The News and Observer speaks of Mr. Charles R. Jones, of Charlotte, as "the Assistant Republicar candidate for Congress in the Charlotte district." That is a good one. And, by the way, Bro. London, of the Chatham Record, spoke of him as "White-oak Charley" and we are curious to know the wherefore of that.

New York Herald: The Republican that elaborate calculations have been required to determine the actual increase prescribed under the promise of a reduction at all. The bill throughout trifles in the most monstrous way with the public interests, and is a delusion and a snare to the taxpayers and to the

NORTH CAROLINA.

We like to hear other people say pleasant things of us, and we like, too, to say pleasant things of ourselves, sometimes. As a result of the latter liking, we make room to-day for an article which we clip from yesterday's News and Observer, which, so far from being vain-glorious, does not tell the would take several whole newspapers an honorable man, but with a rascally to do that:

North Carolina is a great State. We doubt if our people themselves fully appreciate her tremendous physical power, and we are sure they have no real conception of the magnitude of her productions. She raises her head well up among her sisters. Our people are sober, industrous, law-abiding, intelligent, progressive, thrifty. These things account for our prosperity. The two races dwell together in peace and good will. The most pleasant relations exist between them. Our crimes are those of "manhood," a too quick courage, a too high spirit, a too lofty bearing, a disposition to right our "wrongs where they are given, e'en though in the courts of heaven." There is but little meanness among our people, and that is chiefly confined to the most ignorant of the blacks. Taken all in all the people of the State are rarely equalled, never surpassed in those qualities that able women. Our schools are prospering as never before. Teaching has come to be a profession with thousands. and our normal schools and teachers' institute are evidences of great progress. The subdivision of farms is an element of thrift, and our advance in that direc-tion arrests attention. We have 34,000 farms running between twenty and fifty acres; 34,000 containing between fifty and one hundred acres, and 61,000 containing between 100 and 500 acres. raise 1,450,000 hogs.

In 1880 we made 28,000,000 of bushels of corn and fodder accordingly. We raised 400,000 bales of cotton, and of to-bacco, according to Col Cameron, about

Hewitt which never was spoken. The invented and injected paragraph is given in our special despatches from 1.181 asked; corn, Southern quiet and Washington bacco, according to Col Cameron, about 50,000,000 of pounds. Our peanut, oat, wheat, and rice crops were worth us millions of dellars; while our garden and truck products and fruit yielded a large revenue. North Carolina dried fruit is quoted higher than any other in fruit is quoted higher than any other in the market. Our forest products are varied. Tar, pitch, turpentine, and staves furnish occupation to ten thousand hands, while there are five hundred saw mills in the State, some of which are of the most improved patterns, and our lumber product is immense. In adout the state of the most improved patterns, and our lumber product is immense. ests are like our climate. One can pay his money and take his choice. We fur-

nish it to order.

Within the past few years everything with us has been on a boom. Our population is increasing by natural produc-tiveness at the rate of thirty-three per cent. in a decade. Onr agriculture is improving rapidly; new implements are being constantly introduced; railroads are being built; steamboat lines established; mail routes opened; school houses and academies dot the townships.

Our towns also show much progress They are all extending their limits, increasing their trade, doubling in population. Factories are springing up at a rate hitherto unknown. Some of our new cotton and tobacco factories are unsurpassed in their appointments, and their dividends show how trade is boom-

ROBESON, OF NEW JERSEY.

It is not at all to the credit of the Republican side of the House of Representatives that it is owned and controlled by such a man as George M. Robeson, of New Jersey, a man whose hands have been smirched with more than one of Arabi Pasha one of the shells burst kind of corruption and jobbery. The New York Sun has been persistent in exposing him and has never spared the lash where he is concerned. It now makes the serious charge, printed in italics in that paper, that "there cannot be any doubt that Secor Robeson is a business partner with John Roach. He gets his divvy in the shape of a big share in the profits. No profits, no divvy."

