**Mrs. Joe Person's Statement in Regard to Cancer.**  
I receive numerous letters asking if my remedy will cure Cancer. I can only cite the following case, which is the only one I have ever cured, the only one upon which I have had an opportunity of testing it in its incipient stage. When we were married, in 1857, my husband had a small wart-like looking place on his left cheek bone, which he told me then he thought would eventually terminate in cancer. We paid no attention to it, though we could see with advancing years that it was gradually increasing in size. Then it commenced to form a scab, something similar to a piece of dry bran, which would shed every few days, another form, and so it continued until March, 1872, when it broke out into a regular run, eating sore, which continued to spread with the most alarming rapidity throughout that spring and summer. The sore had eaten in considerably, was about the size of a silver quarter, had the appearance of honey-comb, with the cells distinctly marked, and considerably had a smarting, irritating sensation as if needles were pricking the surface, with occasional sharp darting pains, which extended to the eye and weakened it. Every body who saw it considered it a case of well developed cancer. The physicians advised him to have it cut out, whereas I advised treatment at a cancer infirmary. At last one of the physicians suggested that I try my Remedy, and said he believed it would cure it. The thought of using it had never occurred to me, as I then only knew it to be good for Scrofula. I commenced its use on the sore the 1st day of October and discontinued it the 7th November, as it was PERFECTLY CURED. It had then been a running sore for six months. It broke out again for four consecutive years, in the spring each time more severely, and requiring much longer to cure. I broke out last in 1876, when it required four months' treatment to effect a cure, since which time it has been and is now perfectly well. I have tried it in many advanced cases—cases beyond the possibility or hope of cure, always with benefit—sometimes by delaying its progress, sometimes by giving perfect freedom from all pain. I am, very truly,  
MRS. JOE PERSON,  
Nov 11, 1883, Franklin, N. C.  
The Remedy is for sale in Wilmington, by Dr. W. M. E. GREEN. Send for Circular.

C W YATES—Business Men

Day's length 10 and 21 minutes.  
Sunset to-morrow afternoon at 24 minutes past 5 o'clock.  
The receipts of cotton at this port today foot up 622 bales.

There was but one interment—that of a child—in Bellevue Cemetery this week.

There were two interments—both children—in Oakdale Cemetery this week.

There were five interments—two adults and three children—in Pine Forest this week.

To Builders and others—Go to JACOBI'S for Sash, Blinds and Doors, Glass, &c. You can get all sizes and at the lowest prices.

The matrimonial fever seems to have considerably abated as the Register of Deeds has not been called upon this week to issue a single marriage license.

Steamboatmen report that there are nearly or quite thirty rafts of timber and naval stores coming down the Black river between here and Point Caswell, and that the river is falling rapidly.

Freshwater Perch, Trout and Black fish Hooks and Lines. A full assortment and lowest prices at JACOBI'S.

The Janitor of our building was crippled with rheumatism; his leg was so swollen and painful, that he limped about in the most pitiable manner, being unable to walk and unfit for his duties. He applied St. Jacobs Oil after vainly trying numerous other remedies, and it cured him perfectly. He is as well as ever and as lively as a cricket. A member of our house has frequently tried the Oil and found it wonderful in its effects. We endorse it.

**Educational**  
Rev. A. D. Mayo, D. D., of Boston, Mass., will deliver a lecture to-morrow (Sunday) evening at 8 o'clock, in Christ (Congregational) Church, on "The Religion of the Heart." Dr. Mayo will also deliver two addresses, at Memorial Hall, on Wednesday evening, as announced, on "The Education of the Head," and "The Education of the Hand." All lectures free.

**A New Weekly.**  
The *Stately Gleaner* is the title of a new weekly which has just gone into publication at Norwood, in Stanly county. It is a handsome 24-column paper, is printed well, edited well and seems to start well. Its enterprising projector is a young man by the name of Robt. W. Knight, recently foreman of the *Anson Times*, and whose father for many years edited the *Wadesboro Herald*. We wish Mr. Knight a success of it.

**Bed-Bugs, Roaches**  
Rats, mice, ants, flies, vermin, mosquitos, insects, &c., cleared out by "Rough on Rats." 15c. boxes at druggists.

