THE ADVANCE,
Wilson, N. C.

We much doubt if there is anything, in the gift of the people, that Dewey could not get, just now, for the asking.

"A new broom sweeps clean." This partly explains how it was that Dewey swept the Spanish fleet off the seas at Manila.

The presenting of a sword to Admiral Dewey, and medals to each of his officers and crew will be heartily endorsed by the people all over the land.

Sampson is still on the hunt for that "Flotilla." Some think he will find a "hot time" when he runs across it, but the thing must be did, and doubtless he is an anxious to make a name for himself, as the people are to "Hear tell of the fight."

Holding onto the Philippines and the Monroe doctrine at the same time will not be a difficult feat for statesmanship that is capable of putting up an argument for the man who tries to hold two offices that are going in the opposite directions.—Washington Post.

The Manila news of yesterday when we take into consideration the long years of oppression, under which the natives have been forced to live. It is small wonder that they should try and balance off the score when the opportunity came.

The Americans have taken nine Spanish steamers, nine schooners, two sloops and several fishing smacks, not to mention the destruction of the Spanish fleet at Manila. The value of the ships taken as prize money is \$3,000,000. The Spaniards have taken one American boat, valued at \$10,000.

Nothing short of a fight is considered worth reading now. That affair at Manila has spoiled everybody for such insignificant items of news, as the capture of two or three Spanish vessels. Even the Massacre of the Spaniards at Manila was considered "tame." Our readers are demanding "Hot stuff" or a kick is in order. They seem to think that we carry two or three first class battles up our sleeve.

Ships of Belligerents May Pass Through The Suez Canal.

In The Observer of the 7th, we suggested that it might have been a good move for Spain to rush part of her Cadiz fleet through the Mediterranean to the relief of Manila. A friend of The Observer wrote us the same day in regard to the editorial as follows:

"This morning I see editorially that you suggest that Spain might have rushed part of her Cadiz squadron through the Mediterranean for the Philippines as soon as she had the news of the Manila disaster. Now, to do this of

go through the Suez Canal. It has been my understanding all along that during war no warships are allowed to pass through the Suez Canal. I am not absolutely certain that I am correct, but I think you will find this the case. If her squadron had to go around the Cape of Good Hope—a distance of over 13,000 miles—Commodore Schley's flying squadron could give them a close race. Besides, what ships we have on our Pacific coast could get to Manila a long ways in advance. If I am wrong about the Suez Canal being closed to warships I should like to be corrected."

The Norfolk Landmark, a most careful and conservative newspaper, and always well informed, contains the following, which answers our correspondent's inquiry:

In 1888 a convention of the powers controlling the Suez Canal decided that ships of belligerents should be allowed to pass through the waterway in time of war, but it was stipulated that no act of hostility should be permitted in the canal itself or within three miles of either entrance. Spain therefore, has a perfect right to send a fleet by way of Suez if she so desires. To weaken her present naval force in the Atlantic, however, would be inconceivable rashness.

MANILA.

In view of the fact that the Philippines are now in possession of the United States it will be of interest to know something of the principal towns of the island.

Manila was founded by the Spanish in 1571 and is a bustling port. The imports amount to about \$15,500,000, the exports to \$23,500,000.

The town, which is the capital of the Philippines, is a city of 250,000 inhabitants, according to the census of 1880. The large bay, on the shores of which it lies, is oval in form. Into this bay the River Pasig empties. The city proper is on the left bank of the Pasig a spot selected in 1571 by Lopez de Legaspi as the future centre of Spanish power in the islands. The Spanish and Creole portion of the population constitute about one-tenth of the whole, the others being natives and Chinese. Most of the Chinese are engaged in commerce. The city proper is a group of forts, convents, and administrative buildings. It is surrounded by lofty walls and connected with the commercial part of the community on the right bank of the Pasig by two fine bridges.

As a centre of trade it is admirably situated at the mouth of a navigable river and of an interior sea which insures it the products of a whole province. Upon the waters of the bay rides in time of peace a commercial fleet representing the nations of the whole world.

A canal connects Manila with the seaport towns on the other side of the island—the eastern side. In the narrows at the entrance of the bay is the volcanic island of Corregidor. During the southwest monsoon, when the tides are highest, ships of 500 tons can anchor in the mouth of the Pasig, under cover of a long jetty, while small warships can enter the cove of Cavite nine miles further down.

