Fish are biting nicely at the rocks at New Inlet. In the past few days immense quantities of large red and black drum have been caught and many fine trout and pig fish. A couple of lucky amateurs angled for two hours yesterday and caught eighteen as pretty drum and a quantity of smaller fish as have been seen in this market for some time. There is hardly a day passes but what some fish heretofore unknown in these waters are caught. They are attracted by the young crabs and other food, which is found in abundance at the breakwater We also understand that small lobsters have b en seen on the rocks.
