E. ANHUESER & CO'S solt of the analysis made by W. O. Conrad, Chemist of the Jaitel States Naval Labora torv, New York. CONCLUSION FROM THE ANA YELS OF

THE QUALITY. The quality of this boar, as shown by our amilysis, is appear by its purchess, as no extrance a matter could be detected. The large amount of extract substance (mail being used in extraordinary great quantities, which, having been roasted, gives the user that peculiar flavor of fresh bread) makes this bear a very poortshing and highly recommend the drink for medicinal purposes. Another good quality of this been is that it keeps in good can little under all circumstances.
