THE FLOODS.

THE WATER AT SALT LAKE.

TREMENDOUS FLOODS NEAR BOSTON.

SALT LAKE, April 19.—Noon.—The flood in the Bitter Water Valley is increasing. Three of the Union Pacific bridges have gone. This trouble extends ten miles. Nothing can be done till the water subsides.

BOSTON, April 19.—Noon.—A tremendous flood, with disastrous results, occurred last evening in the towns of Wrentham and Norfolk, about twenty-five miles distant, by the breaking away of the dam which restrains the water at Riton's pond, the source of the river. This is a small river, not over twenty-five feet broad at low water, but running with a strong current mostly through the meadow-land and emptying into Charles river at Midway. At this time an immense body of water was confined in the pond by the dam, about 100 hundred feet in length, at the Wrentham and Franklin country road. The sudden bursting of the pond through this dam hurried a tremendous flood upon the land between, sweeping away mills, bridges, cutting roads and dams in its course, and causing damage to the extent of about \$100,000 and \$200,000. Half a mile below this mill was a saw and grist mill of Eliot, Felting & Co., known as Fisher's mill, and such was the force of the water on reaching here that it burst the 30 feet dam and carried away the saw mill portion of the establishment as though it was a toy ship. On rushed the water three-fourths of a mile, and seventy rods further on the great dam of Eliot, Felting & Co.'s mill was met; this, with the road from the mill to Franklin Centre, beneath which the river runs, offered a substantial resistance to the rushing current. The road, however, soon yielded, allowing the full force of the water to strike against the long dam, and while the inhabitants of Franklin and Wrentham rendered valuable assistance to the watchman at the mill in opening a place in the dam, hoping to save a portion of the same. Their labors were successful, and although 50 feet of the dam were carried away, the mills were saved. Down the stream half a mile further was the track of the New England & New York R. R., 40 or 50 feet above the river's bed. Here all this the water usually passes by an arched culvert about 10 or 15 feet in width. Here the waters, with seemingly increased force, forced into the stone culvert as if it were constituted of pebbles. So firm was the embankment of sand above the culvert that it stood apparently intact for the space of an hour, then, undermined, it caved in for a distance of 150 to 200 feet, forming an impassable barrier to the waters above. When the road bed sank a freight train was within 100 feet of the place, though not in motion, but a great volume of water had already passed the railroad and hurried on to the achievement of its greatest feat forty rods below at the City cotton mill. The mill was originally a three-story wooden building, but lately was enlarged by the addition of a wing on each end. The bridge over the county road encumbered, and then the water, obtaining a firm hold on the main building, lifted it and sent it crashing to the meadows below. So thorough was the work of demolition that the cupola alone of what a few minutes before was a valuable mill, remained standing upon the plain. The machinery and water wheel went with the mill, and stared the fate of the structure which housed them. The wings were left standing, but were so badly wrenched and undermined that they are probably ruined and will have to come down. Down the stream again about a half mile was another county road bridge near Kingsbury pond. This was snapped from the foundations almost at the approach of the waters and carried away. On the level space between the road and the river the waters spread out and ceased their work of destruction. The last bridge was swept away about seven o'clock in the evening. One body was swept down on the flood, but it was supposed to be that of a man of some means. As far as known no lives have been lost but the damage to property is very large. No houses were swept away as their location on the banks was such that the water did not reach them. The following are the losses as far as ascertained: Whitney's dam, \$2,000; Elliot Mills, \$10,000; town of Norfolk, \$5,000; N. Y. & New England Railroad, \$15,000; City Mills, \$50,000 to \$75,000. A large number of persons are thrown out of employment by the fall of the City Mills.

A large number of persons are thrown out of employment by the fall of the City Mills.

THE COLD.

SNOW AT NORFOLK.

EXTREME COLD IN THE WEST.

DAMAGES TO FRUIT AND CROPS.

HEAVY SNOWS IN WESTERN VIRGINIA.

NORFOLK, April 19.—Noon.—It snowed here on Saturday night and yesterday. The cold snatched the fruits and early vegetables. Loss to truckers very heavy.

