The Wilmington Mutual.

We are glad to learn of the success which has attended the establishment here of the Wilmington Mutual Insurance Company, Mr. Cannon, the Secretary, informs us that they have already paid out the amount of \$10,000, and that there is \$2,000 more new to pay, which is to be realized by an assessment on the premium notes held by the Company.

This company was organized and put nto operation for the benefit of its stockholders. While its operations are not large they are safe and profitable and the estimate is that those who have held policies issued by it have paid, first and last, not more than 40 per cent of the usual rates for insurance. The Wilmington Mutual is a home institution and as such we would be glad to see the sphere of its profitable usefulness enlarged.

The Kelsey is an Jexcursion boat, having been built for that business and to ply between New York and points on Long Island Sound. Lat terly she has been used for carrying the mail between Jacksonville and Palatka on the St. John's river in Florida. The Kelsey is about 300 tons burthen and would make an elegant boat to place on the line between here and Smithville. She has also nice state room accommodations and seems to be well officered. Health Bulletin.

We thank Dr. Thos. F. Wood, Secretary of the North Carolina Board Health, for a copy of the monthly bulletin of health, compiled by him. We give here a summary of his estimates for Pritchard, D D, leaves for Louisville, Ky, the month in Wilmington. With a population of 17,002, the prevailing wind during the month of March was from the Southwest; rainy days, 14; average tem perature, 56, 2-10 degrees; prevailing disease, whooping cough, which was also epidemic; diseases among domestic animals, none; inmates of poor house, 42; prisoners in jail, 9; cubic space allotted to each, 288 feet; food served to prisoners good and sufficient; food served in peor house, good and sufficient; condition of wells, good; condition of sinks, &c., improved; number of public school houses 14, all frame buildings; ventilation and drinking water, good. Questions asked as whether there has been any drainage in the streets during month; any efforts towards improving the sanitary condition of the town, and any improvements in the condition of public buildings, are all answered in the affirmative, with the additional remarks that the sanitary condition of the city is being carefully looked after and that hands are constantly at work on the streets, drains, ditches, &c., an additional appropriation for the work having been obtained. The health of the county during the month was good.

The remains of Miss Abbie Ellis, not yet arrived, are expected here to-night, and unless some unforeseen detention should occur the funeral will take place from the First Baptist Church to-morrow morning, at 10 o'clock.
