Changes in Odd Fellowship.
The last session of the Supreme Grand Lodge of Odd Fellows made many changes in the work of the order, which will be of interest to members in this place and elsewhere. A number of reforms have been introduced in the unwritten work, with a view of simplifying the initiatory and degree ceremonies, all of which go into effect on the 1st of January. There will be three degrees in the subordinate lodge instead of five as formerly. Those who have now the first and second degrees will rank as first degree members; those of the third and fourth, as second degree members under the new arrangement. There is one degree in Rebekah and three in the Encampment.

The Friend of Delicate Ladies.
Warner's Safe Kidney and Liver Cure is the remedy that will cure the many diseases peculiar to women. Headache, neuralgia, disordered nerves, weakness, mental shocks, and kindred ailments are effectually removed by its use.—*The Mothers' Magazine.*
It has been well said, "In Union there is strength." Emphatically is this true of the **Union Mutual Life Insurance Company of Maine**. For thirty years it has been making a noble history and disbursed to thousands the practical benefits of life insurance.

Work on the Marine Hospital.
The U. S. Marine Hospital, located on Eighth, between Nun and Church streets, is undergoing a thorough overhauling. Mr. D. M. Dart is the government's superintendent of the work. About six weeks ago the work of renovating and repairing the building was commenced, and it has been steadily pushed towards completion. The "L" on the East side of the building and the piazzas on the North and South faces had tumbled down; in fact, the entire structure was going to pieces. The "L" and piazzas have been rebuilt and the workmen are now busily engaged on work in the interior of the Hospital. The walls, balconies and wood work are to be painted and the establishment to be repaired in first-class style. Besides, it is to be supplied with all modern improvements. There is to be hot and cold water pipes through out the building; force-pumps, 4 bath-rooms, 4 water-closets, an elevated oven, range, sinks and cess-pools. The dilapidated old furnace has been taken out and each room will be furnished with grates. The water-tanks which supply the bath-rooms have 4,000 gallons capacity.
The culinary department is to be supplied with all necessary appurtenances and the wash room will be furnished with stationary tubs, boilers etc. The ground around the building within the enclosure is to be leveled. When the repairs were commenced about a dozen "squatters," both white and black, were routed from the building, which they had been occupying rent free for several months. Mr. Dart is doing his work thoroughly and when it is completed the U. S. Marine Hospital will be one of the noted no modernized buildings of the city.
The poet says: "I would not die in spring-time." You don't know when you are going to die; therefore make haste and take a policy in the **Union Mutual**.

The Need of a Hospital Exemplified.
Albert Faison, colored, a poor consumptive, who for several months past has been living in the cabin of a flat, but who was removed by some women to a house on "Dickinson Hill" a few days ago, died yesterday morning. His case was a particularly sad one. Unable to work he was allowed to stay on the flat until it was evident he could not live long, when the owner interested himself in finding some one who would care for him during the last few days of his life. Tuesday night while the unfortunate creature was undoubtedly in the throes of death, his voluntary nurse became frightened and left the house. The poor fellow laid on his improvised couch for twenty-four hours with no one to administer to his wants and died alone in the deserted house. Had there been a hospital in this city the last few hours of the dying man might have been easier. There is much suffering of this kind in this city and something should be done to relieve it. A case in point is that of the pauper who daily falls in a fit in the most public streets of the city while he is asking alms with which to purchase his food.

For The First Time.
A gentleman of our acquaintance who is now about 45 years of age was drawn as a juror before the Superior Court, for the first time in his life. He is one of the jurors who were empanelled to "sit together to hear the evidence, etc." in the civil case which was commenced over a week ago and which was given to the jury last night. He has been listening to the evidence, speeches, etc., for over a week and thinks he has put in his life time quota of jury duty.

Progress of the American Union.
We extract this from the columns of the *Charlotte Observer*: The poles of the American Union Telegraph Company have been distributed for seventy miles down the Carolina Central road, and a force of thirty hands began planting them from here and had finished about five miles yesterday.
The Northern connection from Wilmington over this line will be made through Charlotte, as the company has no wires along the Wilmington & Weldon road. The rates for right-of-way offered by this road were declined. New York and New Orleans will be connected directly by a duplex wire already stretched. Another wire, to Richmond, will be stretched in a short time giving the company three Northern wires from this point.
We advise our friends to call at **JACOB'S** for real Silver Plated Tea and Table Spoons and Forks, Roger's Ivory handled Table Knives, Pen and Pocket Knives. All for Christmas and at the lowest prices.

MARRIED.
At Fair Bluff, December 16th, Mr. F. LEE BOBBITT, of Franklinton, to Miss LIZZIE SHIBER, daughter of Walker Moore, Esq. No cards.

The World for 1881.
THE WORLD for 1881 will be the best and cheapest newspaper published in the English tongue on either side of the Atlantic. With new presses expending any ever before manufactured even by Hoe & Co., with new and unequalled typographical and business facilities of all sorts, and with a better organized telegraphic correspondence throughout the world than that of any other American journal, THE WORLD for 1881 will afford its readers daily a complete, condensed and trustworthy record of all current events.
In its Five Minutes with the News of the Day the World gives its readers news with the increasing demands made by its subscribers, the telegraph and the telephone, on the time and attention of business men.
Its daily cable letters from London bring the "old World to the breakfast table of the New."
In its Wall Street Gossip and its Items for Investors, taken together with its candid and absolutely impartial Financial Article, The World daily presents an unparalleled picture not only of the true condition of the multitudinous enterprises in which the adventurous and active people of this country invest their savings, but also of all the fascinating finances exerted upon these enterprises by the speculators and the speculators of the St. of Exchange.
No man who owns or expects to own a share in any corporate property can afford to be for a single day without the information daily and exclusively given in "The World," not only as to the natural and legitimate course of affairs affecting stock values, but also as to the plans, schemes and combinations which are incessantly making and unmaking in and out of Wall street to affect these values.
The World contains also every day the freshest, fastest and most instructive notices of everything new and interesting in the realms of art, literature and of social life. It is the accredited organ of the colleges of the Union, and the accuracy and vigor of its sporting columns, covering all the various forms of athletic amusement which have multiplied among us of late years, command it to the "rising generation" throughout the country.
As the only metropolitan morning journal published in the English language which maintains an unwavering fidelity to the enduring great principles of the Democratic faith in politics, The World for 1881 will be found, where for the last five years The World has been found, absolutely independent of all persons, cliques and factions within the Democratic party.
The World will maintain the cause of the Union against sectionalism in all its forms, the cause of good government against corruption in all its forms and the cause of the people against monopoly in all its forms.
