DELAY MAKES THE DANGER. Till now Fires have only been met by means too dilatory, too late, and too cumbrous... The time lost in sending for an engine and getting it into working order has too often proved a fatal delay. The EXTROUBUER, a self acting portable Fire Engine, is inexpensive, and so simple in its construction that the mere turning of a cock puts it into full action. Warranted harm-less to life, health and property. Always ready for instant use. So portable that a man carries it instant use. So portable that a man carries it without hindrance to active exertions. For Man-infactories, Warchouses, Railway Depots, Public Buildings, Hotels and Private Residences, it is in-dispensable, and for Steam and Sailing Vessels it is as vitally necessary as a life-boat or a life-pre-server. It occupies but little space, contains a chemical liquid (perpetually renewal,) and is equally efficacious at any lapse of time.
