It is reported from the Vatican that l'ius IX. is about to name Monsigner Lavigeric, Archbishop of Algiers, a Cardinal. He will be the first Cardinal of Africa, as Dr. McCloskey was the first of America.

The Porte is displaying desperate carnestness in preparing for the closing scenes of this year's campaigh. Not only has it summoned 35,000 men from Bagdad, but it has also ordered a general levy, to include those who have hitherto "escaped the draft."

The whole number of pilgrims to Rome during the Pope's Episcopal Jubilce was less than was expected, being only 17,-210. The largest number from any one country was from France, six thousand. The United States sent five hundred. The gifts are estimated as high as millions of dollars.

He offers to give a large sum to pay for such labor at one dollar a day, and has found a seconder in Mr. B. P. Hutchinson, who will pay for five thousand days' work at this rate.

Vanderbilt's \$100,000 gift does not seem to have enthused the New York Central employees to any great extent. They complain that they haven't got it yet. Mr. Vanderbilt, however, explains the delay by saying that the time has been occupied in preparing a list of the faithful. The paymaster's car is expected September, and eight thousand men will about that time become richer if not bet-

The Ohio Democrats will open the State campaign, at Cleveland, on the 25th of August, Hon, Henry C. Payne having been selected to give the key-note at that point. At a meeting at Put-in-Bay, on Friday, of leading Ohio Democrats, it was resolved to make the campaign an aggressive one, and it is understood that Senator Thurman, Hon. George H. Pendleton, Gen. Ewing, and other leading Democrats, will start out on the hustings as soon as Mr.

change sustained by the East Indian Government on transactions in London for 1876-'77, as estimated in the budget, amounts to the enormous sum of \$10,675,-500. This loss is chiefly due to the derangement of the silver market, which has made exchange between India and London very unfavorable for the former. as far as possible the Indian Government has asked of Parliament the privilege of possibly sell their bills." In other words, in order to escape the loss arising from an unfavorable exchange, due principally to the depreciation of silver, the Indian Government proposes to issue treasury bills at times when the exchange is most unfavorable, instead of drawing upon India, and to take them up again with the proceeds of its council bills when the latter can be advantageously sold.

REPUDIATION.

The Raleigh Observer has lately had several very able articles on a subject which must come up for action, at some time or other, before the people of every Southern State, and that is the State indebtedness. The Observer's arguments are to us conclusive on the subject and the fact that a response to them has not yet been attempted by any paper in the State, is in itself a significant thing. We would de Ville of Brussels. A cascade will flow be glad to reproduce them in full, but cannet. It does not think the debt should Mr. A. H. Stephens is at Catoosa be paid or that it ever will be paid and cites ample authority in the proceedings of the Canby Convention to justify its assumptions.

Yet the Observer could go farther John A. Joyce, of whiskey ring notori- back than it does for authority and could tell the Northern bondholders, the shoddyites who grew fat upon the miseries and disasters of the South during the war, who at its close were responsible for the Canby Constitution, the disfranchisement of our best people, the placing in ill-gotten power the howling dervishes who fastened this debt upon us, and who afterwards themselves purchased our bonds at a mere song and are now clamoring for their payment, that one which goes back to the primal days of American freedom and for which we have the authority of the times of Washington and Adams and Jefferson and John Jay, all demi-gods in the estimation of the honest bondholders of to-day. We refer to the old Continental scrip which flooded the country at the time and much of which may still be found in existence and not one dollar of which, so far as we can learn. has ever been paid.

Yet we do not rest the right to repudiate on the action of others, even when those others are the fathers of the Republic, but upon a simple and plain construction The production of anthracite coal up to of justice, not only to the bondholders but August 4 is said to have been 11,713,000 to ourselves. If this State debt, so much tons, against 9,379,000 to the same date of which was saddled upon us without last year. The strikes are not likely to our connivance, without our consent and be of long continuance. They arise from without our knowledge, and for which the undoubted over supply of labor in the there is but little of benefit to show in the way of assets, is to be paid, it will bankrupt the State and the people, this generation and the next and the next. All Mr. Louis Wahl, a wealthy Chicago taxation is tyranny and the grossest of for a continuance of the public patronage so such tyramy is when the people are taxed to death to pay a debt which was contracted without their consent and from which they have derived no benefits. The talk of a loss of credit if it is not paid is simply stuff and nonsense and is not such as will frighten grown men. The reverse as a proposition is just as true. Repudiate and your credit is gone. Pay and bankrupt yourselves and your credit is gone. There is a horn to either dilemma and we imagine that the horn our people will take is the former; to hold onto the little the war and the bummers left them and to risk the credit part of the business. One thing we think to be just as certain as death and taxes, and that is that the to make the round of the road early in | present public debt of North Carolina will never be paid.