Our readers will remember the brief telegraphic report of a spat between Mr. Hewitt, of New York, and Mr. Robeson, of New Jersey, which occurred in the House three days since. It arose from Mr. Hewitt's rising to a bill "to reduce taxation" actually in- question of privilege relative to a report creases the duty on cotton ties and on in the Record of a recent speech made all articles of which hoop, band or by Mr. Robeson on the floor of the scroll iron are an important part, nearly House, wherein there occurred passages one hundred per cent. So far from of a personal nature to Mr. Hewitt, reducing the burdens of the people or which were not uttered by Mr. Robeincreasing the revenue it largely in- son on the floor, the said report having creases the burden of the people and de- passed from Robeson's hands to those creases the revenue. Moreover, the word- of the printer. Mr. Robeson could not Council that France and England had to work in the country, wrote to his girl, ing of the provisions in the bill is such deny, and did not deny, that the report agreed upon the necessity of occupation a June graduate, that he was raising a was a fraud, and yet the honest majority in Congress sustained this fraud, and Speaker Keifer, Secor Robeson's cided thereon. reduction in taxes, just as the changes in man Friday, refused to have the fraud the tobacco licenses held out a promise expunged and thus gave his official enof reduction which in most cases is no dorsement to that fraud. The Sun, refering to these facts, does not hesitate

to express itself very clearly. It says: From the report of yesterday's proceeding in Congress it appears that Mr. Abram S. Hewitt has discovered that Secor Robeson will cheat when he gets a chance. We called attention the oth-er day to the fact that Secor Robeson's speech in closing the debate on the Naval Appropriation bill was not printed in the Record when delivered, but was withheld for nearly a week to be doctored. Much that Robeson did say en the floor of the House was omitted; with sale some things that he dared not say on the floor of the House were interjected. One traudulent passage in particular has opened Mr. Hewitt's eyes to the CRUD fact that in this discussion over the tenth of all that might be told. It Navy bill he has been dealing, not with

body in the United States of America cial quotations: except Mr. Hewitt himself. It would not surprise him if he had not gone to work in the wrong way, and persisted in approaching Robeson and Robeson's deeds in the spirit of a prison chaplain, rather than in that of an investigator of

Mr. Hewitt's treatment of Secor Robeson up to yesterday does credit to his Cotton..... Christian charity and native politeness. Spirits Turpentine..... He has probably learned now that Rosin..... Christian charity is not to be wasted on Tar..... ascoundrel, and that the courtesy of an | Crude Turpentine...... old-fashioned gentleman may be thrown away on a ruffian.

And the Sun is not alone in the expression of a just wrath at such unblushing official roguery. The World has a column of scathing censure which presents facts which we shall endeavor make good citizens, fine men and love- to use at another time, and the Herald

the Congressional Record a few days ago by striking out of it something he had said in debate which he found it ex-

mission or sanction. Yesterday the attention of the House only 93,565; in 1880, it was 157,609. We use 215,000 horses and mules and 50,000 oxen; we have 232,000 milk cows, and 375,000 other cattle. Four hundred and sixty-one thousand sheep produce near a million pounds of wool, and we near a million pounds of wool, and we near a million pounds of wool, and we need to be supported by Mr. Abram S. Hewitt to another variety of falsification committed upon the Congressional Record. The offender in this instance is the notorious Mr. George M. Robeson, who has inserted into the printed page of his recent speech on the Naval Appropriate Western setting and quiet.

Those Horrid Pimples! No I Cannot Go. Please Present My Excuses."

Probably two-thirds of the ladies in society and homes of our land are affiict ed with skin diseases of various kinds, to do away with which, if it could be done without injury, would be the happiest event of their lives. Then she would have instead of a disfigured and married counterpage are that would be marred countenance, one that would be handsome, or at least good-looking, for any one with a clear, pure skin, no matter what the cut of her features are, has a certain amount of good looks which attracts everybody. As it is now, she imagines every one sees and talks about "those freekles," "those horrid pimples," and other blemishes with which she is afflicted, and this is true

of either sex. To improve this appearance great risks are taken: arsenic, mercury, or high-sound titled named articles containing these death-dealing drugs, are taken in hopes of getting rid of all these troubles.
