

### Bank Insurance Bill Is Passed

#### House Approves Measure Postponing Permanent Deposit Insurance

Washington—The house pushed a long step nearer the statute books another of President Roosevelt's banking bills—postponing permanent deposit insurance until July 1, 1935, and continuing the present company plan.

It adopted virtually unanimously a conference report compromising differences between house and senate on the bill. When the senate approves the report, the measure will go to the President for his signature.

Without this legislation, permanent deposit insurance guaranteeing 100 per cent deposits up to \$10,000, would become effective the first of next month. But administration officials hold the banks and the Federal Deposit Insurance corporation are not ready to put the permanent plan into effect immediately; so the extension bill was passed.

#### POISONED GUM

San Francisco, Calif.—Chewing gum, with "enough poison on it to kill a dozen persons" was left on the porch of Mrs. Georgia McKenzie, in an envelope on which was typed the word "Sample." Becoming suspicious when the gum burned her tongue on touch, health officials pronounced it poison. Similar packages of gum were left on porches of three other homes nearby.

The taxpayer should not holler too loud, for if he makes too much noise it may suggest that he has some money left, and they may levy still more taxes on him.

Austria is called the powder barrel of Europe, and when we go around and gaze at the faces of the women and girls, it would seem as if the United States might well be called the face powder barrel of the world.

### YOUR CHILD AND THE SCHOOL

#### Caring for the Teeth

An unclean mouth takes the edge off one's appetite. Sore gums and painful teeth naturally curb a desire to eat and encourage bolting.

Observations seem to indicate that we overlook these facts too frequently when dealing with children. A look into a child's mouth would be revealing to many parents.

Proper care of the teeth is a two-fold matter. Teeth ought to be examined regularly by a dentist and his instructions followed. He will tell you that food is the important factor in preventing tooth decay.

The chief foods for teeth are the so-called "protective foods"—milk, fruits and vegetables. Do not deprive a child of any of these if you wish him to have sound, even teeth.

A child should also be taught to care for his own teeth. Brushing the teeth and gums is an important habit, though we do not any longer believe that cleanliness alone will prevent tooth decay. Nevertheless it is as important as washing the face or hands and every child should learn it early in life.

Dental caries, or decay of the teeth, has been called the most prevalent disease in America. It is estimated that 90 to 95 per cent of all children have it. Parents, by proper care, can prevent much of it.

Summer vacation time approaches. Dr. Ireland will discuss its special problems next week.

### Cardui Helped Lady For Nervousness and Run-Down Condition

"I have taken Cardui several times for weak, run-down condition and it has helped me," writes Mrs. Walter M. Coulon, of Forsyth, Ga. "I was nervous and suffering from a weak condition. There were days when I had to lie down during the day. I sent for six bottles of Cardui, as it had helped me before. Cardui gave me strength, stopped the nervousness and helped me in every way." ... Cardui can do you any harm, so why not try it? Thousands of women testify Cardui benefited them. If it does not benefit YOU, consult a physician. \$1 a bottle, at drug stores.

### GHOULS RAID CRYPT

Boonsboro, Mr.—Ghouls have made two attempts to raid the tombs of the Dahlgrens in their mortuary crypt, apparently believing the common report that jewelry valued at \$3,500 had been left in the casket of Mrs. Madeline Vinton Dahlgren, widow of Joseph Adolph Dahlgren, distinguished naval hero of the war of 1812. A caretaker, after careful inspection, reported that little, if anything, had been disturbed within the casket.

### MODESTY CAUSES DEATH

Fort Logan, Ohio—Leaping into a water-filled sandpit to prevent a couple from seeing him naked, Arnold Joseph Parson, 9, who had been swimming with several companions, drowned. His companions, frightened, did not report the tragedy until the following day. The couple was not aware of the tragedy.

Fruit should be thinned out on the trees, say the experts, but a little later the boys will attend to that for us.

Formerly women used to weep for their sins, but it seems to take a poor complexion to make 'em shed tears now.

VERY LATEST By Patricia Dow

Designed in Sizes: 34, 36, 38, 40, 42 and 44. Size 38 requires 3 1/2 yards of 35 inch material.

A BECOMING FROCK Pattern 8221: Women who make their own clothes will appreciate the style and value in the design pictured here. Most of us have to spend a certain amount of time doing house work and need a dress which combines charm with utility as this one does. The cutting and making can be accomplished in a few hours, by following the instructions step by step as they are written.

Printed percale is the first choice for a dress of this type for it is a material which comes in pretty designs and colors and stands up well under much tubbing. Gay buttons and belt buckle to match make a nice trimming.

For PATTERN, send 15 cents in coin (for each pattern desired), your NAME, ADDRESS, STYLE NUMBER and SIZE to Patricia Dow, The Carolina Watchman Pattern Dept., 115 Fifth Avenue, Brooklyn, N. Y.

### Ross M. Sigmon Is Reelected

Ross M. Sigmon was unanimously reelected chairman of the Rowan county Democratic executive committee for another two-year term at a meeting of the committee prior to the county convention.

Mrs. J. P. Lynch and J. W. Bean were reelected vice chairman and secretary.

LITTLE AMERICA AVIATION and EXPLORATION CLUB With Byrd at the South Pole

by C.A. Abele Jr. President U.S.N.A. LIGHTS AND GAMES

LITTLE AMERICA, ANTARCTICA, CA, June 4 (via Mackay Radio)—And what do you think we are up to now? Archery, no less!

