CAUSE AND EFFECT!

As, according to organic law, we see in nature around us the effect of its operation in all the departments, varied as they may be, so in the relation we sustain to the body politic, good citizenship will produce good results, and vice versa, bad citizenship will result in disorderly and mischievous consequences.

The object of life should be to do what we can to promote the health and virtuous character of the commonwealth.

The Great Teacher—when he came—taught to this end, saying, "Render unto Caesar the things that are his, &c."

Government can alone exist where the people believe in the supremacy of law and its maintenance. The Master stands forth pre-eminently as the greatest of teachers and why? Simply because of both the unselfish character and exhorting tendencies of His teachings.

He aimed at the conquest of the world in a far grander sense than that which controlled the actions of Alexander, Julius-Caesar, or Napoleon the 1st.

He aimed at the radical transformation of man, of revolutionizing their thoughts and feelings at giving human life a new character and loftier purpose; of lifting man out of the mud and mire into which he had fallen, and bringing him into intimate relation to all the commanding virtues which emanated and lay on the emerald glowing branches of His Ethical tree.

How apparently hopeless was the task Justice had fallen in the streets. Slavery was of the most degraded kind.

In proud imperial Rome, the offended or capricious patrician could make himself master of his bond servant, and cast him to the fishes—human sacrifices smoked on countless altars. Men of culture, even, were given up to every conceivable kind of profligacy, and poor suffering woman was degraded and brutalized, and yet such was the transforming character of His teachings, that in a little while the spirit of reform began to manifest itself, and its circle widened and deepened, as the people saw and felt its moral power.

Moral law manifests its virtue and power wherever and whenever any people take hold of it as a monitor and guide in the direction of obedience to law.

As the result of immigration, very often bad characters—the scum of demoralization—have come to our country under the impression that it is a "Do as you please country," so when the restraints of law have been applied, they have become restless and refractory and the consequences have been fruitful of evil.

On the other hand, while it is true that many a noble spirit from other lands has graced our shores and added to the dignity of our national character, yet many of the opposite stamp have contributed to the anarchy and social chaos that disturbs the peace of society, and threatens the subversion of all good government which has for its object the maintenance of law and order. Here we see exemplified in a fearful degree "cause and effect." This ought not to be, and must not be allowed.

We call upon all good citizens from every land and clime, that have come over to our country, to see to it that a stop be put to these evils, for if not checked it will not be long, ere, the sad and lamentable events will be upon us, that befell our happy France, when the Robespierians came down upon her.

The law must be, and God help us, all to say shall be, maintained in spirit and archly and lawlessness.

COL. GRANT AND THE NEGROES.

The nomination of Col. Fred Grant for Secretary of State by the Republicans of New York does not seem to please the colored people of that State if the colored editors give the facts. The Freeman, of New York and the Bee and Advertiser, of Washington City, are all opposed to his election. They say that he is no friend of the colored people and they cannot support him and retain their self-respect. His conduct when a student at West Point toward colored cadet Smith, of South Carolina, shows his opposition to the race, as does also his refusal to allow his father's colored coachman to drive the horse at General Grant's funeral. They further say that they oppose him "because we believe it bad policy to give the pre-eminence on the strength of his father's money and reputation. In this republic every tub must stand on its own bottom and if Colonel Fred Grant's tub has any bottom to it has done nothing to show that such is the case." The Freeman says "the colored voters of New York should not longer be deceived and imposed upon by the machinations of the Republican party. They will gain nothing by its success and less by its defeat. We are fighting for principle, and the Republican party of New York has had none of that comely sin: Senator Conkling was displaced from its leadership."

COMMISSIONER COLMAN says the new process of making sugar of sorghum will revolutionize the sugar industry, and in a few years make the United States entirely independent of foreign markets. As the work continues at Fort Scott and Rio Grande the sugar continues to improve in quantity and quality, and there seems to be no doubt that a genuine success has been achieved.

It is reported that the wives of the condemned Chicago Anarchists will kill themselves and their children if their husbands are executed. It wouldn't be a bad idea, if the theory of heredity is correct.

NEW YORK DEMOCRATS.

The Democratic Convention which met last week had a harmonious session which commenced by kicking out the organization known as the Irving Hall Democracy. The officers to be elected are Secretary of State, Treasurer, Attorney General and Comptroller. Interest has centered in the convention because it was believed that there might be a trial of strength between Governor Hill and President Cleveland preliminary to the coming year, it being thought that the Governor might then be a contestant for the delegation to the National Convention. But if some intimation was given of it, and no more movement toward that end has been observed. As New York is considered a pivotal State in national elections its declaration of "her principles" is a matter of general interest. It is declared that unnecessary taxation is unjust taxation and it demands that Federal taxation be reduced by a sum not less than one hundred millions, which is the amount of the annual surplus, and urge Congress to make this reduction at the same time leaving the result in the hands of a special invested and workingman's supply in American industries. The taxes to be reduced are: (1) the tax on the profits of corporations, (2) the tax on the income of individuals, (3) the tax on the inheritance, (4) the tax on the gift, (5) the tax on the estate, (6) the tax on the sale of real estate, (7) the tax on the sale of personal property, (8) the tax on the sale of stock, (9) the tax on the sale of bonds, (10) the tax on the sale of securities, (11)
