WOMEN TRADERS.

Women do the bulk of the tra ng in this country. Their purases run up into the millions of llars every month.

And when a woman starts out opping she generally knows hat she wants. Before leaving me she has studied her needs d her wants. She has read the wspapers in her home and has rmed definite ideas. She knows there bargains are to be found, if ere are any.

All this should be borne in mind merchants, in the larger as well in the smaller cities.

Women do the bulk of trading the family, and they go the ores that advertise. The way to t the trade of the women is to dvertise in the newspapers that into the homes.

The chamber of commerce decided that the community needed more diversity of production. It studied the situation and decided farmers owned only scrub carrie, but despite this the chamber went down to Kansas City and induced shipping stations in the Fort territory. The farmers were much surprised to find that they could get money for mllk which formerly had been used only as swill for

hogs. Then the chamber of commerce took its second step. It organized an excursion and took forty of its most progressive farmers to that part of Wisconsin where the dairy industry is most highly developed. It showed them just what first-class dairy farms and first-class dairy cattle were and how such an en-

terprise is properly operated. But the chamber did not stop here. It raised enough money to buy a train load of the best milk cows it could find in the United States, had them shipped to Fort Scott and sold to the farmers at cost, which was less than the price they would have had to pay if they had bought individually. Last year this community sold half a million dollars' worth of milk alone. That wealth would not have come to Fort Scott but for the sale of milk, The tallest man in the world has It will be spent among the business ing of 225 miles of improved roads, a thing that the farmers had Meekness is simply the silence formerly refused to finance.
