VIEWS AND REVIEWS.

The boring at the French end of th proposed tunnel under the English Channel to ascertain the necessary depth has been suspended for three months on 'account of the quantity of fresh water encountered. The soil is clayey and very hard.

Dr. Cog Fy, a Chinese physician of San Francisco at a recent inquest in the case of a Chinaman, was asked, 'How many lungs has a man?' He replied: 'Seven.' - Dr Cog Fy further stated that there are five holes in the human heart, and that the function of the heart is 'to catch air.'

Lynchburg Virginian: We copied from an exchange, a report of the resignation of Gen. Lee, of the presidency of Washington and Lee University. We are now authorized by a member of the Board of Visitors to say that the report is unfounded. We are gratified to know that Gen. Lee has intimated no such pur pose.

Gen. Merten, ex-Minister of War of France, who disappeared eight months ago, being supposed to have committed suicide. or to have been murdered, has just rejoined his family as suddenly as he left it. The death of his son so preyed upon him that he went into a Trappist monastery, and there stayed till he recovered his mental equilibrium.

The debts of the lately deposed Khedive have a face [total of \$460,000,000, but it. the prosecution of this great work. In estimated that he received not more than order to obtain a greater depth of water \$230,000,600, the rest being swallowed up at the bar it was thought necessary first in commissions and the lowness of the price at which the loans were floated. It was the work of the usurer, often insidu ous, that undermined the throne of Ismail

On Saturday last at daybreak, 3,000 men went to work changing the gauge of the St. Louis, Iron Mountain and Southern railway, and before night . the entire line, extending from St. Louis to Texarkana, nearly 700 miles, had been changed from 5 feet to the standard gauge of 4 feet 81 inches. The locomotives and cars having already been altered, traffic under the new order of things will proceed without hindrance.

A number of old Spanish silver coins, says the Charleston News and Courier, have been recently found by the phosphate diggers in Stono River. Many of them are completely defaced and half eaten away by the action of the water. One of the coins, which is partly decipherable, bears the inscription 'Rex Carolus, 1720.' A rumor has gained credence that these coins are a part of the treasure buried by Capt. Kidd, and the negroes are wild on the

There is a restoration of mutual confidence, says the Charleston News, between Senator B. H. Hill and Congressman Stephens, A common friend conveyed to each what kind words were said of him by the other. When Stephens lauded Hill's recent speeches, Hill was moved and approached Stephens, shook him by the hand and addressed him most cordially. They had not spoken to each other before in five years. Stephens was moved likewise. Tableau!

Not far from the Ameer's palace in Cabul there is and long has been an American church in which Christian worship has been permitted undisturbed through the many civil qhanges and disturbances that have taken place in that mington, so naturally should our procity. The number of the Christians was formerly considerable, but at present there are not more than twelve. On week days prise that entitles them to the patronage of of late they have been worshipping according to the Persian version of the English Prayer Book.

Mr. Gladstone still pursues theology. At the present moment he is writing an article for the Dissenters' organ, the British Quarterly, on the 'Decay of Evangelicalism in the Church of Eng- sessed value of their property in that city. land.' It is said that it will be a kind of continuation of some articles he wrote about two years ago on the current of religious thought. It will be curious to see what relation Mr. Gladstone-ecclesiastically and theologically a son of the Oxford movement-will adopt toward the Low Churchism with which during a great

part of his life he was out of sympathy.

The Curator of the St. Petersburg side in, "our goodly city by the sea." Scholastic District has issued a circular to the principals of the different schools, regulating the dress and behavoir of their pupils. The latter are enjoined to remove their kepis before the Emperor, any member of the Imperial family, the Minister, of Public Instruction, Governor-Generals, priest and other persons in authority. The scholars are further forbidden to use tobacco or to go to masquerades, clubs cafes or public gardens. Each is also required to show a ticket establishing his identity when called upon to do so.

The suggestion submitted by us some two weeks ago, relative to a proper celebration of the closing of New Inlet, has met with considerable endorsement and we hope that the suggestion may be carried out to a practical demonstration. The Chatham Record, published at Pittsboro, and in the midst of a country which is naturally tributary to Wilmington, but which is forced to seek an outlet elsewhere, endorses most warmly the suggestion made by us. Our neighbor's ar ticle is somewhat lengthy, but of an interest fully proportioned to its length, and we make no hesitation in publishing it here entire, as an evidence of the interes, felt by the Editor of that paper, and of the people he represents, in all that concerns the prosperity and commercial well-being

of Wilmington. The Record says: The recent successful closing of the New Inlet, near the mouth of the Cape Fear River, (heretofore announced in the Record,) deserves more than a passing notice. If the results anticipated are realized, in improving the Bar at the mouth of that river, then the successful completion of this most important part of that great work is a matter affecting not only the local interests of Wilmington but a large portion of North Carolina, We think, therefore, the suggestion the DAHLY REVIEW most timely, that so important an event should be duly cele brated.