UNDEMOCRATIC DOCTRINE.

That is a queer idea expressed by our neighbor of the Star yesterday that "It is a paper's business to lead public sentiment and not to follow it." This, then, accounts for the milk in the cocoanut; this is the secret of the many queer things the Star has written of late. It is the will of the Star scribe that the people should laud Mr. Hayes and they must do so because the Star says that they must. But then-if this is really what our neighbor thinks, how is it that he sometimes flies so franti-Payne shall have fired off the opening cally from one point of the compass to the other? Why is it that his arguments are The New York street car companies are of the tangle-leg sort and trip him up so often? Is he trying to "lead public sentiment" or is he only trying to keep

We must confess that this doctrine has to us a queer ring and one not of this punch, a trick for which each conductor latitude. We have seen it crop out in papers published North of Mason and dollars per week which went to the ingen- Dixon's line but rarely below it and never ious knave who discovered it and acted as South of the James river. No, it is heresy to the understanding of its readers for a newspaper to make such a claim; there is too much of the one-man power in such a theory; it In order to escape this loss in the future is an insult to the intelligence of the people; it smacks too much of Radicalism when one man must do the thinking and issuing treasury bills to the amount of the others the voting. This is a free £12,500,000, "on the distinct understand- country in everything and it is expected ing that the power should only be used that every one has got sense enough to when the Indian Government could not think for himself. Let him read both sides of every question and then make up a verdict for himself without the dictation of anybody's organ. It is for the papers to present the arguments-they are the counsel in the case; it is for the people to decide and to pronounce the verdict-they are both judge and jury.

The French Exhibition of next year says the London World, will have some specially attractive features. There is to be a grand central avenue, in which the buildings allotted to the various nations are to terminate, the frontage of each re presenting some remarkable historical building of the country to which it is assigned. Thus the facade of the Belgian section will represent the splendid Hotel down from the Palace of the Trocadero, cross the Seine in conduits, and supply water for the nachinery of the Exhibition on the Champ de Mars. It will be surrounded by four colossal groups of statuary personifying by groups of animals the four quarters of the world. Europe has been entrusted to M. Cain, Africa to Fremiet, Asia to Jacquemart, and America to Rouillard.

# APPLETON'S AMERICAN CYCLOPAUIA

NEW REVISED EDITION.

Entirely rewritten by the ablest writers on every subject. Printed from new type, ond illustrated with Several Thousand

Engravings and Maps
The work originally published under the itle of THE NEW AMERICAN CYLCOPA DIA was completed in 1873, since which time the wide circulation which it has attained in all parts of the United States and the signal developments which have taken place in every brance of science, literattre, and art, have induced the editor and publisher to submit it to an exact and thorough revision, and to issue a new edition entitled THE AMERICAN CYCLOPÆDIA.

Within the last ten years the progress of liscovery in every department of knowledge has made a new work of reference an imperative want.

The movement of political affairs have kept pace with the discoveries of science and their fruitful application to the industrial and useful arts and the convenience and retinement of social life. Great wars, and consequent revolutions have occurred, involving national changes of peculiar moment The civil war of our country, which was at its height when the last volume of the old work appeared, has happily ended, and a new course of commercial and industrial activity has been commenced. Large accessions to onr geographical knowledge have been made by the indetati-

gable explorer of Africa. The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars Great battles have been fought and important sieges maintained; of which the details are as yet preserved only in the newspapers or in the trasient publications of the day, and which ought now to take their place in

permanent and authentic history. IIn preparing the present edition for the press, it has accordingly been the aim of the editors to bring down the information to the lowest possible rates, and to furnish an accurate account f the most recent discoveries in science, of every frehs production in literaure, and of the newest inventions in the practical arts, as well as to give a succinc and original record of the progress political and historical events.

The work has been begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a succ. ssful temination.

None of the original stereotype plates have been used, but every page has been printed on new type, forming, in fact, a new Cyclopædia, with the same plan and compass as its predesessor, but with a far greater pecuniary expenditure, and with such improvement in its composition as have been suggest-

the first time in the present edition nave been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and natural history. and depict the most famous and remarkable features of scenery, architecture and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence; the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopædia, and worthy of its high
