The Corundum Mines of the South The name 'corundum' is applied to all erystalized alumnia. It is the hard est mineral in the world, except the diamond, and when in the chrystaline form and transparent, constitutes the Oriental gems, the sapphire, ruby emerald topsz, etc, which are of great value, some even exceeding the dia. mond, because they are more rare. It is used for abrasive purposes, but as yet a sufficient quantity has never been tound in this country to take the place of emery It is much harder than emery, performing the work in less time.

Corundum occurs in the great chrysolite belt extending from the Southern part of Virginia to Middle Alabama, passing in a southwesterly direction through the mountainous portion of North Carolina, . In the southwestern counties in the Nauthala range of mountains (one of the spurs of the Blue Ridge), and lying on either side of Back ore. k (a tribuiary of the Ternessee), at an elevation o' from three to four thousand feet is so called Cullekenee corundum mine, which has been considered the largest deposit of corundum in this country. It covers an area of three hundred acres. This mine was purchased in April, 1879, by Herman Bohr & Co, and has been is not reported In Mason county, N C, on the western slope of the Blue R dge, at an elevation of about twenty five Lundred feet, is Corundum bill, former y known as Cullasegee mine. This mine was discovered in 1872; it was afterwards purchased by E B Ward, and worked for eighteen months by Colonel C W Jenks, of Boston. Rumor says that gems of exceeding great value were taken out. In July, 1878, this mine was purchased by Dr H S Lucas for the Hampden Emerycompany of Chester, Mass. - They commenced mining August 20, and up to the present time have taken out two hundred tons of corundum; also, in washing some of the dumps left there when worked by Colonel Jenks, were found many fragments of the Oriental gem.
