 Speaking begins at 10 o'clock p. m.
 Dr. York and Dr. Cook, his opponents, are invited and expected to meet him at these appointments. Everybody come out and hear the discussion.

Public Speaking.
 The candidates for the Legislature and for County offices will address the citizens of Stokes at the following times and places:
 Danbury, Tuesday, Oct. 2nd
 Germanton, Monday, " 3rd
 Watt's Store, Wednesday, " 4th
 Dalton's, Thursday, " 5th
 Covington's, Friday, " 6th
 Francisco, Saturday, " 7th

—The following appointments are Gen. Scales for Davidson county: Tuesday Oct. 3, at V. Crotts; Wednesday " 4, at Tyro; Thursday " 5, at Jackson Hill; Friday " 6, at Lexington; Saturday " 7, at Thomasville.

—We regret to learn that Judge Bennett is detained at home by fatal illness in his family.

—The Republicans of this Senatorial District met at Germanton on Saturday last and adjourned without making a nomination.

—The Wilmington Morning Star was fifteen years old on Friday last. It is one of our most valued exchanges, always bright spicy and full of news. Long life to it.

—Guilford county Democratic convention met last Saturday, and nominated J. T. Morehead for the Senate; Jas. W. Forbes and J. S. King for the House; W. U. Steiner, Register; J. N. Nelson, Clerk; J. H. Gilmer, Sheriff. A good ticket.

—We issue this week a political supplement, containing important items for the consideration of our readers. There are one or two errors in it. The dropping out of a type in the twenty-fourth line of the Craven county statement makes the Radical tax levy of 1878 only \$4,307.45. In the same and next paragraphs, the words "levied" and "levy," in place of "collected" and "collection" would be precisely accurate. Sometimes there is a slight difference between the levy and the collection.

Surry County Convention.
 There will be a meeting of the Democratic party in convention assembled, on Monday, the 21 day of October, in the town of Dobson, at the court-house, at 1 o'clock, for the purpose of nominating candidates for the Legislature, sheriff, clerk and other county officers. The chairman of each township committee will call their respective township Democracy together on Saturday, September 30, for the purpose of appointing a full corps of delegates to attend said convention.

Foreign News.
 LONDON, September 22.—A Vienna dispatch says: The Tyrol floods have almost entirely destroyed the towns of Tuenchen, Silles, Tobdach and Welsberg. Houses are falling every hour at those places. Twenty-six bodies of drowned persons have been found. The Emperor has ordered four detachments of pontonniers to be sent to the distressed province to repair damages. Railways in several parts of the province will not be in running order for a month: The rainfall continues.

Among Arabi Pasha's papers are written offers of service from French, German and Russian officers, which were all declined. Arabi Pasha says that the best thing the English could do for Egypt would be to send all the notables and other leading men connected with the rebellion out of the country. If they do not do so vengeance will surely be wreaked upon them after the departure of the English. Seeing the manner in which the British treat their prisoners and wounded, Arabi says they are great people and he is heartily sorry he fought them. He asserts that he never thought the English would send a large army to assist the Khedive, and so was led into war. He denies that he had any communication with the Sultan during the war.

—A review of the Democratic prospects in this State is quite encouraging. Never, since the war, has the outlook been so bright as now. The Liberal move has fallen flat, and the dead carcass of prohibition will not "move on a bit" but lies as the people left it a dead issue.

The Raleigh News Observer says: Latham's election, at one time doubtful is no longer so. Green will beat Canby by an increased majority. Robbins finds the enemy's camp divided into two hostile factions—Dr. Cook being bitter and massing at least one-half of the Republicans under his banner, while Dr. York has merged with the late that follows all politicians who desert their colors on the eve of battle, and gets but little comfort from either his old Democratic associates whom he now denounces, or from his new revenue friends whom he so lately denounced.

"The fifth and mud of Radicalism," his favorite expression, does not commend him to his new allies. In the other Democratic districts there is practically no opposition to our candidates, while Hubbs and O'Hara are fighting over the only cheese the Republicans will get in this State. Bennett's election by not less than thirteen thousand is claimed with confidence, while the opposition to Rutlin and our judicial ticket is barely respectable.

We will have the Legislature by our usual majority—two-thirds in the Senate and nearly three-fifths in the House. In fact the Liberal movement is a flat failure.

