His performances have been witnessed by crowded houses wherever he has given exhibitions of his wonderful skill in feats of legerdemain. The Striker.
We have just received the second number of an amateur journal, bearing the above title. It is published at Rocky Point by Master James M. Satchwell, and in matter and typography makes quite a presentable appearance. We were sorry, however, to notice that the editor found it necessary to have his printing executed at Richmond, Va., instead of having it done in this State.

First of the Season.
An excursion to Smithville and the Forts, the first of the season, is projected for Thursday next, the 18th inst., on the steamer *Passport*. It will be under the charge and direction of a committee of ladies, and the proceeds are for the benefit of St. John's Church. The number of tickets will be limited. We trust that it will be pretty weather for an excursion and that the ladies may have a "full house" on the occasion.

City Court.
A truly rural young man, who had "just come to town on a raft," fell among the Philistines in Paddy's Hollow last night and became choke-full of the benzine lightning usually dispensed in that quarter which resulted in his becoming very drunk and disorderly—and the final result was, the young verdant landed in the guard house. The Mayor suspended judgment, and the rural youth departed with grateful feelings.

A. Russell, colored, was arraigned for being drunk and disorderly at a festival in behalf of a colored church congregation in Brooklyn last night. The testimony of the colored witnesses who caused his arrest was that he drew a knife on a party, and threatened to use it, too. The Mayor ordered a sentence of \$5 five or ten days in the C. P. to be entered against the defendant which resulted in the prisoner's going below. Court then adjourned.

What does the billet doux? What check did counter sign? Who ever saw a hood wink? Who ever saw a pig iron? What does an egg plant? Why did the thunder bolt? Who ever heard a foot ball? What was it grape shot? What did pick pocket? Who did the goose berry? Is it a joke that Jim cracks? What made the cow slip? Who did the honey suckle? What did the ho tel? Where did the railroad traic? What did the blind fold? and so-forth, and so-forth.

The people have been so much imposed upon by worthless Blood Purifiers, that we are glad to be able to recommend a preparation which can be depended on as containing invaluable medicinal virtues, and is worthy of the public confidence. The New Market.
According to announcement the new market was thrown open last evening to the general public. It was ablaze with many lights and was soon thronged with crowds of people. There was a band in attendance and the music it discoursed added much to the charm of the occasion. A number of the meat stalls were occupied and Mr. Geo. P. Lamb had a stand which was covered with a lariat display of plants, many of which were in bloom. A few of the ladies of St. John's Church also occupied a stand and from thence dispensed refreshments to all who called for them.

As we have said before, the new building is a very handsome one and an honor and a credit to the city. In looking at this imposing structure one cannot but wonder how it is that we have been able to put up with old Forty-Legs as long as we have.

Why and When Lamps Explode.

Explosions of coal oil lamps are caused by the vapor or gas which collects above the oil. When full of oil, the lamp contains no gas, but immediately on lighting the lamp, a quantity of oil begins, soon leaving a space, in gas, which commences to form as the lamp warms up, and, after burning a short time, sufficient gas will accumulate to make an explosion. The gas in a lamp will only explode when ignited. In this respect it is like gunpowder. Cheap or inferior oil is always most dangerous. The following shows that many things may occur to cause the flame to go down the wick and explode the lamp:

1. A lamp may be standing on a mantle and a slight puff of air from the open window or sudden opening of a door may cause an explosion.
2. It may be taken up quickly from a table or mantle and instantaneously explode.
3. It may be taken up anywhere where there is a strong draught from the doors, and an explosion is likely to ensue.
4. If taken up a flight of stairs, or raised quickly to place it on the mantle, it is likely to explode.
5. In all these cases the mischief is done by the air movement—either by suddenly checking the draught or forcing the air down the chimney against the flame.
6. Blowing down the chimney to extinguish the light, is a frequent cause of explosion.
7. Lamp explosions have been caused by using a chimney broke at the top, whereby the draught is variable and the flame unsteady.

The Ladies' Favorite.

Among the many thousands of ladies who have used Dr. Pierce's Favorite Prescription and pronounced it their favorite remedy, because so efficient in the diseases and weaknesses peculiar to women, are many who are well and favorably known in the world of letters, as well as artists, musicians, and a whole host of names from the brilliant ranks of wealth and fashion. It is pre-eminently the ladies' Favorite Prescription, its use, while being far more safe and efficient, exempting them from those painful, caustic operations, and the wearing of those mechanical contrivances made like Peter Pindar's razor—seller's razors—to sell, rather than to cure.

KILLMORE, Ind., March 20th, 1878.
DR. R. V. PIERCE:
Dear Sir—Your Favorite Prescription has restored me to perfect health.

Dear Sir—My wife was a hopeless invalid for nearly 20 years. Your Favorite Prescription has cured her.
