To'at Rainfall.

The total amount of rainfall here during the mouth of July of this year, as we learn at the Signal Office, was 9 20 iches, and in August, during the first week, it has been 5.94 inches, a total for all of July and one week of August of 15.14 inches. The maximua was in July on the 23rd, when 1 87 inches fell, and in August, on the 4th, when 2.04 inches fell. During the months of July and August of last year the total rainfall was 16 04 inches, of which more than one half, 8.04 inches, fell in one day, August 18th. With this one day alone left off it will he seen that there has been gearly twice se much rainfall this year for the period beginning July 1st and ending August 9th as there was last

Fifty-one Feet. One of the biggest freshets ever known is that now sweeping down the Cape Fear to the sea. When the North State left Favetteville on Saturday there had been a rise of 51 feet and the tendency wis still upward. The rise has been a rapid on -so rapid, in fact, that the farmers on the lowlands were unable to save any of their crops. It does seem a great pity that such magaificent crops should be washed off and destroyed, almost in the twinkling of an eye.

Frenks of Nature.

Mr. B. D. Barnett, of Albertson, in Duplin county, writes to a relative here and tells him of a lit or of very peculiar pigs on his farm. Two of them, he says had no fore legs and on the left side no sign of legs, while on the right side, where the legs should have been, there were his Country Friends on the pros small protuberances, about the size of a man's little finger. There are two others with fore feet more like a dog than a pig, on the sides of which they walk. From the tenor of Mr. Barnett's letter we should judge that the two first named died, while the others are still alive.
