### NEW KNIFE CUTS CURVES

A new-cutting knife designed for the cutting of steel, wood, leather, all kinds of other material, says Popular Mechanics Magazine, has its sharp pointed blade secured in the handle, like a corkscrew, so that it will not slip out of the hand. This is a new type of knife, and the cutting is all done by the blade edge. In time the point becomes dull, but this does not matter, as long as the edge is kept sharp.

### WHOOPIING COUGH

This is a very dangerous disease, particularly in children under five years of age, but when it occurs, evidence of other organs is given, easily cured by giving Chamberlain's Cough Remedy. Most people believe that it must run its course, not knowing that the cure is very much shortened, and that there is little danger from the disease when this remedy is given. It has been used in many epidemics of whooping cough, with pronounced success. It is safe and pleasant to take.

Lumbago. This is a rheumatism of the muscles of the back. It comes on suddenly and is quite painful. Every movement aggravates the disease. Go to bed, keep quiet, and have Chamberlain's Liniment applied and a quick recovery may be expected. Mrs. J. J. Barr, Brookport, N. Y., writes: "I can honestly say that Chamberlain's Liniment cured me of lumbago a year ago last summer. When I began using it, I was flat on my back in bed and could not turn to the left or right. I had a bottle of Chamberlain's Liniment in the house and this was applied to my back. It promptly drove away the pain and aches."

E. L. HAYWARD,

### GOOD WORD FOR GWL

The common red eliminates the indigestible portion of the food by the mouth in the form of elongated pellets. These are found in great numbers about the mouth of birds, and their accumulation has the effect that the bird is prevented from eating a number of creatures whose destruction is directly beneficial to man, according to Hester Williams Company and other of Chicago, Ill.

It is reported that 200,000 pellets examined yielded the remains of 16 bats, three rats, 23 mice, 693 moles, 1,500 insects and 27 birds. Of the birds there were remains of 19 sparrows, one greenfinch and two swallows. These results were obtained from the common red, and show to what extent the bird is responsible for assisting in preserving the balance of nature.

### FRACTURE OF THE RADIUS

In one of the fractures of the radius, Dr. R. Klapp of Berlin applies strong traction to the thumb and fingers separately, and manipulates the fragments with the wrist held in a crescent-shaped iron stand. Then he applies for two or three weeks a plaster cast to the forearm and hand, leaving thumb and fingers free. In the Archiv fuer Klinische Chirurgie, Dr. F. Bunge analyzes 640 cases and extols the perfect results of Klapp's method.
