

THE DAILY REVIEW.

JOSH. T. JAMES, Editor & Prop'r WILMINGTON, N. C.

SATURDAY, AUGUST 6, 1881.

Entered at the Postoffice at Wilmington, N. C., as Second-Class Matter.

The English government is certainly fast becoming revolutionized. The Liberal party, under the leadership of Mr. Gladstone, has made some rapid strides towards Republicanism; in fact most too rapid to suit, it crops out occasionally, even the illustrious Premier himself. The Liberal leader, it would seem latterly, desires rather to make haste slowly, but he finds that the impetus once given to the masses by the elective franchise conferred upon certain classes which never before enjoyed that privilege, has but created a greater thirst and a stronger demand for a few more individual rights after the same kind, as well as a demand for greater liberty and freedom of action.

The disturbances in Ireland, the agitation of the Land League and the numerous disorders, riots and murders which have occurred in the Green Isle are but the outgrowth of Mr. Gladstone's weak and vacillating policy, since his second advent into power. His government is known to have been divided on several important measures already, so much so that one of the most prominent members of the new government, and one among the staunchest Liberals—the Duke of Argyll—resigned his position and declined to affiliate with the Gladstone Ministry any longer. Parliament after a long and tedious session has accomplished little or nothing, certainly nothing to reflect credit upon the nation at large.

The peace which has recently been concluded in the Transvaal with the Boers cannot be termed a peace with honor such as the late Prime Minister, Lord Beaconsfield was able to proclaim when he returned from the Berlin conference. Neither is the present state of affairs in Afghanistan so honorable to the English nation after so much waste of blood and treasure to capture Cabul, avenge the massacre of the English officers and soldiers and to establish British supremacy there. The passage of the Land bill in the House of Commons after the formidable opposition made by the extreme Radicals or Liberals is one great achievement for the Gladstone Ministry, but one which taxed the resources of the distinguished Prime Minister, both mental and physical, to their utmost capacity. The recent expulsion of Mr. Bradlaugh, a legally elected member, from the lobby of the House of Commons by force, is quite Republican in its tendency if we may take the United States government under the new regime as an illustration. General Canby propped up by the bayonets of his soldiery turned the rightfully elected Governor of North Carolina—Governor Worth—out of office and placed in power by virtue of the same authority that political abortion known as W. W. Holden. Likewise, two of North Carolina's most distinguished sons, the late Governor Graham and the late Judge Manly, were thrust out from their rightful and constitutional seats in the United States Senate, and refused admittance to the Senate Chamber.

Three thousand people live in tents on the outskirts of Denver. There is a lack of cheap houses.

Model wives formerly took "a stitch in time," now, with the aid of a sewing machine, they take one in no time.

New York Commercial Advertiser: Woman, says a cynical old bachelor, are like postage stamps—the more you lick 'em the closer they stick.

The net profits of grape culture in some counties of California have been as high as \$300 per acre. The wine, brandy and raisin interest is in its infancy.

A new machine that can assort and cancel 400 postals and envelopes a minute has been put in operation in 30 post offices in the United States and one in London.

While all should strive to do better than others, too many are never so well pleased as when they discover that others do no better than themselves.

Mlle. Alice Grevy, the daughter of the French President, has very nice eyes and a Velasquez face.

A GOOD NOMINATION. The Democratic party of Virginia have done well in selecting as their standard-bearer in the approaching gubernatorial contest, the gifted Major John W. Daniel, of Lynchburg.

the Daniel and Mahone faction that Governor Holiday owes his elevation to the highest office in the State. The present nominee of the Democratic party is a brilliant orator, besides having been a good Confederate soldier. Of this latter quality there can be no doubt, for anyone who served on the staff of that glorious old "rebel," Jubal A. Early, could not have been otherwise and remained with Early in the field.

The authorities of Glasgow, Scotland, recently issued a very sensible order based on hygienic reasons, that no milk should be sold in a shop from which there was communication with a room in which persons slept. The health officers of other cities would do well to take a hint from the Glasgow officials. It is a well ascertained fact that milk allowed to stand in a room, even when well covered, absorbs all the odors of the apartment and may thus be the means of disseminating contagion. Yet how little attention is paid to this fact by dairymen and other milk vendors! Stringent measures for securing the purity of this most valuable article of food should be adopted in every city, and when adopted be rigidly enforced.

Sitting Bull since his capture is being treated with the honors due a prince. At Bismarck everybody did him reverence. Dressed in his Sunday clothes and smoking the pipe of peace held a little reception in the hotel parlor. Blue blanketing formed his pantaloons and his white shirt was of a pattern much finer than is usually seen in the far West. Three streaks of red war-paint decorated the sleeves and his neck, face and head were smeared. His black hair hung in braids. People almost lionized this red-handed murderer.

New Orleans is getting up a big local political row over the change of her fire department from the volunteer to the pay system. The old volunteer department, which receives an annuallum from the city for the use of its benevolent association, has become a great political power, and it is said, a means of corruption, but it will fight to the death for its own existence and the spoils.

Mr. Vanderbilt has offered \$500,000 for the grounds and buildings of the Roman Catholic Orphan Asylum on Fifth avenue, opposite his residence. He proposes to turn the block into a private garden and park for himself and his children. The offer will probably be accepted.

The monthly debt statement shows a reduction of \$10,078,023 during the month of July, which is an excellent showing for the first month of the new fiscal year. The total debt, less cash in the treasury, is now \$1,830,520,788.

The Baltimore American says that of the 70,000,000 gallons of water used per day in Chicago one-half goes for beer manufacture and the other half for scalding hogs.

"The Gods Help those who help themselves," and Nature invariably helps those who take Warner's Safe Kidney and Liver Cure.
