SUFFERING FROM THE HOOK WORN

Campaign Soon to be Inaugurated in This county with the Ultimate Object of Curing Every Man, Woman and Child, who Has This Disease, and Other Diseases Resulting From Intestinal Parasites.

Examination, Medicine and Advice All Given Absolutely Free by State Specialist.

Everybody should come? Take advantage of this opportunity, while it lasts, and see if you have any of these diseases. If you have, medicines will be given you that will bring about a wonderful change in both your feeling and your health. Instead of being a tired, indolent and despondent kind of man you will be changed into one with a bright and active body and mind, who goes about his work with a rush and a vim, always finding pleasure in everything. FREE! Remember these Medical Dispensaries will be in Halifax county but tour weeks. Each one only open one day in the week. Below you will find both the dates and the places at which these free Medical Dispensaries will be open. Dr. Platt W. Covington, of the North Carolina Board of Health, assisted by Mr. Connor, State Microscopist, will be in attendance at each Dispensary.

A male hookworm (known as the American murderer-because a kills so many people), very such magnified under an instrument known as a microscope. See how as head is turned backcard, and how its tail is broadened into an umbrella like organ

This shows the head of a hookworm as the parasite is feeding, attached to the wall of the bowels

THE HOOKWORM DISEASE

This disease is one of the most uncient in medical HISTORY, history. Moses, no doubt, knew of this disease, for while the Israelites were encomped in the wilderness, he enforced cortain sanitary laws that, were they enforced today, they would absolutely "Corsets, sir," piped a. little prevent the spread of notonly the Hookworm disease but Typhoid and Cholera as well. In fact, there has been discovered in Thebes, Egypt, a medical book, the oldest on record, written one hundred years before the birth of Moses, and in this book the bookworm disease is described.

Twenty-one years not faced an aw- If has not been but a few years since it was first discovered and found of death," wotes H. B. Mavin, Port to be so prevalent in America. Before this it was thought that that large body of weak, delicate and pale people were so because of confiaddboked blood, successingle. Tried trons inherited at birth and could not be cured. Now, however, this is verything, I could be not not not my known not to be the case, that most of these people are so owing to the ough, and was under the Test doctor. Hookworm disease and can be cured.

PREVALENCE: About one-third of the people, all classes, old and young, have this disease.

DISTRIBUTION. Found chiefly in warm climates where the heat, sunlight and oxygen produces a condition that rapidly hatches the eggs most and hing ento. Its positively of this worm as they are deposited in the soil by those suffering with

MODE OF ENTRANCE. About 90 per cents of the cases begin as INTO THE BODY. ground itch, dew itch or too itch as it is varis-Nearly every business proposis ously called. The worms burrow through the skin on the foot and, in tion looks like a sure-winner-on-doing so, produce an inflammation that gives rise to this condition After penetrating the skin they get into the blood stream and are carried around to the upper part of the intesinnes, just below the stomach, which is their feeding grounds. Here they attach themselves to the lining of the intestines and begin to suck the life blood of the individual away. About 10 per cent, of the cases get into the body through contaminated drinking water, or by canng lettuce, strawberries and water cress that has been improperly washed.

SYMPTOMS. The majority of the cases, who have had the disease but a short while, have no noticeable symptoms. They constantly feel tired. Get up each morning feeling about as ured as on retiring the Love has enabled many a man night before. Get out of breath easily and often suffer from stomach troubles. Others, more severe cases, have a pale complexion, hair Oddly enough, the penny lunch and skin dry, palphanion of the heart and sometimes swelling of the feet and eyelids. Of course all degrees in modification of these symptoms may be seen.

> METHODS OF DIAGNOSING Three methods, first, by the symptoms THE DISEASE. 2nd, by a microscopical examination of the excreta in order to determine the presence of the eggs of the worms, and 3rd, by the benefit received from the treatment.

TREATMENT. This will absolutely cure every case. Is simply and in no way injurious or dangerous

Boy, 18 years of age, suffering from severe case of Hookworm infection. Growth greatly retarded, suffered from palpitation of heart and stomach trouble; gets out of

breath easily

Will cost you not one cent. The dates and places that these Dispensames will be open they will not run under any circumstances but for four weeks. Each one open but one day in the week.

That nearly one-half of the people of all ages have this disease. You are probably among the half that have it. Come and find out anyway, Both the county of Halifax and the State of North Carolina have appropriated funds for the carrying on of this work in this county.

A VICTIM OF HOOKWORM DISEASE DESCRIBES HIS FEELINGS. "HIS FEELINGS."

"I feel used all the time, almost, and get very fired easily, and have little or no energy. My spirits are low almost all of the time. I feel full after eating. My memory is poor.

"I feel that I am getting wealer. I have a disgust for fatty foods. I prefer being alone rather than to be in the company of others. I have no desire even to converse tete-a-tete with the ladies. After taking a walk, I feel broken down and tired all over, feel more like lying down than anything else. To ares me very much to stand any length of time, In the morning when getting up I feel need and broken down also.

inder these conditions I am not able to do justice to my work." (The patient describing his symptoms above is a male, age 19, and weighed 145 pounds. He was raised on a farm, had a ravenous appetite, was restless at night and oftened dreamed. He had had three or four attacks of ground-itch, one of them lasting eight months.-