**Sunday School Association.**  
The executive committee of the North Carolina State Sunday School Association, having received official notice that Mr. B. F. Jacobs, chairman, and Mr. E. Payson Porter, statistical secretary of the International Sunday School Executive Committee, with perhaps others of their committee, with visit North Carolina on the 24th and 25th of February, 1882, at some convenient centre to meet the Sunday School workers of the State, desire to give notice that on the days mentioned, there will be held in the city of Raleigh, N. C., a special meeting of the North Carolina State Sunday School Association. Not only are organized counties earnestly requested to send delegates to this convention, but every county in the State may and should have representatives present; indeed any earnest Sunday School worker will be made welcome, and will be recognized as a member of the convention. A local committee has been appointed in Raleigh, to make all necessary arrangements for holding the convention. From this committee further announcement may be expected.

## Board of Aldermen.

The Board of Aldermen met in called session at the City Hall last night. The Mayor stated that he had called the meeting at the request of the special committee on the contract with the Water Works Company to receive their report.

Alderman Chadbourn, chairman of the special committee appointed to examine into all points in connection with the contract of the City with the Clarendon Water Works Company, made the following report:

To His Honor the Mayor and Board of Aldermen of the City of Wilmington:

We, the undersigned, your special committee on the contract with the Clarendon Water Works Company, beg leave to submit the following report: We have with the utmost care scrutinized every section of the contract, and have canvassed every objection to the same, and have sought information from every possible source, whether the Water Works Company have complied with their part of the contract, and beg leave herewith to submit the following facts without recommendation, together with the following documents:

After the usual preamble, &c., section 1st of the contract reads as follows: "That they will erect, establish and lay down a system of water works in said city, with proper and necessary mains, pipes, hydrants and appurtenances, with a full and sufficient supply of water suitable and fit for domestic use—everything to be of the best material and to be constructed and completed in a workmanlike manner," &c.

The principal point in this section is, whether the water taken from the North East branch of the Cape Fear river at Hilton is suitable and fit for domestic use.

The Company produced two analyses of the water, one in June and one in December, made by the celebrated chemist, Prof. W. Ripley Nichols, of the Massachusetts Institute of Technology, in which he states that by the analyses the water is good and fit for domestic use, but qualifies this by saying that the surroundings of which he was unimpressed, might be such as to cause him to change his opinion.

The Company present also the certificates of Capt. B. G. Bates, O. G. Parsley, Sr., George Harris, Jas. H. Chadbourn and George Chadbourn, who certify to the fitness of the water, not from any chemical analysis, but from a full knowledge of its surroundings and sources of supply, and from use and experience.

Your Committee, deeming this a matter of great importance, addressed the following communication to the Board of Health:

To the President and Members of the Board of Health of New Hanover County:

"The Board of Aldermen of the city of Wilmington have been tendered the Water Works, as per contract with the Water Works Company, and holding the health of the city to be paramount to all other considerations, we would respectfully ask the decision of your Board as to the analyses presented to us by the Water Works Company, made by Prof. W. Ripley Nichols, of the Massachusetts Institute of Technology.

"First. Whether these analyses of Prof. Nichols can be relied upon; and if not, we would request you to produce some analyses more worthy of credit.

"Second. If the analyses of Prof. Nichols are trustworthy, state reasons, if any exist, why the Board of Aldermen should not be governed by them, in settling the fitness for domestic use of the water taken from the North East branch of the Cape Fear river."

The Board of Health irrelevantly discussed the fitness of the water, at two meetings, producing other analyses made by Prof. Dabney, of the State University, some of which were very similar to the analyses made by Prof. Nichols, and others, made in September and October, 1881, showed a quantity of chlorine, or salt, that would seriously impair the fitness of the water for drinking purposes.

The Board decided that the potableness of the water could not be fairly tested by chemical analysis without frequent tests, taken at every period of the year or series of years.

The Board of Health did not answer our questions, nor have they given any reasons for the following decision, which was made in secret, after your committee were politely invited to retire:

"Resolved, That in the opinion of this Board, the water from the North East branch of the Cape Fear river, as at present tendered to the city by the Clarendon Water Works Co., is not suited and fit for domestic use according to the evidence presented."

mains, and not more than five hundred feet apart."

We inquired of the Chief of the Fire Department, and also of the Committee on Fire Department and the permanent Committee on Water Works for information on these points, and they inform us that the location of the hydrants is satisfactory to them and the number of them in accordance with the contract.

Sections 2 and 4 relate to the extension of the mains and the placing of additional hydrants, and therefore is a question of the future, and not belonging to us to discuss now.

Sec. 5 relates to the rate to be charged private consumers, and does not concern us as long as the Company keep within the rates named in the contract.

Sec. 6 relates to the replacing the streets in as good condition as before the laying of the pipes and mains.

