The class which graduated at the University in 1818 was a remarkable one. Twenty-eight young gentlemen received their diplomas, and out of that number a large proportion became distinguished in after life. One became a President of the United States (Polk,) two became Governors, two members of Congress, two B shops of the Episcopal Church, two Doctors of Divinity in the Presby terian church-two were Judges of the Superior Court, and one a Consul General (Mallett). Governor St. John, of Kansas, claims that the prohibitory law of his State is wonderfully successful. Topeka, with a population of 20,000, has not a single saloon, and has had only one case of drunkenness since the law went into effect. An inebriate took an overdose of patent bitters, and the man who sold the "medicine' was fined \$100. There are no open saloons outside of Leavenworth and Atchison, and these are under prosecution. The Governor's letter was written before the recent judicial decision shaking the constitutionality of the law was rendered.

A London telegram to the N. Y. World says: 'Mr. Gladstone's physicians have made a concentrated representation to him that he must go into the Upper House if he expects to remain in public life. After an exhausting sitting of Parliament he can go home and sleep eight hours on a stretch without once waking. But no man can draw forever even on such a constitution as his with impunity.

When a boy sees a big hornet's nest depending from the branch of a tree he is not satisfied that it is loaded until he hits it with a stone. He would rather heave a rock at it than to have five dol lars. In a few seconds he would rather five dollars that he hadn't heaved the rock.
