New ORLEANS, July 20 .- Gov. Kellogg addressed a letter to Attorney General inclosing a report of experts appointed by him to examine the col-lectors office at that place, in which he says that the investigations that have taken place before b th civil and criminal courts and investigation and report of State examiner disclose gross culpability on the part of other persons whose acts have injured the State and for years have caused discredit on the government. I especially call your attention to the record in this respeet, and request that you will take prompt measures to bring to justice all those who have been guilty of de-frauding the State as disclosed by these inquiries,

HEALTH OF NORFOLK AND PETERSBURG-OFFICIAL REPORTS.

PORTSMOUTH, VA., July 20.—To Hon. George M. Robeson, Secretary of the navy at Washington: As various reports are published in Northern papers affecting the health of Norfolk and vicinity. I have to report the health of this locality, unusually excellent for the season, and that there has been no case of yellow fever here for nearly twenty years. This infor-mation is derived from the health officers of the two cities. Upon investigation, I find that no medical officer a tached to this station has ever written privately, or otherwise that there was a case of fever here. [Signed.]

THE CORN CROP.

WASHINGTON, July 20 .-- The July return to the department of agriculture, shows that the average in corn is about eight per cent. greater than last year. New England has reduced her average to about one and a half per cent., and the Pacific States about one per cent. All the great corn growing regions have increased their average; the Middle States two per cent., the South Atlantic States three per cent., the Southern States twelve per cent., the States north of the Ohio seven per cent., the States west of the Mississippi fourteen per cent. The condition of the crop is below the average in the New England, Middle and South Atlantic States. The minimum condition is 82, being in Rhode Island. Florida and Alabama are also below

the average, but the other Gulf States and the inland Southern States are above. The maximum is 112, being in Mississippi. All the other States, except Missouri, 103, are below the average. The minimum condition is 82, being in Wisconsin.