New York Democracy.
 The New York Democratic State Convention nominated Grover Cleveland for Governor.
 The platform adopted arraigns the Republican party of the country for mal-administration; reaffirms the Democratic platform of 1874; arraigns the Republican majority in Congress for a failure to reduce taxation to the legitimate requirements of the government under honest and frugal administration; condemns the River and Harbor bill; declares the nomination of Secretary Folger by the Republicans a nomination by the Federal Government; declares it necessary to forbid by penal enactment the black mailing of dependent officeholders; holds the Republican administration responsible for unredressed outrages on foreign-born citizens, and demands protection when abroad for American citizens; demands a revision of the laws affecting the merchant marine, with the object of fostering that industry; favors the enactment of laws providing against fraud and intimidation at primary elections; declares that the encroachments of chartered monopolies should be squarely met, and these corporations brought under control of the law; declares against convict labor and in favor of regulating the labor factories in the interest of the health of laborers. Several sections of the platform refer to canals and other purely State questions. John Kelly's additional plank condemning wholesale grants of public lands to corporations, and demanding that these be reserved for occupation by actual settlers, was accepted as part of the platform.

Caution to Tobacco Growers.
 Asheville Citizen.
 The following communication from a gentleman in Danville, to whom we return thanks, explains itself:
 Messrs. Editors.—Please allow a small space in your popular journal, to publish a warning to the tobacco raisers of Western North Carolina against curing their tobacco by the artificial process of sulphur.
 Whilst this may give the weed all requisite color, yet it will not hold such color permanently, for when softened by damp weather, it will at once begin to darken, and continue to deteriorate; moreover, tobacco cured in this manner will not have its natural flavor; but will be found to possess on examination a disagreeable odor and can easily be detected. Buyers will be on the look out for this sulphur cured stuff, and for the good of the tobacco raiser of your section, I hope you will give this a prominent place in your columns, and that it may find due consideration with your farmers.

 WALTER HOBBS, Secretary.

The Damages of the Storm.
 NEW YORK, Sept. 25.—Details of the damage done by Saturday's flood fill several columns of to-day's newspapers, and some remarkable instances of the force of the water are recorded. On Jersey avenue, Jersey City, one of the finest streets in the city, there was a wooden pavement with a slight asphalt covering. The water loosened the blocks of this pavement and washed them into sewer openings, soon choking them, and rose to a height that filled all the cellars and all the basement dining-rooms which are here. The sole damage from this cause is immense. A great sewer on the line between Jersey City and Hoboken burst and a section of the sewer masonry twenty-eight feet long and six feet in diameter was raised bodily out of the earth and the water spouted 300 feet in the air for several hours afterwards. The new tunnel of the Ontario and Western R. R. through the hill back of Jersey City was submerged, the bank of the cut caved in and burned 180 gravel cars and did other damage to the amount of \$100,000. On the Long Branch Railroad the foundations of the bridge over Berry's Creek were weakened and the bridge went down while a freight train was passing over it. The conductor was killed and the engineer and fireman injured probably fatally.

North Carolina at Boston.
 At length the ice is broken, and thanks to the Richmond and Danville Railroad and the energy of Col. Andrews, Captain C. C. McPhail and the other officers of that company, North Carolina presents a bright and shining place among her sisters at the Boston Exposition. It is with real satisfaction that we contemplate the idea that hereafter we are not to be known merely as the tar, pitch and turpentine State, as the old geographers used to have it, but that our rich and varied resources attract attention and challenge the admiration of practical men throughout the length and breadth of the Union.
 In a long article the Boston Journal of Commerce describes the exhibit from North Carolina and makes kind comment upon the rich resources of copper, the silver ores, the gold and the iron, that contribute so largely a part of our undeveloped resources.
 Our stores, so varied as to be almost countless, next are made to pass in review, and finally, of our woods the Journal of Commerce says:
 "In woods a very extensive and varied display is made in finished and unfinished woods of all kinds, each specimen being neatly labelled and easy of reference. Oak, pine, walnut, poplar, maple, willow, elm, locust, plum, hickory, gum, birch, cherry, holly, persimmon, chestnut, red cedar, and many other varieties are represented by specimens of a number of species of each. Sections of curly poplar and walnut trees are shown very nearly five feet in diameter."
 "A large exhibit of persimmon, dogwood, hickory, gum, birch, hickory, locust, and many other varieties are represented by specimens of a number of species of each. Sections of curly poplar and walnut trees are shown very nearly five feet in diameter."