We addressed a communication to the Chief of Police on this subject, and he replied that the Company had restored all the streets, &c., and left them in as good condition as they were in before.

Sec. 7 relates to the furnishing of an adequate supply of water for fire and domestic purposes, and provides the penalty for a failure, &c.

Sec. 8. That they will guarantee at all times a sufficient force or pressure to throw from any five of said fire hydrants at one and the same time, through one inch nozzles, five streams of water to an average height of one hundred feet.

There was an unofficial test of the capacity of the Water Works made last summer, and a copy of the inspectors' report is appended hereto. The height of these streams is measured from the water level. Your committee would regard the contract to mean one hundred feet from the hydrant.

The Company states, and we see no reason to doubt, that they can comply with this, if it were desirable, to at all times carry such a high pressure as their pipes and machinery are all tested to carry three hundred pounds pressure to the square inch, and to throw a stream one hundred feet high requires only about one hundred pounds pressure.

If this high pressure is carried ordinary plumbing in houses is not sufficient, and it would be dangerous to have such force in a dwelling; for, should a pipe burst, the house would be ruined before the water could be shut off. The Company propose to carry seventy-five to eighty pounds pressure and this will throw a stream or streams over any house in Wilmington within reach of the hydrants. If this is ample, as is certified to the Chief of the Fire Department, your committee think that prudence and safety should be consulted rather than to have the Company carry a strain necessary to throw a stream higher than is ever needed.

Sec. 9 relates to any damage that may result from the leakage or bursting of a stand-pipe. This section was inserted because at the time it was proposed to erect the stand-pipe at the intersection of Fifth and Market streets.

Sec. 10 relates to the right of the city to purchase the Water Works at the expiration of every ten years, and the manner of arriving at the value of the same.

Sec. 11 provides that the failure to furnish an adequate supply of water shall not work a forfeiture if caused by riot, act of God or the public enemy.

Sec. 1 on the part of the city gives and grants to the said Company the exclusive right and privilege to erect water works, &c.

Sec. 2 fixes the price to be paid by the city for the 75 hydrants, viz: four hundred and thirty-seven and 50-100 dollars upon the first day of each and every year.

Sec. 3 binds the city to pass and enforce such ordinances as may be necessary to enable the said contractors to construct, control and protect their works, and in lieu of any city taxes on their part the Water Works Company agree to furnish the free use of water, at and about the City Hall, all fire engine houses and hose houses, for flushing fire hydrants and the gutters on Front and Water streets twice a week.

Your committee would state that the Company have not furnished the water at the City Hall, Brooklyn Engine House, Brooklyn Bucket Co. and C. M. Stedman Bucket Co., but we would present a letter from the President of the Water Works Co. promising to have all the above places supplied with water as soon as the pipes can be laid.

Your committee also deem it of the utmost importance that the stand-pipe should be completed as soon as possible, for two reasons. First, that the water can then be pumped for domestic use on the last of the ebb tide and can be allowed to settle before using. Second, in case of the negligence of the engineer in the night the water in the stand-pipe would furnish sufficient pressure to last until the pumps could be brought to bear on the mains.

We would also recommend the use of an alarm gauge at the works to sound an alarm whenever the pressure falls below a given point.

We would also recommend that some additional support be furnished the main over the C. C. R. R., as in case of accident to the railroad bridge, we would be temporarily deprived of water.

Your committee have endeavored to act with the utmost fairness to all parties concerned, claiming all just rights for the city, and trying to deal equitably with the contractors.

ised to arrange all the matters to which we objected.

W. H. CHADBOURN,  
L. H. BOWDEN,  
A. ALDERMAN.

Alderman Telfair moved that the report be received, which motion was adopted.

Alderman Chadbourn offered the following resolution:

WHEREAS, the fitness of the water for domestic use is a question for private consumers to decide for themselves; therefore, be it

Resolved, That the tender of the Water Works be accepted as an entire fulfillment of the contract with the Water Works Company in every respect, and that the first payment under said contract shall be made on the first day of March, 1882, for service during the month of February, 1882.

The yeas and nays being called, Alderman Chadbourn's resolution was adopted by the following vote:

Yeas—Aldermen, Worth, Chadbourn, Northrop, Alderman, Bowden, Telfair, Sampson and Willis—8

Nays—Alderman Huggins—1.

Mayor Smith offered the following:

WHEREAS, It appears by the report of the committee on Water Works that the said works are not completed according to contract; and the Board of Health having pronounced the water to be supplied not fit for domestic purposes, I protest against the acceptance of the works as presented.

