tracts.
Saxton's—Summer Clothing.

Mr. Henry Nutt writes to the Raleigh
Observer an interesting description of the
closing of New Inlet.

The steam tug *Estion* is on the dry
dock South of Messrs. Northrop & Cam-
pling's saw mill, undergoing repairs.

Several of our exchanges insist upon it
that Saturday, the 21st, was the longest
day in the year, but don't tell us what al-
manac they studied in.

The deeds of the Smithvillians are good
for they prefer light to darkness. Several
street lamps have been put up and more
are ordered for the town.

Mayor Fishblate having received a
signal call North left this morning on
the 7.10 train. Alderman Flanner will
wear the dignity until Mr. Fishblate's
return.

Two insolent little rascals of the colored
persuasion, Joseph Harris and William
Weston by name, were arrested this
morning and carried up to the City Hall
for attacking Mr. W. H. Northrop's little
daughter. They gave bonds for their
appearance until to-morrow morning.

Unmailable.
Postal matter to the following addresses
remains in the Post Office in this city:
Mrs S. M. Chaffin, care Mr. R. W.
Chaffin, Bennettsville, S. C.; W. S. Walker,
155 Meadow street, Frankford, Penn.; Z.
London, Simcoe, Canada; one buff envel-
ope, no address.

The Monroe Enquirer.
The issue for the present week of the
Monroe Enquirer begins the seventh
volume of that excellent paper. Bro. Wolfe
refers with pardonable pride to the
great success he has attained during the
past six years and to the promises which
the future holds out for him. We congratulate
him upon his past and wish for him a
continuance of his well-deserved success.

Indications.
WAR DEPARTMENT.
Office of the Chief Signal Officer,
Washington, D. C., June 23, 1879.
For the South Atlantic States, Southeast to
S. W. winds, stationary temperature,
partly cloudy weather, occasional local
rains, stationary followed by rising bar-
ometer.

The Regatta.
As we go to press the last regatta of the
season in the river is being sailed. The
start was made very close on 4 o'clock.
The boats entered are the *Rosa*, *Lizzie*,
Gipsy and *Ripple*. The wind is light
and the time will be prolonged and we
will therefore defer our report until to-
morrow.

City Court.
Alderman Flanner, Mayor pro temp.,
presiding.
Chas. H. Davis, colored, being very
much overcome on Saturday night, besides
having his wits rather clouded by a too
free use of alcoholic stimulants opened
the private gate of a gentleman on Dock
street and walking into the yard threw
himself upon the grass for a snooze, sup-
posing all the time that he was resting
under his own vine and fig tree in another
part of the city. The result was that the
proprietor's cows, finding the gate open,
walked out and the gentleman's family,
who are used to indulging in cream and
milk at breakfast, had for the nonce to go
without their luxuries, and the invader
of the premises found himself locked up in
the Guara House this morning. There
being no prosecution, judgment was sus-
pended and the defendant released.

Judy Ann Hunter, colored, who inhabits
Paddy's Hollow, was arrested yesterday
(Sunday) for drunkenness and disorderly
conduct. The Mayor concluded to give
her a rest of five days in the city prison
and she went below.

Carelessness in Mailing Letters.
Every day or two we have a list of
letters to publish, marked as 'unmailable,'
which are held for postage or because
they are not properly addressed. A lit-
tle care in this particular would avoid
delay and oftentimes obviate much an-
noyance. In the list published in this
issue two are without any stamps, and
one, directed to a Canadian town, while it
has the requisite number of stamps for
anywhere in the United States, needs one
more to take it to its destination. All
letters directed to a point outside of this
country are required to be fully prepaid
before they can be sent.

A Colored boy Drowned.
Henry, a boy of twelve years of age,
son of Alex. Price, colored, was sent by
his mother on last Thursday afternoon to
Messrs. Colville & Co's mill for a turn o'
wood. The wood he procured and placed
on the sidewalk near Mr. John. Kull's
store at the foot of Walnut street, and then
started towards the mill in the direction
of the river again. This was the last
seen of the boy until yesterday morning
his body arose in the river at the foot of
Chestnut street. Two colored men on a
flat near by caught the body and secured
it until the Coroner was notified, who
straightway impanelled a jury of inquest.
As there were no marks of violence on the
body and no witness from whom any
facts could be elicited beyond those
stated above, the jury rendered a verdict
of supposed accidental drowning.

Stand Firm Under.
At the Wilmington & Weldon Railroad
machine shops in this city, a force of
hands is employed in putting in the
foundation for, and putting in position,
the anvil to be used in connection with
a mammoth steam hammer which has
just been procured by the Company to be
used in forging the heavy iron work.
The anvil weighs 20,000 pounds, and is
placed upon a foundation in which 400
cubic feet of rock and 4,000 feet of lumber
have been used to give stability to the
immense weight and to resist the force of
the blows. The hammer weighs 3,000
pounds, yet the machinery by which it
moves is so nicely and delicately adjusted
that a filbert may be cracked by it with-
out injury to the kernel, or a blow may
be given of almost incalculable force.
The anvil and hammer, with the machin-
ery for the same, are from the manufac-
tury of Messrs. Benet & Sons, of
Philadelphia, and will probably be in
working order in a few days.

