The Cash Racket Store.

NOW FOR CHRISTMAS!

If you are ready to look
We are ready to show!

If you are ready to buy
We are ready to sell!

YOU KNOW

For years we have always shown the largest line of Holiday Goods in this little city, but this year we propose to astonish the natives. We are crowded to the doors in each of our three stores with merchandise suitable for the season. We believe this will be the year for giving useful presents of which we have a Grand Stock for you to choose from. We mention a few things that will make useful presents, and to begin with the useful as well as the ornamental, we mention a

BEAUTIFUL LINE OF

STERLING SILVER NOVELTIES

and New Things in Jewelry.

OTHERS THAT ARE "PRESENTABLE"

- PLAIN AND EMBROIDERED HANDKERCHIEFS.
- FINE SILK MUFFLERS.
- DOG SKIN GLOVES, FUR BACK.
- FINE SILK SUSPENDERS.
- GENTS NECK AND 4 IN HAND TIES.
- SHOPPING BAGS.
- STAMPED LINEN.
- CHINILLE TABLE COVERS.
- TURKISH RUGS.
- CURTAIN POLES.
- HOLL AND SHADES.
- LACE CURTAINS.
- DINNER NAPKINS AND DOYLIES.
- FINE DAMASK TOWELS.
- LUNCH BASKETS.
- HAIR CURLERS.
- FINE CHINA INDIVIDUAL CUP AND SAUCER.
- " " BREAD AND BUTTER SETS.
- " " CAKE PLATES.

Deep Sea Fishing.

Uncle Sam has a boat built especially for deep sea fishing—the United States Fish Commission steamer, Albatross. Her business is to follow ocean fish from their summer to their winter habitat, and observe their manner of life. This work includes the collection of fish, mud and shells, sometimes from a depth of more than twenty five thousand feet. Such work requires a heavy sinker and a strong line, as well as the greatest ingenuity in the construction and use of the instruments.

The electric light is sometimes lowered eight hundred feet, at which depth the illumination becomes invisible from above. Near the surface the shadows of large fish attracted by the light are cast up on the sea, with the wierdest effect. The light seems to have a maddening influence over some kinds of fish. Sharks in particular will dart at it as at a deadly foe. Not infrequently the current "shocks" them, and the dead bodies of these victims of rage or curiosity float to the surface.

The operation of "sounding" or fishing at a depth of tens of thousands of feet requires nerve and judgment. The tension on the steel wire must be constant to prevent "kinking;" and the currents which would sweep the wire under the bottom of the ship must be carefully watched for. Great patience is sometimes needed to clear a line without kinking or losing any part of it.

One interesting appliance is the water specimen cup, which is let down on the sounding-line, and is so arranged that the resistance of the water keeps open the valves of the cup during its decent, and closes them during its ascent. Water from any given depth can thus be brought to the surface for examination in the laboratory of the Albatross, or in Washington, where water specimens are sometimes sent for more elaborate analysis.

These water cups are strongly built, to resist the enormous pressure. One of the curiosities on the Albatross is a heavy glass globe filled with water. This hollow glass ball was lowered to so great a depth that the pressure literally forced the water through the pores of the glass till the ball was filled. Because of this pressure mercury bulbs of deep-sea thermometers have to be closed in secondary glass cases also filled with mercury; otherwise the readings of the thermometer would be very imperfect—the pressure sending the mercury beyond the temperature point.

The Albatross has found life at surprising depths, and her adventures and researches are as fascinating as those of the Nautilus in Jules Verne's "Twenty Thousand Leagues Under the Sea," with the advantage that the stories of the Albatross are true.—Youth's Companion.

The Pains of Rheumatism

According to the best authorities, originate in a morbid condition of the blood. Lactic acid, caused by the decomposition of the gelatinous and albuminous tissues, circulates with the blood and attacks the fibrous tissues, particularly in the joints, and thus causes the local manifestations of the disease. The back and hips are the parts usually affected by rheumatism, and the joints at the knees, ankles, hips and wrists are also sometimes attacked. Thousands of people have found in Hood's Sarsaparilla a positive and permanent cure for rheumatism. It has had remarkable success in curing the most severe cases. The secret of its success lies in the fact that it attacks at once the cause of the disease by neutralizing the lactic acid and purifying the blood, as well as strengthening every function of the body.

BLOOD HOUNDS FOR THE COUNTIES.

Recent perpetration of diabolical crimes in the State develops the fact that society needs all the protection that possibly can be devised. North Carolina begins to hang her head in shame for the fiendish work of the ruthless, red handed murderer. It has been many years since the State has been shocked by a crime so villainous as the cold blooded murder of J. B. Bonner at Aurora ten days ago—not since the famous Scott Parun tragedy that took place in Johnson county many years ago.

And it was only a few weeks ago the white man Neville was murdered at Tarboro by the colored man George Washington, who paid the penalty for his crime at the end of a rope in Tarboro yesterday.

