In Louisiana the average decline is six per cent. on account of local drought though several parishes report very promising crops. This ingenius influ-ence cut down the average of Georgia eleven per cent; of South Carolina 15 per cent; and Florida 16 per cent. The August averages were as follows: North Carolina, 99; South Carolina, 84; Georgia, 86; Florida, 85; Alabama, 93; Mississippi, 10; Louisiana, 99; Texas, 93; Arkansas, 108; Tennessee,

Lice and catterpillars are reported in two or three counties, but no damage to the crops is noted.