People who cannot spend the season of winds and cold rains in sunny Florida should keep Dr. Bull's Cough Syrup in the house. It is the best remedy for Coughs and will relieve sufferers at once

**Unmailable.**  
Unmailable matter, addressed as follows, remains in the Postoffice in this city:

Miss Alice M. Roberson, Monroe, N. C.; Mr. Nicholas Moore, Young's Hotel, Boston, Mass.; William Smith, Georgetown, S. C.; Joseph Piner, Sumner, N. C.

**Personal**

Rev. A. D. Mayo, D. D., of Boston, Mass., who is now travelling in the South in the cause of education, gave us the pleasure of a visit this morning: He comes to our people bearing the highest testimonials of character, fitness and love for the noble work to which he is devoting his life. He is a fluent, forceful and graceful speaker and his addresses are interesting and instructive. He comes endorsed by the educational organizations of Virginia, Maryland, Pennsylvania, Connecticut, Rhode Island, Massachusetts, and also by many prominent individuals, who are interested in the cause of education. His is a worthy mission, and we trust that our people will extend to him that cordial co-operation and assistance which his work demands.

**A Narrow Escape.**

This morning, about 10 o'clock, Mr. James W. Stroud, whose place of business is with Mr. W. P. Oldham, on North Water, between Princess and Chestnut streets, had occasion to go into the loft of his building to get four bales of hay that had been ordered, taking a man named Stevens with him. He directed Stevens to move the bales of hay to the hatchway, when he (Mr. Stroud) would lower them by the aid of the fall which he has for that purpose. Mr. Stroud came down, and as he reached the lower floor of the warehouse, his little son, aged about two years, who had been brought down by his nurse, entered the door, and seeing his father, ran with childish eagerness to meet him. Just as he was passing under the hatchway, a bale of hay was pitched down by Stevens in violation of his instructions, and struck the floor within a few inches of the little fellow, and rebounding, knocked him down and fell upon him. Mr. Stroud immediately, with parental anxiety, pulled his son from under the hay, and, although the latter was very much frightened, he was not seriously hurt. The distance of the fall was about twelve feet, the bale weighed 250 pounds, and if it had fallen directly upon the little fellow, it would have undoubtedly proved instantaneously fatal. As it was, it may be considered as a remarkable and almost miraculous escape. We rejoice with Mr. Stroud that it was no worse.

It takes 800 full blown roses to make a single tablespoonful of the famous perfume, and you can get enough perfume out of an onion to drive a dog on the gallop out of a slaughter house. And yet we admire the rose more than we do the onion.

**PLEASE NOTICE.**  
We will be glad to receive communications from our friends on any and all subjects of general interest but  
The name of the writer must always be furnished to the Editor.  
Communications must be written on only one side of the paper.  
Personalities must be avoided  
And it is especially and particularly understood that the Editor does not always endorse the views of correspondents unless stated in the editorial columns.

## City Court.

W. J. Blaine, colored, was brought before the Mayor this morning charged with an assault and battery upon his wife, Annie, and was found guilty, but was discharged upon the payment of costs.

Frank Baker and Jordan Baker, both colored, were arrested last night on suspicion of stealing cotton, and lodged in the guardhouse, but they were discharged this morning as there was no evidence upon which to hold them.

## In Port and Bound Here.

There are 14 barques and 3 brigs now on the way to this port from foreign ports. Of the barques 4 are German, 1 Russian, 6 Norwegian, 2 British and 1 Danish, and of the brigs 1 is Russian, 1 British and 1 German.

There are 7 barques, 7 brigs and 20 schooners now in this port. Of the barques 4 are Norwegians, 1 German, 1 Swedish and 1 British, and of the brigs 3 are American, 2 British 1 Norwegian and 1 German. The schooners are all American.

## Fresh, the American.

The *Charleston News and Courier* of the 27th inst., in speaking of Mr. John T. Raymond, who is to appear at the Opera House in this city on Monday evening next, in the title role of the above named play, says:

The quality of Mr. Raymond's humor is well known to Charleston play-goers. It is quiet and unforced, with a simplicity which is the perfection of the art, and is full of delicate touches and subtle hints. He has evidently made a careful study of this new part, and he plays it with his accustomed fidelity, and with that restraint which is one of the best features of his dramatic method.

Lydia E. Pinkham's Vegetable Compound, the great medicine for the cure of all female complaints, is the greatest strengthener of the back, stomach, nerves, kidneys, urinary and genital organs of man and woman ever known. Send for circulars to Lydia E. Pinkham, Lynn, Mass.
