HOPE FOR ALL.

Consumption is generally supposed to be an incurable disease. Why? Because medical men, who of all others should have been the last to encourage such an unphilosophical and dangerous a sumption, have insisted upon and propagated it with a persistency which seems almost incredible in the light of science and of truth. We used the term 'dangerous' advisedly, for what can be more depressing and injurious to the consumptive than brooding over the idea-founded solely upon the fiat of his physician -that his malady is mortal, and that the utmost that can be done for him is to reader his exit from this would as easy as possible. Such melancholy and hopeless reflections as this belief engenders among consumptive patients, does as much, if not more, to hasten their departure for the land of shadows, as the tubercles in their lungs. Away with such a hopeless theory. Itappily the GREAT MASIERS OF MEDICINE have entered their protest against it and confuted by the most positive testimony the monstrous failury. Dangerous as pu-monary phthisis is, its terrible ravages may be stayed and the lungs restored to a sound condition even after suppuration has taken place. Every experienced surgeon knows that post mortem examinations of aged persons who have died in the ordinary course of nature have repeatedly disclosed the traces of pulmonary ulcers entirely cicatrized. The argument, therefore, against the possibility of healing a pulmonary abscess because the immediate seat of the disease cannot be reached, has not a leg to stand upon. Over fifty instances of the disself would master him. The transcendant merit of Holloway's COUGH CURE AND LUNG BAISAM is the thoroughness with which it does its work. Its immense superiority to the multitude of offi-

In the wonderful medicine to which the afflicted are above directed for relief, the discoverer believes he has combined in harmony more of Nature's sovereign curative properties, which God has instilled into the vegetable kingdom for healing the sick, than were ever before combined in one medicine. The evidence of this fact is found in the great variety of most obstinate diseases which it has been found to conquer. In the cure of Bronchitis, Severe Coughs, and the early stages of Consumption, it has astonished the medical faculty, and eminent physicians pronounce it the greatest medical discovery of the age. While it cures the severest Coughs, it attentions the severest Coughs it attentions the severest coughs. est Coughs, it strengthens the system and purifies the blood. By its great and thorough blood-purifying properties, it cures all Humors, from the worst Scrofula to a common Blotch, Pimple, or Eruption. Mercurial disease, Mineral Poisons, and their effects, are eradicated, and vigorous health and a sound constitution and blood. constitution established. Erysipelas, Saltrheum, Fever Sores, Scaly or Rough Skin, in short, all the numerous diseases caused by bad blood, are conquered by this powerful, purifying, and invigorating medicine.

If you feel dull, drowsy, debilitated, have sallow color of skin, or yellowish brown spots on face or body, frequent headache or dizziness, bad taste in mouth, internal heat or chills alternated with hot flushes, low spirits, and gloomy forebodings, irregular appetite, and tongue coated, you are suffering from Torpid Liver, or "Hillousness." In many cases of "Liver Complaint" only part of these symptoms are experienced. As a remedy for all such cases, Dr. Pierce's Golden Medical Discovery has no equal, as it effects perfect cures, leaving the liver strengthened and healthy.

This instrument is especially designed for the perfect application of

DR. SAGE'S CATARRH REMEDY

It is the only form of instrument yet invented with which fluid medicine can be carried high with which fitted medicine can be carried high up and perfectly applied to all parts of the affect-ed nasal passages, and the chambers or cavities communicating therewith, in which sores and ulcers frequently exist, and from which the ca-tarrhal discharge generally proceeds. The want of success in treating Catarrh heretofore has arisen largely from the impossibility of applying remedies to these cavities and chambers by any of the ordinary methods. This obstacle in the way of effecting cures is entirely overcome by the invention of the Douche. Its use is pleasant and so simple that a child can understand it. Full and explicit directions accompany each instrument. When used with this instrument, Dr. Sage's Catarrh Remedy cures recent attacks of "Cold in the Head" by a few applications.

APPLETON'S AMERICAN CYCLOPÆDIA

NEW REVISED EDITION.

Entirely rewritten by the ablest writers on every subject. Printed from new type, ond illustrated with Several Thousand

Engravings and Maps The work originally published under the title of THE NEW AMERICAN CYLCOPÆ DIA was completed in 1873, since which time the wide circulation which it has attained in all parts of the United States and the signal developments which have taken place in every brance of science, literattre, and art, have induced the editor and publisher to submit it to an exact and thorough revision, and to issue a new edition entitled THE AMERICAN CYCLOPÆDIA.

Within the last ten years the progress of discovery in every department of knowledge has made a new work of reference an imperative want.

The movement of political affairs have kept pace with the discoveries of science and their fruitful application to the industrial and useful arts and the convenience and refinement of social life. Great wars, and consequent revolutions have occurred, involving national changes of peculiar moment. The civil war of our country, which was at its height when the last volume of the old work appeared, has happily ended, and a new course of commercial and industrial activity has been commenced.

Large accessions to onr geographical knowledge have been made by the indefati-

gable explorer of Atrica. The great political revolutions of the last decade, with the natural result of the lapse of time, have brought into public view a multitude of new men, whose names are in every one's mouth, and of whose lives every one is curious to know the particulars Great battles have been fought and impor-tant sieges maintained; of which the details are as yet preserved only in the newspapers or in the trasient publications of the day, and which ought now to take their place in permanent and authentic history.

141n preparing the present edition for the press it has accordingly been the aim of the press, it has accordingly been the aim of the editors to bring down the information to the lowest possible rates, and to furnish an ac-

curate account f the most recent discoveries in science, of every frehs production in literaure, and of the newest inventions in the practical arts, as well as to give a succinct and original record of the progress political and historical events.

The work _asbeen begun after long and careful preliminary labor, and with the most ample resources for carrying it on to a suc-

c. ssful temination.

None of the original stereotype plates have been used, but every page has been printed on new type, forming, in fact, a new Cyclopædia, with the same plan and compass as its predesessor, but with a fargreater pecuniary expenditure, and with such improve-ment in its composition as have been suggestedby longer experiencea nd enlarged know-

The illustrations which are introduced for the first time in the present edition have been added not for the sake of pictorial effect, but to give greater lucidity and force to the explanations in the text. They embrace all branches of science and natural history, and depict the most famous and remarkable features of scenery, architecture and art, as well as the various processes of mechanics and manufactures. Although intended for instruction rather than embellishment, no pains have been spared to insure their artistic excellence; the cost of their execution is enormous, and it is believed they will find a welcome reception as an admirable feature of the Cyclopædia, and worthy of its high aboracier.

This work is sold to subscribers only, payable on delivery of each volume. It will be completed in sixteen large octavo volumes, each containing about 800 pages, fully illus-trated with several thousand Wood Engravngs, and with numerous colored Lithograp

hicMaps. Price and Style of Binding In extra Clotn, per vol. \$5 00; In Library Leather, per vol. \$6 00; In Half Turkey Mo-roco, per vol. \$7 00; In Half Russia, extra gilt, per vol. \$8 00; In Full Moroco, antique, gilt per vol. \$8 00; In Full Moroco, antique,
