Science says Today use a LIQUID Laxative

If you want to GET RID of Constipation worries-

The unwise use of harsh laxatives may drain the system, weaken the bowel muscles, and in some cases even affect the liver and kidneys. A doctor will tell you that the

wrong choice of laxatives often does more harm than good. Fortunately, the public is fast returning to the use of laxatives

in liquid form. A properly prepared liquid laxative brings a perfect movement. There is no discomfort at the time and no weakness after. You don't have to take "a double dose" a day or two later.

In buying any laxative, always read the label. Not the claims, but the contents. If it contains one doubtful drug, don't take it.

Dr. Caldwell's Syrup Pepsin is a prescriptional preparation in which there are no mineral drugs. Its ingredients are on the label. By using you avoid danger of bowel strain.

You can keep the bowels regular, and comfortable.

The liquid test:

First: select a good liquid laxative. Second: take the dose you find is suited to your system. Third: gradually reduce the dose until bowels are moving regularly without any need of stimulation.

Dr. Caldwell's Syrup Pepsin has the highest standing among liquid laxatives, and is the one generally used. It contains senna, a natural

ly safe for the youngest child. Your druggist has Dr. Caldwell's Syrup

This test has proved to many men and women that their trouble was not "weak bowels," but strong

laxative which is perfect-
