Fall Stock.
BROWN & RODDICK
 45 Market Street.

DESIRE TO INFORM THE PUBLIC generally and Wholesale Cash buyers in particular, that we are full up with the
Cheapest Line!
Dry Goods
 that has ever been offered in this market. NO BUYER visiting this city will do himself justice by passing our door, as we are underselling the market in many of the regular staple lines.

We have marked down all goods that belong to Summer wear and are offering
Many Special Inducements
 to our patrons.
 We would call particular attention to the following
50 CENTS GOGSKIN DRIVING GLOVES
 slightly spotted, 75c. Worth \$1.00.

Calicoes!
 New Fall Calicoes at all prices in beautiful designs.

Bleached and Unbleached Cottons!
 We have laid in a very heavy stock of the above and are offering them at lower figures than ever. We have all the popular brands. Cur 44 Bleaching at 10 cents per yard is without any exception the best value ever offered.

Linen Handkerchiefs,
 A Job at 10 cents. These goods require no comment.

The tax books for the year 1880, State and County, will pass under the supervision of the Auditing Committee from the Board of Commissioners tonight and then be turned over to the Sheriff for collection, possibly to-morrow.

The Robeson County Ticket.
 The following is the ticket nominated by the Democrats of Robeson county, a week ago. It has been furnished to us for the REVIEW, with the assurance that it has never yet been correctly published in Wilmington:
 House of Representatives—Alf. Rowland, Hector McEachern.
 Clerk Superior Court—C. B. Townsend.
 Sheriff—Faulke J. Floyd.
 Treasurer—John A. M. Lean.
 Register of Deed—John J. Russ.
 Coroner—Dr. John D. McManis.
 Surveyor—John M. Baile.
 Sub-Electors—Frank McNeill, N. A. McLean.

The Circus
 To-morrow Coup's great Circus will show in this city, and no doubt there will be many of our country friends in the city to see it. Yesterday they showed at Wilson, and to day they are in Goldsboro. From persons along the line of the road, we learn that the show was well patronized and gave very great satisfaction. Yesterday quite a number of persons were turned away from the doors at Wilson, notwithstanding that Mr. Coup spreads the largest canvass on earth. We were in hopes of being able to give the line of march of the street pageant for to-morrow, but have not been able to get it.

Grand Meeting of I. O. O. F.
 The Sovereign Grand Lodge of the Independent Order of Odd Fellows will hold its 56th Annual Communication at Toronto, Canada, commencing Monday, the 20th inst. Mr. C. M. Busbee, of Raleigh, is the Representative from the Grand Encampment of North Carolina, and Messrs. Wm. H. Bagley, of Raleigh, and R. J. Jones, of Wilmington, are the Representatives from the Grand Lodge of North Carolina. Mr. Jones will leave here on Monday next for Toronto.

Each Representative to the Sovereign Grand Lodge has received the following invitation:
 SOVEREIGN GRAND LODGE OF THE I. O. O. F., OFFICE OF THE M. W. GRAND SIRE, SAN FRANCISCO, June 1, 1880.
 Dear Sir and Bro.:—Our brothers in Canada desire that this Grand Lodge shall meet at Toronto on Friday morning, September 17, 1880, so as to have a demonstration of the Order at noon of that day. The Annual Agricultural and Industrial Exposition of that section closes Saturday, the 18th September; and in addition to the demonstration, it is proposed to give us an Exposition and a city welcome and reception.
 Fraternally,
 JOHN B. HARMON, Grand Sire.

A Rarely Beautiful Phenomenon.
 On the 25th of September will occur the perihelion of Jupiter. That giant planet then reaches his nearest point to the sun, and is also within a few days of his opposition or nearest point to the earth. Jupiter comes at that epoch 46,000,000 miles nearer the great central orb. He is then, however, more than 450,000,000 miles from the sun, fortunately far enough away to counteract and mollify the increased force of attraction between two such mighty masses. It is safe to feel that the rubicon of Jupiter's perihelion is passed, for the fifteen days yet to be completed count as nothing in a revolution requiring nearly 11,000 of our days, or twelve of our years. Nearly twelve years must pass before the conditions will again be as favorable for observation. Jupiter comes beaming above the eastern horizon about 8 o'clock, bright enough to cast a shadow and afford a glimpse of his moons through a good opera glass. Nothing can be more interesting than to study the phases of the four diamond points of light that bear witness to the presence of Jupiter's moons. Jupiter turns on his axis in about ten hours, so that an observer on his equator would be carried round at the rate of nearly 500 miles a minute, instead of the seventeen miles that mark the comparatively moderate progress made by an inhabitant at the earth's equator. Jupiter rises now about 8; at the end of the month the rising will be about 6. The September moon falls on the 18th.

