To Prevent Sunstroke.
Dr. Edward C. Mann, of New York, gives the following hints for the prevention of sunstroke: To avoid sunstroke, exercise in hot weather should be very moderate, the clothing should be thin and loose, and abundance of cold water should be drunk. Workmen and soldiers should understand that as soon as they cease to perspire while working or marching in the hot sun, they are in danger of sunstroke, and they should immediately drink water freely and copiously, to afford matter for cutaneous transpiration, and also keep the skin and clothing wet with water. Impending sunstroke may often be warded off by these simple measures. Beside the cessation of perspiration, the pupils of the eyes are apt to be contracted, and there is a great frequency of micturition. If there is marked exhaustion with a weak pulse, resulting from the cold water application, we should administer stimulants. The free use of water, however, both externally and internally, by those exposed to the direct rays of the sun, is the best prophylactic against sunstroke, and laborers or soldiers, and others who adopt this measure, washing their hands and faces, as well as drinking copiously of water every time they come within reach of it, will generally enjoy perfect immunity from sunstroke. Straw hats should be worn, ventilated at the top, and the crown of the hat filled with green leaves or wet sponge. It is better to wear thin flannel shirts, in order not to check perspiration. We may expose ourselves for a long time in the hot sun, and work or sleep in a heated room, and enjoy perfect immunity from sunstroke if we keep our skin and clothing wet with water.
The shipments foreign to-day amount to 944 casks spirits and 1,700 barrels rosin, shipped by Messrs. Paterson Downing & Co., on board German barque *Hermann Behrent* for Bristol, England.

MRS. JOE PERSON'S
REMEDY FOR
SCROFULA
NEVER FAILS.
It Will Cure if Fairly Tested.
It gives me much pleasure to be able to state that I have derived an effectual cure of scrofula from the use of Mrs. Joe Person's Remedy for that disease. I had suffered from scrofula for more than three years, and had despaired of ever getting well. I was treated during that time by three very eminent physicians, without any good result. I then went to the National Surgical Institute, at Atlanta, Ga., and was treated there more than two months, with no better result than my family physicians met with. After returning from the Institute, I was persuaded to try Mrs. Person's remedy, and I had not used it more than a week before I discovered its curative and healing properties. My sores soon began to heal, and the color of my skin changed as fast as the sores healed. I had not thought of ever getting well again, but my hopes increased, my low spirits rose, and before the remedy, and I am now enjoying splendid health and am in good spirits. The remedy is mild as a purgative, and a strong tonic; it will heal the most stubborn sores in three weeks if taken regularly. It is my opinion that it should be taken some time after the sore is healed, to remove the cause of its effects. It should be taken regularly by all means, for I have sometimes neglected it, from the pressure of business, and in all cases found that the cure already made would commence to retrace, and for this alone it should be continued regularly until an effectual cure is completed. Nothing should prevent regularity in the use of the remedy and it should be taken at the proper time. I would recommend to all who are suffering from scrofula to try it. It will surely cure you if you give it a fair test. I speak from experience and not from hearsay. I am a grateful recipient of a cure from the use of it and under many and lasting obligations to Mrs. Person for the great relief I have obtained from its use. Sufferers, try it and be cured, as my advice. I am, respectfully,
JAMES A. MORRIS,
head stamp for testimonial of remarkable cure.