In order that our readers may know something about the improvements in progress near the mouth of the Cape Fear, and the benefits to be derived therefrom, we will briefly allude to them .

On account of the shallowness of the water over the bar at the river's mouth the port of Wilmington is closed to vessels of bery large tonnage and great depth of draught. And so long as that continues, so long will the growth of that city be retarded. To remedy this has been the endeavor of the citizens of that city for many long years. Finally about ten years ago, the General Government began to lend a helping hand, and time and again has made liberal appropriations for to close the New Inlet. This is an inlet, a few miles above the mouth of the river, made more than a century ago by a very vielent storm which lashed the ocean into such fury as to break through the narrow sand bank separating it from the river. As years passed by and other storms came, this breach was widened and formed such an inlet as to very materially diminish the volume of water in the river below. Previous to this storm and breach the depth of water at the mouth of river was several feet greater than it has been since, so that it was natural to think that the closing of this breach (called the New Inlet) would force the water of the river to flow on to its mouth, and thus by concentrating it in a smaller channel would increase its volume, and restore its ancient Edepth at the mouth. The closing of this inlet has been the work of several years and has several hundred thousand dollars, and its successful compleshould be duly celebrated If the proper depth of water is obtained, and vessels of neavier tonnage be enabled to cross the bar, and the port of Wimington be open to the shipping of the world, there is no reason to doubt but that this city will attain an equal rank with the leading cities, of the Atlantic coast. But to aid in accomplishing this, should be the pride and pleasure of all true North Carolinians. It is a shame that the products and resources of our State should be used to build up other States to the detriment of our own. If Wilmington can offer the proper shipping facilities for our products, it is to our interest (laying laside all feelings of pride) to build up that city. It is the nearest sea-coast city to all the great middle section of North Carolina, much nearer than Norfolk or Charleston. The building of the Cape Fear and Yadkin Valley Railroad will make Wilmington the outlet of the products of the richest section of the State. This Road will in a great measure accomplish the object, for which so much money was uselessly expended on Deep River, and that is, the opening an avenue of communication be tween this section and the seacoast. As the streams of this section seek and find an outlet through the Cape Fear at Wilducts. The business men of Wilmington have

ever evinced a public liberality and enteour people. They have always been foremost in our works of internal improvement, contributing most liberally to every movement calculated to promote the prosperity of our common State. It is a well known fact that the Wilmington & Weldon Railroad, at its completion, was the longest railroad in America, and that the amount subscribed for its building by the citizens of Wilmington was greater than the as-And a more intimate acquaintance with them will convince our people, of their fair dealing and liberal character.

Let our Wilmington friends then get up a grand celebration in honor of an event which we sincerely hope may mark a new era in the prosperity of their city, and invite to it the country merchants and thrifty farmers of Central and Western Carolina, who may then see and know what advantages are offered by. and what clever men and fair women re-

THE TELEPHONE IN THE ENG-LISH ARMY.

The New York Tribune says, that twelve sets of telephones have been sent out to Sir Garnet Wolseley for use at the seat of war in South Africa. The great advantage of the telephone over the telegraph is that the General can carry on confidential talk with the officers at the district station, or a soldier can creep out towards the enemy's lines and whisper back information as to position. A fine

wire-the thinner the better-is all that is needed. This the soldier carries on a reel upon his back, a trile weighing only a few pounds. This will be the first time the telephone has been used as an instrument of warfare.

SHERMAN IN THE SOUTH.

According to a correspondent of the N Y. Times, John Sherman is on a still hunt for Southern votes in the next Ke publican National Convention. This correspondent professes to know that a son of Foster Blodgett is work ng up the Sherman boom in Georgia, and that the reason why Paul Strobach, of Alabama, list the Montgomery postmastership, after Hayes had promised it to him, is un derstood to be that Strobach bad made himself too conspicuous as a Grant man An Alaoama Republican writes that most of the Federal office-holders South are de claring for Sherman. It is asserted that Strobach was given his choice by the Postoffice Department between seeming to give up his claim to the Montgomery postofice voluntarily and seeing his son ejected from the General Land Office. It would appear, then, that Erring. Brother Key and Herr Schurz are Sherman menas at present advised.

THE ECONOMY OF STEEL RAILS.

Au exchange says it is intimated that the railroads of the country save \$19,000, 000 a year by the use of steel rails instead of iron, and about fifty million dollars a year more by the decline in rails since 1872. No wonder that they make money on lower rates. On a single road, of heavy traffic, the New York & Erie, new rails for repair cost \$2,689 a mile in 1872, and \$253 last year. The saving on the entire line was, therefore, \$1,900,000.

An English paper speaking on the same subject, says Mr. Price Williams, who is an expert in matters of this kind, has stated that by substituting steel for iron a saving in expenditure will be made during the life of a set of steel rails on all exist ing lines in Great Britain of not less than \$800,000 000. In view of these facts, if Sir Henry Bessemer has obtained in royalties the sum of \$5,250,000, most persons will concede he has got no more than he gallon.