We are not actually shooting arrows around yet but we are going to. Last night Commander Noville announced that, if we have any time at all to play after the sun comes back next August, we are going to have an archery contest. Our dog sled men and Edgar Cox, our carpenter, are making a complete outfit of bows and arrows and, archery being one of the most difficult and scientific of sports, it appeals hugely to this particular crowd.

I thought there might be a peculiar problem connected with our archery activities but the crowd last night quickly solved it. It occurred to me that if anybody shot at a target and missed it, the arrow would travel of Grand Forks, along under the N. D., Surveyor snow and never be found. I mentioned this and it was decided to hang a couple of big pieces of heavy canvas in back of the targets and thus make the arrows drop gently onto the snow. So watch out for details of the tournament of the South Pole Archery League three or four months from now.

We have lots of other tournaments. Half our members are bridge fiends and long and loud are the arguments and "post mortems" after our evening games of "contract." We brought down with us 43 sets of the fascinating and tantalizing number puzzle, "Imp," and in addition to the time spent individually working out the various combinations, we are going to have some regular contests for prizes. Some of the scientists have become very expert. Backgammon is another of our favorite pastimes in the evening. We also have movies frequently and do a lot of reading. The scientists practically never quit working, night or day. And the way they can concentrate on deep problems of astronomy, or some other weighty subject, in a room full of men talking about baseball, the atres, movies and a million other topics is wonderful. Most of our daytimes are occupied with school

work—lectures and study on the scores of things necessary for us to know down here. These studies have a somewhat greater value with us now than our work did when we were in school or college. The knowledge of some little fact of climate, or trick of the ice, may save our lives some day.

You should hear some of the discussions that take place. They are all held in loud voices and range from deep and sensible philosophy on life to ridiculous theories about gardening, golf, and keeping tropical fish or stamps. Speaking of stamps, some of the people who sent covers down here last year should be receiving them back about now, properly cancelled, and our own first letters should be arriving. About a third of the mail we brought with us or which arrived on the Bear of Oakland, went back on her in February and should be reaching its destination at this time. The rest will come out with us next February—if we come out. Every night there is a long loud discussion—entirely futile on the probable date when the good old flagship, Jacob Ruppert, will come steaming back to take us home. Will the ice pack be too thick and tough for her to get through? If so we shall have to spend at least another winter on the ice—maybe two or three. Gosh, what a thought! But it's a possibility.

Our outdoor work is all over now and we are definitely indoors for the next three months—prisoners of the storms and darkness—except in the few calm hours when we can take short, torchlight walks or ski trips for novelty and exercise. The various groups are tremendously busy making definite plans for the flights, tractor trips, dog sled journeys and other explorations and scientific quests next spring (autumn with you). These plans will be published here during the winter night—and then they'll all be changed. Such is life among explorers!

Our club is still growing. 22,000 members now! If you haven't joined, by all means do now, with no cost or obligation. Membership card and our big map of Antarctica will be sent you if you'll send your name and address and a loose three cent stamp to Arthur Abele Jr., President, Little America Aviation and Exploration Club, Hotel Lexington, 48th Street and Lexington Avenue, New York City, N. Y.

### MOTOR GOES OUT; KILLS ONE

Colon, Panama—Flying at an altitude of 800 feet over Gatun lake, the right motor of an Army amphibian plane went out, hurling a broken part through the cockpit, killing Pvt. Ralph H. Lawson, of Maryville, Ill., and painfully injuring the pilot Lt. Cornelius Cousland, who was hit by flying bits of metal. Four enlisted men in the plane were uninjured.

### Champion Winner

LOS ANGELES... Miss Ruth Magden (above), is California's champion beauty winner. In all she has won 29 "firsts", ranging from bathing beauty, most beautiful legs, long hair and horsemanship down to whistling.

### TO HAVE NEW FACE

Beckley, W. Va.—Garland R. Snuffer, 22, of Glen White, had the misfortune to have his forehead, cheek and chin sheared away by a circular saw in a lumber mill recently. Surgeons plan to begin the work of building a new face for Snuffer in a week or so with the aid of plastic surgery.

Claimed that many highly educated young people don't know how to do anything. Anyway, they usually know how to get money out of father.

AMAZE A MINUTE SCIENTIFACTS BY ARNOLD FROM MAN TO A SPECK! THERE IS SO MUCH SPACE IN ALL MATTER, THAT IF THE ATOMS COMPRISING A MAN'S ENTIRE BODY WERE COMPRESSED INTO A PERFECT SOLID THE PRODUCT WOULD BE JUST VISIBLE UNDER A MICROSCOPE. WANDERING EYE! FROM LYING FLAT ON THE SEA BOTTOM ON ONE SIDE, THE FLOUNDER'S EYE ON THAT SIDE HAS GRADUALLY TWISTED TO THE TOP SIDE, WHICH THEN HAS TWO EYES. DEEPEST ROOTS—THE MESQUITE, WHICH GROWS IN AMERICAN DESERT REGIONS, HAS ROOTS OFTEN MEASURING 100 FEET DEEP.

### UNUSUAL FACTS REVEALED—by "Movie Spotlight"

Fay Wray HAS BEEN IN SO MANY "HORROR" PICTURES THAT SHE HAS GAINED THE REPUTATION OF BEING THE STAR SCREAMER IN THE MOVIES! Jack Holt COLUMBIA STAR, HAS 267 TIES, WHICH HE WEARS IN ROTATION. HE HAS A SPECIAL CLOSET IN WHICH THEY ARE HUNG!
