EXASPERATED TAX PAYER.—We have received, but thought best not to publish, a communication from "an exasperated tax payer," calling attention to several very objectionable conditions which exist in our town. Chief of them is the present condition of the streets and sidewalks. It is hoped that now that the crops are laid by, the authorities will see fit to have the grass and weeds cut from off the streets and sidewalks. The heavy rains of the summer, too, have produced many washouts which a little work could soon remedy. We should all take another pull and try to brighten up things a little as the crisp autumn days approach and nothing helps better in a town than nice, clean streets.

PROTRACTED MEETING BIGGINS AT PIERCE'S.—A series of revival meetings will begin at Pierce's Church, about five miles from Weldon, next Monday, August 17th. There will be two services each day and the people of that section are working for a most successful meeting.

BATTERIES.—For Shepherdstown, Sledge, Graham and Daniel; Weldon, Garner, Zollicoffer and Hancock.

RETURNING COMPANY K.—Co. K, Weldon Light Infantry, returned home yesterday morning from the annual encampment at Morehead City where the boys had a most delightful time. Owing to a wreck at Goldsboro some of the soldier boys were badly shaken up and Chief Dickens sustained injuries making it necessary to bring him home on a stretcher. Aside from this mishap the trip was pleasant.

AT THE BAPTIST CHURCH.—Prof. W. R. Cullon, of Wake Forest College, preached at the Baptist Church here Wednesday night of last week, making a fine impression upon all who heard him. DEAFNESS CANNOT BE CURED by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; none cases out of ten are cured by cathartics, which is something out of an inflamed condition of the mucous surfaces.