This cove is protected from the high tides by a long sand promontory called the hook.

Manila is very favorable situated for general commerce. It commands all the routes of the navigation between the Strait of Londe and the mouth of the Yangtse-Kiang. Lape-rause said of the city that its commercial location was the best in the world.

The principal exports of Manila are hemp, cigars, coffee, and sugar. The leading manufacture is cigars, which is a Government monopoly employing 20,000 workers of both sexes.

ATLANTA GA., May 11.

The second attempt to poison the infantry troops in camp here has just been unearthed. Arsenic has been detected in the supply of drinking water. The discovery was made before any serious results had occurred. It is thought there are Spanish spies hanging around the camp who are not only picking up all the points they can but are doing other little acts. It will be a bad day for the general if he is caught.

A Second Attempt to Poison Troops.

Reports just received that a Spanish torpedo boat destroyer was blown up, off the Coast of Gibraltar, this afternoon and all hands lost. This was evidently one of the boats that has been cruising near the straits looking for American yachts.

Spanish Torpedo Boat Sunk.

LONDON, May 11.—Two companies of the regular army landed in Cuba this morning; others will follow in double quick order. Everything is ready for the move and the men are enthusiastic at the prospect of at last being allowed to take an active part in the invasion of the island. It is estimated that there will be before the wet season sets in.

KEY WEST, May 11.—Two companies of the regular army landed in Cuba this morning; others will follow in double quick order. Everything is ready for the move and the men are enthusiastic at the prospect of at last being allowed to take an active part in the invasion of the island. It is estimated that there will be before the wet season sets in.

SHANGHAI, China, May 10.—Dispatches received here this morning, from Manila, are to the effect that Admiral Montojo, of the Spanish navy, has been killed by the residents of Manila. Admiral Montojo was one of the most prominent men in the navy.

It is to be regretted, if indeed it be true, as the Admiral fully demonstrated, in his recent fight with Dewey, that he was a brave officer. His conduct in battle has received the very highest praise from every American officer in the engagement. The act was evidently perpetrated by insurgents.

CASTORIA For Infants and Children. The Kind You Have Always Bought Bears the Signature of *Dr. H. W. Allen* Cuban Soldiers' Uniform.

The volunteer army boys express lively interest in the matter of what those who are sent, as a part of the invading army, to Cuba will wear. Here is an account of the uniform etc.

The clothing for a soldier in the army that will invade Cuba will cost about \$25 complete. For this expeditionary force suits of cool, well-like stuff will be furnished, and one of these will come to \$9. Each man must have a cape overcoat, which costs \$8; a campaign hat at \$1; a forage cap at 75 cents, and a pair of shoes at \$2.50, a flannel shirt at \$2 and two suits of underwear at \$2.50 each. In addition to these necessary articles he will have a rubber blanket, made in "Poncho" fashion, with a hole in the middle to put his head through. This costs the government \$1.40. He will be provided with only one blanket, in place of the customary two, because the climate is so warm; but this will be a very fine article of its kind, Uncle Sam paying \$2.83 for it. It would cost an ordinary citizen about \$6. The war department has advertised for 100,000 pairs of shoes.

VIENNA, May 10.—The Emperor has announced his intention to declare that all Austrain ports will be strictly neutral in the future. This move is looked upon as being a dead turn toward the United States.

LONDON, May 11.—The Evening Globe publishes this afternoon a special from Cadiz which says that the fleet which arrived yesterday will put to sea again today. No information as to its destination. Should it proceed to Manila it could reach there ahead of any reinforcements that we could send to Dewey. This would place him at a decided disadvantage, as his fleet is no match for the Cadiz squadron.

WASHINGTON, D. C., May 11.—The foreign Ambassadors, located at Washington, have under advisement the question of demanding of Spain that, "in the interest of humanity and the vast commercial interests of the world at large," she forthwith sue for peace. Give up Cuba and Porto Rico, and pay a heavy war indemnity to the United States. If she agrees promptly she may retain her sovereignty over the Philippines, the United States to keep possession until the indemnity is either paid or otherwise secured.

WASHINGTON, D. C., May 11.—The report has gotten out that the Flying Squadron, now stationed at Hampton Roads, will be sent to Havana, to take part in the bombardment of that place, while the land forces are

Massacring the Spaniards.

