The Planets in May.

The month of May is a grand gala tion of six planets with each other; the Capt. Boyton's suit and showing how seen for the first time in North Carolitotal eclipse of the sun, and the occultation of Jupiter form a brilliant succession of phenomena as imposing to Wilkinson slapped his new acquain: keen enjoyment of those who were forthe physical eye. The sun is now passing through the maximum of sun spots.

The Turnpike. There is one thing of which Wilming-What has become of the electric fire ton can boast, with reason, and that is the beautiful shell road to the Sound. It is now in excellent order, and a fast horse can easily cover the distance to Wrightsville in an hour. When the young trees which have been set out all along the line of the road grow large enough to shade the road, it will be about the most delightful drive in the United States. At present it far surpasses the famous shell roads of New Orleans and Mobile, as seen by us in 1869.
