THE DAILY REVIEW.

VOL. VI. WILMINGTON, N. C., SATURDAY, SEPTEMBER 23 1882. NO. 227

Celestial Fireworks.

A meteor of unusual appearance passed over the city on Thursday night about 9 o'clock. It arose in the East and passed over to the West, South of the zenith. Its progress was very slow, and as it passed it emitted two explosions, in each instance throwing off a ball of fire which broke into myriad fragments of blue light, and yet not checking its course but continuing on to the East where it finally exploded not far from the horizon. It was in appearance very much like a sky-rocket with Roman candle attachments.

Scarcity of Ice.

There has been a scarcity of ice in the city during the past few days, which, however, it is but just to state, is not properly the fault of the dealers. Mr. Ahrens has a cargo nearly a week over and Messrs W. E. Davis & Son have one now due. Both of these are daily, almost hourly, expected. There is no restriction on the supply demanded by consumers, however, as car loads are daily received from other points, but there has been an increase in the price of 4 cent per pound, in consequence of the increased cost of the supplies. The two cargoes expected will probably be here to-day or to-morrow, when the supply will be plentiful at the old prices.

The Late Storm.

From the published accounts of the recent storm in Florida we are sorry to learn that Mr. T. A. Darby, formerly of this city, but now engaged extensively in the milling business at Cedar Keys, was damaged to the extent of \$10,000 by the loss of timber, damages to property, &c. This was certainly a heavy blow to any young man, but Mr. Darby's friends are consoled by the reflection that the loss is merely a loss and does not by any means impair Mr. Darby's financial standing.

Fast Time.

The local passenger train No. 47, on the Wilmington & Weldon Railroad, left this city Wednesday morning one hour and twenty-three minutes behind time and made up the time between here and Halifax. The run was made between Wilmington and Weldon in 4 hours and 50 minutes, though the actual running time was but 3 hours and 45 minutes. Eighteen stops were made and 1 hour and 5 minutes of the 4 hours and 50 minutes was consumed. Mr. Stephen Meredith was the engineer who drove the iron horse, and Capt. Borden was the conductor. We understand Capt. B. declares that in all of his railroad experience he never saw a prettier run. The time made above is the fastest ever made by a local passenger train under similar circumstances over this road.

Cattle Thieves.

Thursday three fine cows were driven to Mr. T. P. Sykes' butcher pen, in the northern part of the city, by four colored men who left them there and went off to hunt Mr. Sykes up. He was going to the pen by one street while they were coming down town by another and missed him. Mr. Sykes saw the cattle and when the men found him, about 1 o'clock, they offered to sell the cows for \$35, which was very cheap, and voluntarily offered to take \$30 for the three when they thought he hesitated. He then offered them \$25 which they readily agreed to accept. Mr. Sykes at once concluded that the cattle had been stolen and slipped out to notify an officer but did not see one in time to avoid suspicion. He then made an appointment with the men to meet him at his store on the corner of Fourth and Red Cross streets at 8 o'clock, Thursday night, and made arrangements with three constables to come in on them at that time. The cattle dealers came promptly on time for the money but by reason of some misunderstanding the officers did not keep their appointment. Mr. Sykes then put the men off until yesterday morning, but they commenced to "smell a nice," and went out to the pen Thursday night and tried to get the cattle, but the watchman refused to let them out. About 10 o'clock, of the same night, Peter Pickett was arrested, and yesterday morning Jim Anderson was overhauled. Miles Cooper, who is wanted for larceny in another case, was one of the four, but he and another man, whose name is not known, have so far eluded capture. No one about here knows of any cattle having been missing lately, but the cows were evidently stolen. Mr. Sykes was told that they had been weighed, but the certificate of weight had been lost. Upon inquiry at the cattle yard it was ascertained that such was not the case. The men who have been arrested are known to be penitentiary birds.

A Fine Haul.

Messrs. W. E. Davis & Son made a fine haul yesterday at their fisheries, at Federal Point. They caught about 150 large drum, which would average probably three feet in length, besides an almost equal number of other large fish. Among the latter was a tarpin, the strange fish in our waters, one of which, it will be remembered, was caught by Messrs. Davis & Son some months ago, and forwarded to Prof. Baird, at Washington City, for classification, and by him pronounced a tarpin. The specimen of this fish caught yesterday was five feet in length. It has several peculiarities, one of which is the large and beautiful scales, with which it is covered; one of these, secured by us, measured 2 1/2 x 3 inches. The tarpin is a rare fish in these waters and the two caught by Messrs. Davis & Son are all that we remember to have ever heard of as having been caught on the North Carolina coast.

The Harvest Moon.

The September moon falls on the 26th at 11:56 p. m. It is the beautiful harvest moon and possesses special claims to the distinction. For, owing to the position of the ecliptic in regard to the equator at this season, the moon rises for several consecutive nights with only a comparatively small interval between the consecutive risings. The short autumnal days seem thus to be prolonged by the floods of silvery moonlight that make the night beautiful as day. The phenomenon is as easily explained as the axial rotation of the earth. But in the older times, when man was nearer to nature, the harvest moon was considered a direct interposition of Providence to assist the husbandman in gathering in the harvest. The waning moon was in conjunction with Neptune on the 2nd, with Saturn on the 3d, with Jupiter on the 5th, and with Uranus on the 12th. The new moon of the 12th was in conjunction with Mercury and Mars on the 15th, and with Venus on the 16th, passing a degree and a half north of her.

Our muse, poor fellow, has gone to roam. His last attempt was DYER'S "Spring Pome."

Third Ward Club.

A meeting of the Democratic voters of the Third Ward was held in the City Court Room last evening, for the purpose of re-organizing the Third Ward Democratic Club. The meeting was called to order by Mr. W. J. Yopp, the President of the Club, and Mr. John L. Dudley was requested to act as Secretary. On motion, a committee consisting of Messrs J. W. Perdue, G. W. Thames, T. Donlan, W. M. Poisson and F. G. Robinson was appointed to recommend officers for the Club, and during their absence Col. E. D. Hall was called upon and entertained the Club with a short speech. The Committee on Organization returned and reported as follows, Mr. W. J. Yopp, the former President, having declined a re-nomination: For President—Col. Jno. D. Taylor. For 1st Vice-President—T. Donlan. For 2d Vice-President—Samuel Bear, Jr. For Secretary—E. G. Parmelee. For Treasurer—G. F. Alderman. These gentlemen were declared unanimously elected. The newly elected President not being present Mr. T. D. Meares and Capt. F. G. Robinson were appointed a committee to escort the 1st Vice President to the Chair. The thanks of the Club were tendered the retiring officers. On motion of Mr. W. J. Yopp it was resolved that the Club meet on Friday evening next and that a committee of three be appointed to secure speakers for the occasion. Messrs W. J. Yopp, T. D. Meares and F. G. Robinson were appointed on this committee. On motion the meeting then adjourned.