HONG KONG, May 10.—The fear, expressed in Dewey's first report, that the insurgents would break all bonds and murder the Spanish residents of Manila, is being fulfilled. Dispatches received here this morning say that the insurgents are massacring all Spaniards in Manila and that Dewey, by reason of the small force at his command is powerless to avert the catastrophe. He dares not leave his ships and to bombard the city would only add to the horrors of the situation.

The Insurgents have been massing around Manila for weeks, awaiting the coming of the American fleet before they attacked the Spanish forces, have taken advantage of the demoralization which followed the destruction of the Spanish fleet and forts, to fall upon their enemies and a scene which beggars description is in progress. The insurgents are resorting to the most barbarous acts of cruelty, seeking, as it appears, to avenge long years of oppression and wrong in a general slaughter of every human that can be called Spanish. As they hold all the territory outside of Manila, and all Spanish vessels have been sunk, there is no escape for the unfortunate people, who now, when it is too late, see how much better it would have been had they practiced a different course in the past.

Dewey has done all that he could to protect them but, owing to the conditions which surround him, he can do but little more than be a very unwilling witness of their destruction.

Admiral Montojo Assassinated.

SHANGHAI, China, May 10.—Dispatches received here this morning, from Manila, are to the effect that Admiral Montojo, of the Spanish navy, has been killed by the residents of Manila. Admiral Montojo was one of the most prominent men in the navy.

It is to be regretted, if indeed it be true, as the Admiral fully demonstrated, in his recent fight with Dewey, that he was a brave officer. His conduct in battle has received the very highest praise from every American officer in the engagement. The act was evidently perpetrated by insurgents.

FORMATION OF ARMY COMMANDS

Washington, May 9.—Orders were today sent by telegraph from the office of the Adjutant General of the army directing three Major Generals and eight Brigadier Generals to report to General Brooks at Camp George R. Thomas, at Chicamauga. The three Major Generals are Wilson, Lee and Wheeler, and the Brigadier Generals: Compton, Bort, Sumner, Snyder, Henry, Lawton, Chafee and Davis.

Their forces are to be mobilized in the Park, will be organized rapidly as possible into corps, divisions and brigades.

Major Generals Wilson, Lee and Wheeler will be assigned to division commands, probably, and the others to brigadier commands.

Among those to be sent to Chicamauga are one regiment of infantry from North Carolina, one infantry from Virginia, one infantry from Tennessee.

Thirty Transports Chartered.

WASHINGTON, May 10.—There does not seem to be much doubt now that troops will be landed in Cuba very soon, and in large numbers. The government has chartered thirty additional transports this afternoon to take troops to Cuba. The impression is gaining force that the War Department is about to make a decided move and that when they start it will be with enough troops to crush all opposition. It is more than probable that the report from Sampson's fleet and that from the invading army will reach us simultaneously.

Ayer's Pills are recommended by leading physicians and druggists, as the most prompt and efficient remedy for biliousness, nausea, costiveness, indigestion, sleeplessness of the liver, jaundice and sick headache; also, to relieve colds, fevers, neuralgia, and rheumatism.

ROME, May 11.—There are bloody riots in progress at Capua, Naara which is in the neighborhood of Milan where there have been serious outbreaks in progress for several days. The scenes enacted are terrible in the extreme. Above the shrieks of dying rise the wails of widows and orphans, the hoarse words of command, and the irresistible tramp of soldiers, mowed by the terrible boom of cannon.

Madrid, May 11.—Rioting was renewed here this morning. The populace has gone wild over the return of the Cape Verde fleet to Cadiz when it was expecting daily reports of an engagement with Sampson's ships. The people take this movement as an indication of the intention, on the part of the Government, to give up Cuba and Porto Rico and are wild as a consequence.

Sympathetic Husbands.

The sympathetic tenderness of a loving husband is everything to an expectant mother, especially during her first ordeal. George Layton, Esq., a prominent druggist of Dayton, O., gives the following case:

A customer of mine, whose wife had used four bottles of "Mother's Friend" before confinement, says, after seeing the effects of the remedy, that if she had to go through the ordeal again, and there were but four bottles on the market, and the cost was \$100 per bottle, she would have them.

"Mother's Friend" is a scientifically compounded liniment which affords certain relief in the various ailments preceding childbirth, and assures proper elasticity to the cords and muscles involved in the final ordeal.

"Mother's Friend" is sold by druggists, or expressed on receipt of one dollar.

Valuable book, "Before Baby is Born," mailed free on application.
