Since the recent storms, which have washed away the upper portions of the Chesil Beach, Portland, in England, searchers have been busily engaged in quest of treasure, which has been at imes revealed embedded in the blue clay, the West Bay having been the place where two treasure galleons went to pieces in the storm which succeeded the defeat of the Invincible Armada.

A plea often made for habitual efficeholders is that they are better able to perform public duties than are men new to such service. The new Massachusetts Legislature will have the opportunity to siderate of justice to the State and bonddisprove or confirm this theory. Only eleven out of forty Senators, and forty-six out of two hundred and forty members of the lower house have served previous terms.

Beecher is not cured yet. He said in a recent sermon. "There are feelings that cannot be expressed in words. When a man says to his chosen maiden, 'I love you,' do you suppose he tells the whole story?' It is a story that cannot be told. It is infinite, boundless, supreme, a stream forever flowing, and never flowing away. And there is a state in those that have gone to the height of divine life which is wordless. It cannot be told."

reat battles have been fought and impor tant sieges maintained; of which the details

tant sieges maintained; of which the details are as yet preserved only in the newspapers or in the trasient publications of the day, and which ought now to take their place in permanent and authentic history. In preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the lowest possible rates, and to furnish an ac-curate account of the most recent discoveries curate account of the most recent discoveries in science, of every frehs production in literaure, and of the newest inventions in the practical arts, as well as to give a succinct and original record of the progress political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a successful temination.

None of the original stereotype plates have been used, but every page has been printed on new type, forming, in fact, a new Cyclopædia, with the same plan and compass as its predesessor, but with a far greater pecun-iary expenditure, and with such improve-ment in its composition as have been suggest-edby longer experiencea nd enlarged know-ledge

The illustrations which are introduced for the first time in the present edition have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and natural history and depict the most famous and remarkable and depict the most famous and remarkable features of scenery, architecture and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence; the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopædia, and worthy of its high character. character.

This work is sold to subscribers only, pay-able on delivery of each volume. It will be completed in sixteen large octavo volumes. each containing about 800 pages, fully illus-trated with several thousand Wood Engrav-ings, and with numerous colored Lithograp-hicMaps.
