ASHEVILLE, N. C., June 22.—A sensational story was recently sent out from San Francisco by the Chicago Associated Press stating that the Colonel A. R. Cochran, of San Diego, Cal., was to come into possession of an immense fortune through a North Carolina land grant. The facts are simply these: Colonel Cochran instituted suit in the United States court at Asheville in 1853 for lands in Grant and Mitchell counties, based on some supposed land grant. At the November '94 term of court General T. F. Davidson, counsel for Cochran, stated that his client had been unable to file the bonds required to prosecute the case and it was accordingly dismissed.

GATEWAY OF SILVER.

200,000 Taels Wanted for the Chinese Indemnity Loan.

SILVER MAY NOW HAVE ITS DAY.

China is Reported to be Offering as a Collateral for the Indemnity Loan. While the silver is available in the gold.

WASHINGTON, June 24.—The Chinese legation here has received information in regard to the negotiations in progress with a view to having China secure from American capitalists the amount of silver requisite to pay the Chinese war indemnity of 200,000,000 taels to Japan.

Should the negotiations be consummated it will make one of the largest financial transactions of the recent years and more than double the amount of the recent Morgan-Belmont transaction with the United States. It is understood that the payment will be made in silver, the total being not only equal to the amount of the loan, but also a measure of the amount of the first payment of 50,000,000 taels falls due next November and the second payment of the same amount in May next.

Mr. W. W. Foster, who is expected in a few weeks will develop additional particulars. If American silver is used to meet the indemnity the amount would be equivalent to the silver coinage for the two years while the Sherman law was in operation. The present negotiations with Russia and France refer merely to the extra indemnity to be given because of the renunciation of the Liao-Tung peninsula by Japan and do not refer to the main loan, which the Americans seek to secure.

There is much interesting speculation as to the result of the loan, if it is secured by the American parties. It is said that the first result would be the shipment of an unprecedented amount of silver. But as China's bonds are payable in gold the ultimate result would be to bring back gold for silver paid to Japan. It is pointed out also that the interest on the entire loan will not exceed \$5,000,000 annually, so that the Chinese customs receipts of \$2,000,000 would readily meet the interest charges and provide a sinking fund for the redemption of the bonds, which will probably run for twenty years.

IRON AND COAL BOOM

Again Attracting the Attention of the Business World.

THE BAROMETERS OF THE TIMES.

The Alabama Mines Are all Active and Prices are Everywhere Advancing. Quoting the Latest News from the Birmingham and the Lenoir-Near Mine. Lenoir Operated.

BIRMINGHAM, Ala., June 21.—There is good cheer among the iron men just now. The Sloss Iron and Steel company has begun the work of repairing, remodeling and rebuilding their No. 1 furnace, on First avenue and Third street, preparatory to putting it into blast again in a new and improved condition and with the latest appliances. The various contracts for the work have been let and a large force is now at work.

The majority of the contracts were let to companies and firms in Birmingham and most of the labor is secured here also. A gentleman well versed in coal miners' affairs was seen yesterday afternoon and from him it was learned that the coal miners were anxiously awaiting another advance in the price of coal. The coal is being used for political purposes, and says that the loans he made were made up on business principles and what he considered good security, but when he tried to collect, the borrowers were unable to pay.

This probably cost me \$50,000. Then I loaned \$50,000 to a relative of mine to invest in mining property, at the rate of \$100,000 per acre to the Northwestern Hotel scheme during the World's Fair, and lost \$7,500. In the failure of the Big bank, I lost \$10,000. I was unable to get any of the money market to realize on any of my property and money in trust, except about \$100,000 in farming during the two years.

Then my friends were unable to raise the money they had promised. The day before Christmas I found that, do the best I could, I would be \$100,000 short in cash. My first impulse was to go to Pierre and turn over what I had, but I concluded, on my friends' advice, to put all my property and money in trust, and to be paid in full during the two years.

While in Topeka last March, E. T. Barber, a prominent newspaper man of La Crosse, Wis., was taken with cholera morbus very severely. The night clerk at the hotel where he was stopping happened to have a bottle of Chamberlain's Colic, Cholera and Diarrhoea Remedy and gave him three doses which relieved him and he thinks saved his life.
