

BY DAVID CASHWELL

President, Ladies and Gentlemen: I invite attention to some facts relating to the panic as a result of the...

Of all the attempts to account for the panic of 1873, its cause, extent, and effect upon the interests of this and other countries, I have seen nothing which to my mind presents the only reasonable and natural solution...

In the authentic history of the successful schemes of fraud and swindle and splendor, participated in, and perpetrated with the boldest effrontery...

When the material or social interests of one man, or a small number of men, are affected adversely, the intuitions of self preservation will generally suggest the means of protection...

And the man has used his observation to little purpose, who has failed to see that the policy, and rule, and practice of government throughout the length and breadth of this vast country...

And the man whose intelligent comprehension has not all these verities, can hardly fail to understand how late and inevitably the wicked, persistent, long continued violation and disregard of the conditions upon which alone can securely rest the liberty, prosperity and happiness of the people...

And if it be true, as I claim it to be that the foregoing recital of facts presents the only reasonable and natural accounting for the panic; and if the wants, sensibilities and irregularities referred to, are tending to a continuation in the worst of consequences to the government, as I also claim that they are; and if "eternal vigilance is the price of liberty;" then I claim it to be the duty of every American citizen...

And now, in support of the suggestions submitted, I need only state the fundamental and philosophical truth, which no intelligent right thinking person can deny...

other just ratio, and all such officials made subject to the same conditions in respect to absence from duty; that it should be made a crime punishable by law, with fine and imprisonment...

That the President of the United States should receive \$30,000 per annum, without perquisites or appropriations, and that he and all State Governors should be so restricted in the exercise of the veto and pardoning powers...

That the most rigid economy, consistent with justice, should be required in the civil and all government services, to the extent, even, of putting a final end to all sinecures; that the army should be reduced to the minimum actually necessary to the safe and efficient custody of the forts and all military appliances...

That the first rule for good housekeeping, L. P. B. says, is Never keep on hand more than three days' supply; L. P. B. says, Groceries will melt and wither away like smiles and flowers...

That the man who has failed to understand, in some practical sense, the relations of dependence which subsist between capital and labor, and commerce, and the results which must necessarily follow the violation of the natural laws which govern such dependence...

That the man whose intelligent comprehension has not all these verities, can hardly fail to understand how late and inevitably the wicked, persistent, long continued violation and disregard of the conditions upon which alone can securely rest the liberty, prosperity and happiness of the people...

That the pay of all members of Congress should be fixed at \$3,000 per annum and one mileage going to and returning from each session; that such members of Congress for each day's absence from duty, except on account of personal sickness or other equally unavoidable cause, should receive five day's less pay in proportion to the whole number of days included in such session...

That the Postal Department of the government should conduct and perform all telegraph service, and carry all express freight, of such class as would be convenient to that branch of the public service; and all such express freight as would be impracticable of carriage and delivery by the Postal Department should be carried and delivered by the Railroad Department...
