### LATEST NEWS.

War. GALVESTON, Oct 1 .- The latest specials from the Rio Grande give no information of a collision between the Mexican and Federal troops, although it is thought that Shafter and Bullis have had an engagement with Indians on Mexican soil. Reinforcements have been sent to Shafter. There are now eight companies of United States troops on the Mexican side of the river. Gen. Falcon, commanding the Mexican forces at Piedras-Negras, has ordered his officers to keep on the trail of the Americans until they recross the river. A special despatch to the News from Fort Clark says Col. Shafter crossed the Rio Grande yesterday with 600 men and two Gatling gans to extricate Bul'is from his dangerous position. One thousand Mexicens left Piedras-Niegras, Saragossa, and Ville Nueva to-day, their destination being unknown.

#### How the Old District Ring Hope to Renew their Plundering.

WASHINGTON, Oct. 1 .- Sundry developments to-day leave no doubt that the old District Ring, and very little outside of the old District Ring, stands behind he present management of the National Republican. # Foreign News.

London, October 2-The Paris correspondent of the Times telegraphs: "It was rumored last night that the Duke de Broglie and M. Berthau bad resigned from the French cabinet. This report for the present, at least, is unfounded, but the alarm which it created was very remarkable. The apprehension of a forcible coup d'etat by the government is so great here that the resignation of the Duke de Broglie and certain of his colleagues, who are known to be opposed to such measures, would be considered as a preface to the violation of law, though it is hard to tell in whose interests such a violation would be. I know, from a perfectly trustworthy source, that the Empress disapproves of the government's course since the 16th of May last. The Prince Imperial is also said to have lately expressed a similar disapproval at an interview. He declared he would not throw impediments

LONDON, Oct. 3-The Times' Madras correspondent reviewing the actual effects in the Residency of the famine and the diseases consequent on the famine, says: "The registered deaths of the present year, up to the end of June, were 370,000 above the average. This, according to the opinion of the district officers, does not represent more than two-th rds of the actual mortallity, and we have further to add the deaths which have occurred since and have not yet been offic ally reported." The correspondent's conclusion is that not less than 750,000 persons have fallen victims, and even these figures will probably be largely increased before the famine and its after-wave of suffering have finally passed away.
