 1,900 Miles

Detroit-After a long skate, Jack Hyland is on hand awaiting the convention of the American Legion. He was on the road thirty-four days and eight nights and used up four pairs of roller skates making 1,900 miles from Wilson, N. C.

Resents Being Awakened

New York-Rose Gelert went to sleep in Central Park. The wind played pranks with her clothing.

Patrolman Charles Goldman covered his eyes and awakened the lady. She slapped his face. He who got slapped took her to the station. She was charged with disorderly conduct.

LITTLE BABY STARVES

Columbia City, Ind.-When a physician gave starvation as the cause of the death of a 13-months old baby, investigation showed that the family of five had eaten only one loaf of bread as food in a week. Another child was discovered ill from malnutrition.

HUNTER SHOOTS CHILDREN

Albany, N. Y.-Mistaken for woodchucks while playing in tall grass, two children, five and eleven years old, were seriously wounded by shots fired by a hunter.

LUCKY MEN

Many men who complain that their wives don't understand them would be paying alimony if they did .--Greenfield Republican.
