Better Farming in the South

TO USE FERTILIZERS MOST PROFITABLY

Fertilizers Supply One or More Plant Foods Without Which Crops Will Not Be Profitable.

The attention of every farmer to make the largest crop possible every year, and if he has any duty to make them when he can. But harvests of large crops remove large quantities of plant food from the soil. This decrease of plant food finally prevents good yields.

And unless some provision is made for restoring and then maintaining production, low yields and unprofitable returns will continue to be the result. One cannot draw money from a bank unless he has friends there. Neither can the plant draw upon the soil and get the necessary food elements if the soil does not contain them.

Plan For Good Yields Every Year

Every farmer should adopt for his land a system of farming that will give him good yields continually year after year. If this is done, he must feed the plants, for plants, like animals, must feed to grow. While plants require some ten or more elements for their growth, all except three are supplied in abundance in most soils. The three elements not supplied abundantly are nitrogen, phosphorus and potash. All these are generally deficient in most southern soils, and, therefore, have to be supplied in some commercial form to get profitable yields.

For a farmer to get the largest returns from his investment in fertilizers, it is necessary for him to know something of the conditions under which fertilizers may be used most effectively. He naturally asks: "Under what conditions will fertilizers prove most profitable?"

Fertilizers are used primarily to supply one or more plant foods without which crops will not be profitable. But there are conditions other than plant foods that may influence growth. It is very necessary that good growing

Included in this was a motion by Mrs. W. M. Cohen that instead of a picture, the club should present to the graded school a handsome U. S. flag, to be raised with appropriate exercises just in front of the school building. This was adopted unanimously and the committee instructed to purchase the flag and superintendent its presentation to the school as early as possible. ROOSEVELT ON THE MESSAGE

Mr. Roosevelt on his way home from Florida called at the White House to see Mr. Wilson. Not finding him he returned to the railway station, where he stood in a great crowd and made the following generous statement:

"The President's message is a great State paper which will rank in history among the great State papers of which Americans in future will be proud. It now rests with the people of the country to see that we put in practice the policy the President has outlined and that we strike as hard, and as effective as possible in aggressive war against the government of Germany. We must send troops to the firing line as rapidly as possible. Defensive war is hopeless. We must by vigorous offensive warfare win the right to have our voice count for civilization and justice when the time for peace comes."

PARALYSIS.

After staying in the hospital six weeks and trying several doctors including two specialists I found no relief. At the suggestion of a friend I began taking the Genuine Indian Blood Purifier. Before using this medicine I could scarcely go, now I can walk anywhere without crutches and the work that I do requires me to be in a standing position ten hours each day. This is what the Genuine Indian Blood Purifier did for me. I gladly recommend it to anyone suffering with similar afflictions.