Causes of Diphtheria.
As a matter of interest at this time,
and in view of the fact that the Board
of Health have inaugurated a determined
attack on all enemies of the public health
we quote the following from Dr. Snow,
an eminent physician and registrar of the
city of Providence, R. I., in his last re-
port:

In connection with this subject I think
it my duty to ask the attention of the
people of Providence, and especially of
parents, to the following statements:
1. No case of diphtheria occurs with-
out an adequate cause. This is self-
evident.
2. The cause of nearly all cases of the
disease exists in the houses or premises,
or within a few feet of the houses where
the cases occur.
3. The cause of nearly all cases that
occur in the city is breathing impure air
from privy vaults or sink drains or
cesspools, or drinking impure water.
Much observation and long-continued
and careful investigation have perfectly
satisfied me of the truth of these propo-
sitions, and they are applicable to all cases,
whether in the tenements of the poor or
in the mansions of the rich.

The Fire this Morning.
About 3 o'clock this morning the
alarm of fire was sounded, indicating a
conflagration in the First Fire District.
It was occasioned by the burning of two
small wooden buildings, on the corner of
Third and Bladen streets, belonging to
William K. Hogg, a colored man. The
buildings were near together, and one
was used as a kitchen, while the other
was unoccupied save as a storeroom.
This latter had been recently rented,
but the tenant had not yet taken posses-
sion. It was in this that the fire origi-
nated, but as there had been no fire in the
building since last Friday, it was without
doubt the work of an incendiary. There
was insurance to the amount of \$200 on
the property, which will probably cover
the loss. Very fortunately it was a still
night, or quite a number of buildings,
which are there huddled closely together,
would have been destroyed.

Pass Him Around, Brethren!
We learn from the *Plant* that a dis-
honest jeweler, giving his name as Nelson,
recently walked out of Durham with sev-
eral watches and some jewelry belonging
to the citizens of that place. The same
chap has been operating in this portion
of the county. During the month of
April he 'set up shop' in Smithville and
walked off from there with watches and
jewelry. He gave his name as J. J.
Nelson, but his mail came directed to P.
Ivey. He claims to be a French Cana-
dian and stated that he had been in jail in
South Carolina for murder, but that he
was the victim of 'the fellow who looks
like me' and was released. It is the im-
pression of those who saw him that if he
had been in jail he cut his way out,
as he was always telling how easy it was
to effect an escape by the means of a
piece of watch spring from any jail, and
said he always carried a piece with him.
He told big yarns, and stated that he had
challenged a man in Georgia, and for that
reason had changed his name. He eagerly
scanned every paper he could lay his
hands on and seemed to be looking for
something.

He was well versed in Biblical matters
and seemed to take a deep interest in
Sunday Schools, prayer meetings etc.
The general impression conveyed by him
upon the minds of intelligent people was
that he was a most consummate fraud and
hypocrite. It would be well for persons
to be on their guard, and hunt the pious
fraud down.

**The Closing of the Inlet—Let us Have
a Public Demonstration.**

Now that a due appreciation on the
part of our citizens has been acknowledged
in a proper manner by a meeting called
for that purpose, of the important part
that our esteemed fellow-citizen, Henry
Nutt, Esq., has taken in the great work of
River and Bar improvements, would it not
be a wise and proper move also for our
merchants and citizens generally to make
some public demonstration of the impor-
tant event which has lately transpired,
viz: the closing of New Inlet? That
the closing of this Inlet is an important
work towards the commercial prosperity of
this city, the testimony of every scientific
engineer who has ever made a government
survey of this coast and river will bear
witness. Among the first to declare this
opinion was the eminent United States
officer of the Engineer Corps, who visited
this city many years ago, and was the guest
of the late P. K. Dickinson, Esq. We allude
to Professor Baché.

This gentleman ventured the opinion
that unless the New Inlet was closed we
would eventually be without a bar alto-
gether. But our purpose in this article
was simply to suggest the propriety of
some public demonstration in honor of
the completion of such an important
undertaking, and we would further suggest
that it should not be simply a local
demonstration but let it be State wide.
A gentleman of this city, a member of
a prominent Water street firm, who has
just returned from Raleigh, says that
during his recent visit to the Capital he
had numerous inquiries propounded to
him by persons from every section of the
State in regard to this great event, the
closing of the Inlet. It was something
that no one in other portions of the State
had expected or looked for. His Excel-
lency, Gov. Jarvis, we also understand
thinks that some demonstration ought to
be made, and signified his willingness to
attend at any time, and so did other
prominent officials of the State, among them
Col. Wm. Johnston, of Charlotte, Presi-
dent of the State Board of Public Works.

