WILMINGTON, N. C.

SATURDAY, MARCH 11, 1882. Entered at the Postoflice at Wilmington, N C., as Second-Class Matter.

The Massachusetts Senate has a bil before it, changing the age at which children who cannot read or write may be employed in factories from fourteen to seventeen years.

fold in the California wheat crop from 1855 to 1880. The State has in actual cultivation 38.000,000 acres of wheat land and the amount is being yearly increased at the rate of ubout half a mil. lion acres.

An act is about to be introduced inte the French chamber which may have the effect of keeping alive a great many children who would otherwise die. It gives the municipal authorities the power, which they have never yet had, to deal stringently with parents who neglect their offspring morally and physically

Breaking up very fast must be the Republican ship, when the New York Times says: "Ambitious demagogues are on the alert and seeking new meth ods of winning popularity. Some of them are impatient of the sluggish movement of the political elements. and are endeavoring to stir up a storm in order that they may ride upon the waves that are expected to bear down opposition."

The British house of commons has nominally 652 members, but, as in thir teen cases the issue of writs has been any other liar, to the effect that I was, in any sense, untrue to you or unfaithful to our friendship, has no particle of truth in it."

Mr. Blaine is prone to get himself and his friends in hot water, and in this instance it will take much time and many explanations, added to an abundance of crimination and recrimination, before the water will become cool and tranquil again. It was not necessary ; it was uncalled for and, its legitimate effect. which he ought to have foreseen and avoided, has been to awaken bitter feel* ings among the living in regard to the dead, and to create animosities against himself which can never be healed. Mr. we do not believe him to be a man of

The Chicago Press club refuses to admit women to membership. We are much respect for women.

It must have been a great relief to Skin Cure, is exceedingly valuable and kick him after he was down.

It used to be called "moderate drinking," but now that science has invaded the subject, it is regarded as "taking it in true physiological quantity."

"What a change," exclaims the novelist Roe, "one little woman can make in a man's life !" Exactly; ; and what a heap of "change" she requires while doing it.

Henry A. Wise, of Virginia, is said to have been the author of the phrase, "The office seeks the man, not the man the office." Add his name to the list of American authors of fiction. A Chicago man was shot at the other night as he sat toasting his shins around the family stove. As the ball missed the probability is that he hired some one to do the shooting in order to show his wife how dangerous it is for him to be at home.

suspended, there are only 639 representatives at present entitled to sit. Of these, 329 may be described as minis. terialists, 246 as conservatives and 60 as home rulers. This gives the ministry a majority of only twenty-three over nominal home rulers and conservatives combined.

THE OVERFLOW.

It is really appalling to read the accounts of the overflow of the Mississippi river and its tributaries. There is no abatement of the floods, but rather an increase, and destruction and devastation are spreading far and wide. Millions of property have been swept away. Starva tion stares thousands in the face- and great want and despair hover grim and ghastly at the verge of the relentless waters. Never, in the history of the river, has the inundation been so extensive, nor the ruin so wide spread and complete.

One report speaks of 250 families who are living upon rafts, and that their condition is most deplorable. The freshet has reached down into the sugar growing belt and is sweeping everything before it. Should the river rise no higher or should there be no more breaks in the levecs, it will be weeks before the subsidence of the waters will permit the re occupying of the lands in many localities. It is a tale of suffering and woe such as we have never before been called upon to record, and such as we hope never to be called upon again to chroni-

THE GARFIELD EULOGY.

As we predicted at the time the eulogy pronounced by Mr. Blaine upon the late President Garfield has become the subject of very saarp and severe criticisms. His statement that General Garfield, when he became chief of the staff to General Rosecrans, found that command in disorder and confusion, with much disaffection existing among promineut officers of the command, was most unhappily made and had much better have been suppressed. As a matter of course, General Rosecrans, who is now ber of Congress from Californ

A bill to provide whipping posts for wife beaters has been introduced into the New Jersey legislature. New Jersey awmakers don't want a married man to have any fun at all. Next thing we know they'll pass a law requiring married men to be at home every night not later than nine o'clock.

A Florida rattlesnake was recently killed by throwing a glass of whiskey in its face. There is a moral connected with this touching incident, but we can't exactly point it out .- New Haven Reg ister.| You know you are thinking "what a shameful waste of whiskey," but are afraid to say so.

Thousands of ladies to-day cherish grateful remembrances of the help derived from the use of Lydia E. Pinkham's Vegetable Compound. It positively cures all female complaints. Send to Mrs. Lydia. E. Pinkham, 233 Western Avenue, Lynn, Mass., for pamphlets.

"Is there a spring around here?" "Used to be lots of 'em, but the Yanks toted 'em off."

Below us was the muddy James, and the drought had lasted so long that there was bardly enough water to foat a cattish. Pointing to the historic stream, I asked:

"Why didn't the Yankees steal the river, too?"