WASHINGTON LETTER.

WASHINGTON, D. C., July 4, 1879

This great Democratic day should be celebrated more generally than it We might dispense with firecrackers, rockets and "devil-chasers," altogether, but a civil celebration of the Fourth in every village of the Union would be of present and future advantage. I hope the first suggestion of the Democratic President to be inaugurated in 1881, will be to this effect.

Congress closed its extra session on the 1st, having passed all the appropriation bills. Mr. Hayes vetoed Sol. Bear & Bros. that which related to United States marshals, and at one time threatened to call another extra session if Congress did not pass such a bill as suited him on that subject. But he did not do it, and there is no likelihood that he will.

The Interior Department again complains that the Secretary of the Treasury does not furnish money for the prompt payment of arrears of pensions. It is a pity, after a Confederate Congress has voted so many millions to Union soldiers, that a truly loyal Secretary of the Treasury should "nullify" the act. That crip-pled veteran, General A. V. Rice, of Ohio, will have to be sent back to Congress after his term as Lieutenant Governor expires. He has been of more benefit to the soldiers in the past four years than all the bloody shirt patriots in both Houses.

MOUNSHINE.

Weston will lecture. There is no use in concealing this any longer. The country might as well know the worst. -Boston Globe.

The contented rustic: 'Well, Peter. your crops must be ruined by this untim ly rain? 'Yes, your honor, but, thank heaven, so are the neighbors.'

LIFE IN A BOTTLE.

The Most Valuable Medical Discov ery Known to the World-No More Use for Quinine, Calomel or Mineral Poisons-Life for the Blood, Strength for the Nerves, and Health for All.

AN OPEN LETTER TO THE PUBLIC

Believing that by cleansing the blood and

building up the constitution was the only true way of bani hipy disease and being troubled with weakness of the lungs, catarrh, very much broken down in constitution, &c , and after trying the best physicians and paying out my money for many kinds of medicines advertised without finding a permanent cure, I b gan doctoring myself, using medicines made from roots and berbs. I fortunately niscovered a wonderful Bitters or Blood Cleanser, the first bottle of which gave me new life and vigor, and in time effected a permanent cure. I was free from catarrh, my lunge became strong and sound, being able to stand the most severe cold and exposure, and I have gained over thirty pounds in weight. Feeling confident that I had made a wonderful discovery in medicine, I prepared a quantity of the Root Bitters, and was in the habit of giving them away to sick friends and neighbors. I found the medicine effected the most wonderful cures of ail diseases caused from humors or scrofula in the blood, Imprudence, Bad Stomach, Weakness kidney Disease, Torpid Liver, &c , &c. The news of my discovery in this way spread from one person to another until I found myself called upon to supply patients with medici e far and wide, and I was induced to establish a laboratory for compounding and bottling the Root Bitters in large quantities, and I now d vote

al'my time to this business.
I was at first backward in presenting eitner myself or discovery in this way to the public, not being a patent med cine man and with that. Since I first advertised this medicine I have been crowded with orders from druggists and country dealers, and the hundreds of letters I have received from persons cured, prove the fact that no remedy ever did so much good in so short a time and had so much success as the Root Bitters. In fact, I am convinced that they will soon take the lead of all other medicines in use. Nearly one hundred retail druggists, right here at home in Cleveland, now sell Root Bitters, some of whom have already sold over one thousand

Root Bitters are strictly a medical prepar ation, such as was used in the good old days of our forefathers, when people w re cured by some simple root or plant, and when kingdom were unknown.

They acceptrongly on the liver and kidneys. keep the bowels regular and build up the nervous system. 'hey penetrate every part of the body, searching out every nerve, bone and tissue from the head to the feet, cleansing and strengthening the fountain springs of life, hence they must reach all

diseases by purification and nourishment. No matter what your feelings or symptoms are, what the disease or ailment is, use Root Bitters. Don't wait until you are sick, but if you only feel bad or miserable, use the Bitters at once. It may save your life.

Thousands of persons in all parts of the country are already using Root Bitters. They have saved many lives of consumtives who had been given up by friends and physicians to die, and have permanently cured many old chronic cases of Catarra, Scrofula, Rheumatism, Dyspepsia, and Skin Diseases, where all other treatments had failed. Are you troubled with sick headache, costiveness, dizziness, weakness, bad taste in the mouth, nervousness, and broken down in constitution? You will be cured if you take Boot Bitters. Have you humors and pimples on your face or skin? Nothing will give you such good health, strength, and beauty as Root Bit-

I know that jealous physicians will cry humbug because my discovery cures se many of their patients, b t I care not. It is now my desire and determination to place my Root Bitters as fast as possible within the reach of all those suffering throughout the world Sold by wholesale and retail druggists and country merchants, or sent by express on receipt of price, \$1.00 per bottle, or six bottles \$5.00. For certificates of wonderful cures, see my large circular around each bottle of medicine. Read and judge for