Here is an opportunity offered for our
citizens to bring together the representa-
tives from every section of the State to
our own doors. People from the moun-
tains and our extreme Northern and
Western borders, who have so far shown
no community of interest with this sec-
tion, may come and bring their sisters and
their cousins and their aunts. There is
an intimation in the inquiries made by
gentlemen from other parts of the
State that they are really beginning to
realize the fact that Wilmington is within
the boundaries of North Carolina, and a
demonstration of the kind mentioned may
be the beginning of an awakening on the
part of North Carolinians everywhere to a
little more State pride, which may culmi-
nate in a little more patronage of our
home institutions instead of visiting the
commercial ports of our neighbors on the
North and to the South of us. Who
among our citizens will be the first to
move in this matter of a public State
demonstration, of rejoicing over the long
wished for closing of New Inlet?

Go West, Old Man!
We invite attention to the advertise-
ment of Mr. F. W. Clark, General
Passenger Agent, relative to the two
routes now open to Western North
Carolina via the Carolina Central Railway.
You can go either by Statesville or Spar-
tanburg. By the latter route it is only
twenty-four hours between Wilmington
and Asheville.

Off For Europe.
Mr. A. Shrier, of this city, one of our
most enterprising merchants, leaves here
tomorrow morning for New York, where
he will sail in a few days for Europe.
Mrs. Shrier is now on a visit to her
parents in Bremerhaven and Mr. S. will
join her there, when after a few weeks
passed with old friends they will together
visit many prominent cities of Europe
and probably go as far South as Rome.
They will return to this country in
September when Mr. Shrier will stop in
New York to make his Fall purchases.

Walked Overboard.
Saturday night about 11 o'clock, a man who
had been indulging in too much of the
juice of the Hollow made a narrow escape
from death by drowning. It is thought
that the inebriate turned down Chestnut
from Water street, thinking that he was
heading for Front street. He walked off
the wharf into the river and as he went
under Mr. John T. Flowers, the watch-
man on the wharf of the New York and
Wilmington Steamship Company, heard
his cry for help and saw about a hundred
yards when he ran the man and hooked
him out with a stick. The steamship's
watchman came to Mr. Flowers' assist-
ance and the two pulled the man out.

Soap as a Board of Health.
Those who are at all afraid of epi-
demic disease may feel comforted on
hearing that one of the best protective
measures they can resort to is a very
simple one—the use of soap and water.
An eminent physician says:

It is worth while for common people
to learn that 50,000 typhus germs will
thrive in the circumference of a pin-
head or a visible globule. It is worth
while for them to note that these
germs may be disseminated and be borne
like little seeds, everywhere, and
like demagogical politicians, may jump
noiselessly down any throat. But there
are certain things spores cannot stand,
according to the latest ascertained re-
sults of science. A water temperature
of 120 degrees is to them to death,
and soap chemically poisonous them.
Here sanitary and microscopic science
come together. Spores thrive in low
ground and under low conditions of
life. For redemption, fly to hot water
and soap, ye who live in danger of ma-
larial poisoning. Hot water is sanitary.
Soap is more sanitary. Fight
typhus, smallpox, yellow fever and
ague with soap. Soap is a board of
health.

Keep the Dwelling-house Dry.

A warm and dry atmosphere is not un-
wholesome, but when cloudy or rainy
weather brings a sultry air which damp-
ens everything around us, the atmosphere
may be loaded with the germs of disease,
and fire is needed to destroy them. The
walls, the ceilings and floors of apartments,
should never be allowed to become damp.
Sometimes, when the warmth of the air
is oppressive, fire is more necessary to
preserve health than it is at another sea-
son to protect us from the cold of
winter, and the rooms of a dwelling
should never be left without the means
of warming and drying. Investigations
have shown that some of the most fatal
diseases are caused by the germs of vege-
table and animal life, and that a humid
atmosphere is most favorable to their pro-
pagation. It is, therefore, but prudent
to avail ourselves of the great discoveries
of the age, and to protect ourselves
from scourges which so fearfully afflict
when we ignore the dangers around us.
Apartments exposed to the full action of
the sun may be less comfortable in hot
weather than those from which the sun's
rays are excluded, but they are more
wholesome, and when contagious diseases
prevail in closely built cities, it is found
that the inmates of houses on that side
of the street exposed to the sun are less
liable to be attacked, while the greatest
number of sick are always found where
there is the least exposure to the great
disinfectant—the sun.

Flavoring Extracts.
LEMON, Vanilla, Almond, Strawberry, Orange.
Raspberry, Banana, Pine Apple.
Warranted Pure. For sale by
