The New Ford V-8 Is Now On Display Here

The first of the new Ford V-8 cylinder, 112-inch wheelbase motor cars will be displayed here Saturday, February 11, 1933 in the showrooms of the Hedrick Auto Company, Ford dealers, at 120 West Innes Street, it was announced today. The showrooms will be opened at 8 o'clock.

Because of the unusual public interest in the new Ford cars crowds are expected to attend. The showrooms have been decorated for the occasion. Attendants will be on hand to explain the many important features of the new cars.

The New V-8 is the largest and most powerful Ford ever built. It has new and distinctively modern lines, a most attractive front end, longer wheelbase, larger and roomier bodies, faster acceleration, increased power and speed and is exceptionally economical in operation. With its 75-horsepower, V-8 engine, the New Ford is capable of a sustained speed of 80 miles an hour.

The styling of the 14 body types expresses the new mode in motor car building. The modern note is found in the sloping Vee radiator grill, the skirted fenders, newly designed headlamps, cowl lamps and bumpers, the curve of the hoodside ventilators, the 20-degree slant of the windshield, the curved roof header, the reverse curve of the rear quarter and the backward sweep of the apron masking the gasoline tank.

The all-steel bodies are materially wider, almost a foot longer and consequently much roomier. The attractive instrument panel is directly in front of the instrument board. Front seats in closed cars are fully adjustable. Interior fittings are luxurious. Options in upholstery and a wide choice of body colors are available.

The improved V-8 engine is fitted with all-aluminum cylinder heads, one of the most noteworthy forward steps in motor design in many years. Because aluminum dissipates heat more rapidly, the use of the aluminum cylinder heads permits higher compression pressure and results in increased speed, power and smoothness, faster acceleration and added fuel economy.

Smooth engine performance results also from the basic 8-cylinder design and the 3-point rubber mounting cylinder blocks are set at a 90-degree angle. The crankshaft is fully counterbalanced and the crank throws are at 90 degrees. Opposing pistons and connecting rods are even in weight. All of these features combine to place all moving parts in natural balance, resulting in exceptional smoothness of operation. The engine is fitted with down-draft carburetor air-intake silence and a diaphragm-type fuel pump.

Features of the 112-inch wheelbase chassis include an extremely rigid double-channel, double drop X-type frame, torque tube drive, a straddle mounted rear axle pinion, transverse cantilever springs, internal expanding mechanical four wheel brake, 17-inch welded steel spoke wheels and tires of 5.50 inches section.

In the new three-quarter floating rear axle the driving pinion is mounted in a double taper roller thrust bearing at the front and a straight radial roller bearing at the rear. This maintains permanent alignment of the pinion with the ring gear under all driving conditions and results in extremely quiet axle operation.

The frame is cushioned by four Houdaille double-acting shock absorbers which are both automatically and thermostatically adjusted for every variation in weather or road surface conditions. The shock absorber links are insulated in rubber. The rear fuel tank has a capacity of 14 gallons.

The transmission is of the synchronized type, with helical constant mesh gears, and functions unusually quietly both in second speed and during speed changing. The clutch is of the double-disc type and is spring cushioned for soft engagement.

LEFT ARM BEATS RIGHT - Brownsville, Tex.—The left arm proved mightier than the right arm in the golf swing. The verdict was reached in a match between two one-armed golfers. John Herndon of Mercedes, who has only a left wing and swings back-handed defeated C. E. Henderson of Harlingen, who has a right arm and no left.

ROWAN COUNTY SUPERIOR COURT CALENDAR FEBRUARY TERM, 1933

HON. WILSON WARLICK, Judge Presiding. FOR THE TRIAL OF CRIMINAL CASES.

Witnesses and parties to suits are urged to be on hand promptly at the call of their cases. State's witnesses are required to appear before the Grand Jury on Monday, the first day of the term unless they have previously appeared before the Grand Jury. After appearing before the Grand Jury, they are required to be in Court on the day set for the trial of their respective cases. The Solicitor will be in his office each morning at nine o'clock for the purpose of conferring with State's witnesses in cases set for that particular day. Witnesses are not allowed to prove in more than one case on any one day. The State does not pay defendant's witnesses.