Mail Money

Everybody has felt at times the inconvenience arising from the want of small change fit to be sent by mail. An exchange suggests a remedy in the form of an open money order for ten or twenty-five cents, payable to bearer, stamped by the Government. These orders should be sold for eleven and twenty-six cents respectively, and issued to postmasters as stamps are, and accounted for accordingly. To prevent their circulation as fractional currency, they might be limited to a fortnight or thirty days from the date of issue, and made payable at a certain designated office. The idea is perfectly practicable, and some such expedient should have been adopted before now.

The Uses of Paper.
 A complete list of articles made of paper would be a very curious one, and almost every day it becomes more so. Among other things exhibited last year at the Berlin Exhibition were paper buckets, bronzes, urns, asphalt roofing, water cans, carpets, shirts, whole suits of clothes, jewelry, materials for garden walks, window curtains, lanterns, and pocket handkerchiefs.
 The most striking of the many objects exhibited in this material was, perhaps, a fire stove with a cheerful fire burning in it.

We have, from time to time, noted the announcement of newly invented railway carriages and carriage wheels, chimney pots, flour barrels, cottage walls, roofing tiles, and bricks and dies for stamping, all made of paper.
 A material capable of so many uses, so very diversified in character, is obviously destined to play a very important part in our manufacturing future. Articles of this kind, which have just now the greatest interest, and which are among the greatest novelties in this way are paper blankets. Attention has frequently been called to the value of ordinary sheets of paper, as a substitute for or, at least an addition to, bedclothes.

My life was saved by Warner's Safe Kidney and Liver Cure.—*E. B. Lakely, Selma, Ala.*
The Robeson Nomination.
 By some inadvertence we have hitherto failed to give the result of the convention held by the Democrats of Old Robeson at Lumberton on the 1st of this month. But, thanks to the courtesy of Mr. J. A. McAllister, one of the enterprising merchants of Lumberton, we are now able to give the whole county ticket as it was made by the Democracy of that good old county in convention assembled at the time and place above mentioned. The candidates we are informed are all worthy, reliable men and excellent citizens. Of one however, we can speak from our own personal knowledge, to wit, Mr. Alf. Rowland, who has been selected by his fellow citizens, much against his own desire, as their candidate for the House of Representatives. In the selection of this talented gentleman the convention did itself great credit and brightened very much the chances for the success of the whole ticket. Mr. Rowland is a lawyer of distinction in his county and is an able speaker. On the stump, we have heard, he handles that particular *protege* of the Republican party—Dr. Norment—with gloves off. We shall look for a rousing majority in Robeson and we expect to hear glowing accounts from our highly esteemed young friend, Mr. Rowland.

Ab ut Drinking.
 No water that has stood in open vessels during the night should be used for drinking or cooking. By exposure to the air it has lost its "aeration," and has absorbed many of the dust germs floating in the air. If convenience requires water to be kept in vessels hours before use, it should be covered. Filtering always adds to the purity of the water. Drinking water should not be taken from rivers and lakes on low level. Surface water, or water in lakes, pools or rivers which receive the surface wash, should be avoided as much as possible. Do not drink much water at a time. More than two tumblerfuls should not be taken at a meal. Do not drink much between meals, as excess of water weakens the gastric juice and overworks the kidneys. Excessive potations, whether of water or other fluids, relax the stomach, impair its secretions and paralyze its movements. By drinking a little at a time injury is avoided.

Everybody can get suited with a Pocket Knife, also Table Cutlery, at JACOBI'S Hardware Depot.

Arousing its Readers.
 An alarm of fire at midnight is a startling thing, but not half so startling to many who hear it as would be the sudden knowledge of their own dangerous physical condition. Thousands of thousands are hurrying to their graves because they are carelessly indifferent to the insidious invasions of disease and the means of cure. It is the mission of H. H. Warner & Co., with their Safe Kidney and Liver Cure, to arouse men to a sense of their danger and then cure them.—*Memphis Appeal.*