Sundays papers also announced that a bold attempt was made to wreck a passenger train near Goldsboro Friday night. In all three cases which we mention effort was made to secure blood hounds from the State farms on the Roanoke river in order that the criminals might be speedily and successfully hunted down. In the Tarboro case the blood hounds aided materially in catching the murderer. In the case at Aurora the distance was so great from the State farms that the tracks would have been too cold before the hounds could have been put to the place. Mr. Bonner's body was cold in death at least twelve hours before it was found, and the necessary time to get them there from the State farms would have made it impossible to track the fiends.

In the case of the attempt to wreck the train at Goldsboro Friday night, we have not learned at this writing whether the hounds were secured or whether the criminals were caught.

These cases lead the Democrat to suggest the wisdom of keeping a number of genuine blood-hounds at some central point in every county in the State. We believe it would be a wise expenditure of public funds for the county commissioners of every county to purchase and hold in readiness the proper number of trained blood-hounds for the speedy apprehension of such criminals.

This added protection to society we believe would be a valuable service to the State and an economical expenditure of that amount of money.

Criminals would be slow to commit such black and atrocious deeds if they knew that within a few hours the blood-hounds of death would be yelping on their tracks. We believe it worth the consideration of county commissioners all over the State.

The secret of a speedy cure in sickness lies in selecting the proper remedy and this is difficult to do unless one is sure what the ailment is. But one thing is sure, had the liver been actively at work sickness would not have come. It is then always safe to take Simmons Liver Regulator which keeps the liver well regulated and all poison expelled from the system.

Agriculture on a great scale in the new West has made people forget the great business undertakings of some planters in the days of slavery. An English traveller describes a plantation in Louisiana where a single field of 6,000 acres in sugar cane and 1,600 in corn bordered the Mississippi. The plantation was sold not long before for near \$1,500,000 and it yielded that year more than \$300,000 worth of products. The same planter had another plantation of 8,000 acres, worth about \$750,000. One of his neighbors had saved \$1,000,000 in twenty-five years. The crop of sugar on the first plantation was estimated to be worth nearly \$500,000 in the year of the Englishmen's visit.

There is good reason for the popularity of Chamberlain's Cough Remedy. Davis & Bazard, of West Monterey, Clarion Co., Pa. say: "It has cured people that our physicians could do nothing for. We persuaded them to try a bottle of Chamberlain's Cough Remedy and they now recommend it with the rest of us." 25 and 50 cent bottles for sale by E. M. Nadal, Druggist.

Are you taking SIMMONS LIVER REGULATOR, the "KING OF LIVER MEDICINES?" That is what our readers want, and nothing but that. It is the same old friend to which the old folks pinned their faith and were never disappointed. But another good recommendation for it is, that it is BETTER THAN PILLS, never gripes, never weakens, but works in such an easy and natural way, just like nature itself, that relief comes quick and sure, and one feels new all over. It never fails. Everybody needs take a liver remedy, and everyone should take only Simmons Liver Regulator.

Be sure you get it. The Red Z is on the wrapper. J. H. Zelin & Co., Philadelphia.

That's What It Is.

The poet Tennyson could take a worthless sheet of paper and by writing a poem on it could make it worth \$65,000. That's capital.

The United States can take an ounce and a quarter of gold and stamp upon it an "eagle bird" and make it worth \$20. That's money.

The jeweler can take material worth \$5 and make it into a watch worth \$100. That's skill.

The merchant can take an article worth seventy-five cents and sell it for one dollar. That's business.

A lady can purchase a very comfortable bonnet for \$3.75, but she prefers one that cost \$27. That's foolishness.

The ditch-digger works ten hours a day and shovels three or four tons of earth for \$2. That's labor.

The editor can write a check for \$80,000,000 but it wouldn't be worth a dime. That's rough.

A college student plays foot-ball for four hours, breaks two arms and a leg, punches out one eye, and does enough work to build a railroad. That's fun.—Selected.

We know of but one community in the world where dyspepsia is practically unknown, and that is the Shakers of Mount Lebanon, N. Y. Those good people have been studying the subject of digestion for more than a hundred years, and that they understand it pretty thoroughly, is evinced in the foregoing fact. Their Digestive Cordial is the safest and best remedy in cases of digestion that we know of. A trial bottle can be had through your druggist for the trifling sum of 10 cents.

The Shaker Digestive Cordial supplies the system with food already digested, and at the same time aids the digestion of other foods. It will almost instantly relieve the ordinary symptoms of indigestion, and no sufferer need be told what these are.

LAXOL is the best medicine for children. Doctors recommend it in place of Castor Oil.

A Solemn Warning.

What is the man doing?
He is climbing the electric lamp to light his pipe.
Will he light it?
No: but we will go to his funeral tomorrow.

Is he a poor man?
No; but he never subscribed to a newspaper, and does not know that the war is over.—Atlanta Constitution.

Tobacco and snuff—M. T. Young.