CINCINNATI, April 19.—Noon.—Reports from Kentucky, Indiana and Ohio show that the weather during the last two days has been the coldest for the season known in years. The thermometer ranges from 12 to 25 degrees above zero. Early fruits are thought to be killed, and tobacco seriously injured.

LOUISVILLE, April 19.—Noon.—Quite a heavy snow fell here yesterday to-day and last night. The thermometer is several degrees below freezing. The same snow storm and cold has prevailed throughout Kentucky and Tennessee, and great damage has been done to fruits and tobacco plants.

RICHMOND, April 19.—Noon.—Heavy snow at intervals yesterday, with a high cold wind. At sunrise this morning the thermometer was eight degrees below freezing. Early vegetables, fruits and young clover is killed. Advice from various parts of the State give disastrous accounts of damage from the cold. The loss among the truckers in the western part of the State is estimated at a million dollars.

TORONTO, April 19.—Night.—It is feared that the Fall wheat has been killed by the recent freeze. In some sections the thermometer is nine degrees below zero.

ELECTRICISMS.

A squaw brings the news to Sioux city, that the warriors had surrounded the miners in the Black Hills and killed and scalped one. The troops rescued the miners and took them from the hills.

In the billiard tournament at Chicago on Saturday night, Cutts beat Hos 200 to 67; Burleigh beat Millet 200 to 143. In the last innings Burleigh made 117, the highest count in the tournament. McAfee beat Herring 200 to 196.

The troubles of the North Pacific railroad have culminated in the appointment of a receiver who will take immediate control of all the property.

Two men who were refused admittance into Bush Tavern at Waltham in Springfield, Mass., attempted to force an entrance and both were killed.

The adventists of Chicago were prepared to leave the world last midnight.

MASSACHUSETTS.

THE LEXINGTON CENTENNIAL.

FIFTY THOUSAND PEOPLE ON HAND.

LEXINGTON, April 19.—Noon.—The official ceremonies commenced to-day and Curtis and Dana are speaking. The population is 2,200, and it is estimated that 10,000 people are here. A train leaving Boston at 9:30 A. M. brought seventeen cars loaded full and left 3,000 at the depot awaiting transportation. Hundreds are at the stations along the route unable to get aboard.

LEXINGTON, April 19.—Night.—There are from 40,000 to 50,000 people here, and it is impossible to go anywhere. The procession is now moving in accordance with the published programme. Promptly at 10 A. M. the ceremonies in the tent began, the immense pavilion being crowded to overflowing, and thousands surging about the entrance, unable to gain admission. A raw cold wind has prevailed from the east since 9 o'clock, rendering it extremely uncomfortable, and testing the patriotic enthusiasm of the vast multitude to the very utmost. At 10 A. M. the Superintendent of the Lowell road telegraphed to Boston to sell no more tickets for Concord, the single track being so blocked up with immense trains that it was impossible to transport them beyond this point.

The President, with Vice-President Wilson, and four of his staff, rode in a four-horse carriage in the procession.

HEADQUARTERS.

SIR EDWARD THORNTON UMPIRE IN THE MEXICAN CLAIMS CASES.

THE ST. PATRICK'S FAIR.

SUPREME COURT DECISIONS.

WASHINGTON, April 19.—Night.—Growing out of the raid upon Esquid, Mexico, in 1866, there are 108 Mexican claims against the United States, and 12 American claims against Mexico. The latter were brought by American citizens who were doing business in Bagdad. The American Commissioner claims that the raiders were invited by Mexico and commanded by Mexican officers to drive the Imperials from Bagdad, and flushed by success, sacked the town, and that United States troops were sent across to preserve order. The Mexican Commissioner claims that the United States soldiers did the sacking, and that the United States is responsible.

A test case has been submitted to Sir Edward Thornton upon which all the claims will turn. Sir Edward will give his decision as Umpire in a few days.

At the St. Patrick's fair in this city, a splendid picture donated by Max Wehl, to the most popular physician, was won by Dr. A. T. E. Garnett, he receiving the highest number of votes.

The following cases were disposed of by the Supreme Court: Moore vs. State of Mississippi, error to the court of Mississippi. The indictment charged Moore with selling lottery tickets

and keeping a gaming table. The plea was that in the acts complained of he was acting as agent for the Mississippi Agricultural, Educational and Manufacturing Aid Society, a body incorporated by the State in 1867, and that prior to the present State constitution the corporation had complied with all the provisions of the act of incorporation. The demurrer by the State was sustained and the accused was tried and convicted. The Court say that upon this record as presented no Federal question was necessarily decided, and in such a case this Court will not reexamine a case. A plea to be good as a bar to the whole indictment must meet the whole case. If it does not, it will be held bad upon a demurrer. The demurrer to this plea was, therefore, properly sustained; writ dismissed. The Chief Justice delivered the opinion.

The criminal court case against Hinds, ex-marshal of Alabama, was postponed until to-morrow.

ALABAMA.

SALE OF THE WESTERN ALABAMA RAILROAD.

MONTGOMERY, April 19.—Night.—At the sale, under a Chancery decree, of the Western Railroad of Alabama to-day, W. M. Wadley, President of the Georgia Central Railroad, and J. S. Davis, Vice-President of the Georgia Railroad, became the purchasers for their three million one hundred and twenty-nine thousand one hundred and sixty-six dollars and one cent.

There have been frosts for the last four mornings, causing some damage to corn, cotton and vegetables. The fruit is not much hurt.

GEORGIA.

DISTRESSING AFFAIR AT HAWKINSVILLE.

AGUSTA, April 19.—Night.—A dispatch from Hawkinsville, Ga., reports an unfortunate affray there this morning resulting in the death of John W. White, seriously wounding of Nick P. Dillard, and slightly wounding of Willard Oliver. All were young men. White was killed instantly—three pistol balls entering his body. Dillard was shot in the head. The affray was caused by the renewal of an altercation which occurred Saturday.

TEXAS.

MEXICAN BANDITRY AGAIN ON A RAID.

HALVESTON, April 19.—Night.—A special dispatch from the border reports the Mexican raiders burning ranches. Telegraph communication from Brownsville has been interrupted by the supposed raiders, who have cut the line. People in several border towns are in arms. Many rancheros are moving to the towns for safety.

SPECIAL.

The best collar ever made is the Elmwood. It fits better and looks better than any other.

The most stylish collar you can wear is the Washneck. Ask for it at the gent's furnishing stores.

Laughter Lends a New Charm. To be happy, when it discloses a pretty set of teeth. Whiteness, when nature has supplied this element of loveliness, may be retained through life, by using the fragrant Scooner's.

An Irishman called at a drug store to get a bottle of Johnson's Anodyne Liniment for the rheumatism; the druggist asked him in what part of the body it was most, "In my soul," said he, "I have it in my soul and corner or me."

For loss of end, horn all, red water in cows, loss of appetite, rot or murrain in sheep; thin wind, broken wind, and roaring, and for all other affections of the kidneys in horses see Sheridan's Cavalry Condition Powders.

Dr. Schenck's Pulmonic Syrup, Sea Weed Tonic, and Bessie's Pills. These medicines have undoubtedly performed more cures of consumption than any other remedy known to the American people. They are compounded of vegetable ingredients, and contain nothing which can be injurious to the human constitution. Other remedies advertised as cures for consumption probably contain opium, which is a somewhat dangerous drug in all cases, and if taken freely by consumptive patients, it may do great injury; for its tendency is to confine the morbid matter in the system, which, of course, must make a cure impossible. Schenck's Pulmonic Syrup is warranted not to contain a particle of opium. It is composed of powerful but harmless herbs, which act on the lungs, liver, stomach and blood, and thus correct all morbid secretions, and expel all the diseased matter from the body. These are the only means by which consumption can be cured, and as Schenck's Pulmonic Syrup, Sea Weed Tonic, and Bessie's Pills are the only medicines which operate in this way, it is obvious they are the only genuine cures for Pulmonary Consumption. Each bottle of this invaluable medicine is accompanied by full directions. Dr. Schenck is professionally at his principal office, corner Sixth and Arch streets, Philadelphia, every Monday, where all letters for advice must be addressed.

NEW ADVERTISEMENTS.

Wilmington Lodge No. 319.

Regular meeting this (TUESDAY) P. M. at 8 o'clock. The M. D. will be conferred after regular business.

PRESTON CUMMING, Secretary.
