A theory is worth investigating which declares that plants in pots may be restored to health by means of hot water. Ill health, it is claimed, ensues from acid substances in the soil, which, being absorbed by the roots, act as poison. The water, which should be 145 Fahrenheit, washes out the hurtful element.

Criminal Court.
The April term of this tribunal convened at the Court House at 10 o'clock this morning. His Honor Judge O. P. Meares, presiding, and Solicitor B. R. Moore, appearing in behalf of the State. The hours of the morning were employed in drawing jurors and other routine work preparatory to the duties of the term. The following is the list of Grand Jurors for the term: F. H. Celestial Observations.
As the moon has now left the evening sky, the comet discovered by Brooks on February 23d has again been observed. It is fading visibly, but is much higher up in the sky, being now near the Pleiades, and moving so rapidly that in watching at intervals through the telescope one can see it changing its position among the surrounding stars. The great comet of last year is also still seen, but it is too faint for any but a practiced eye to observe. There is also now to be seen in the western sky on any clear, dark evening what is known as the zodiacal light, a lenticular-shaped column of light, rising up from near the sunset point and extending about forty-five degrees toward the south. Many theories are given to account for it, but none are really satisfactory. Future discoveries and labor are yet needed to put our knowledge of this wonderful appendage on a sound basis. The total solar eclipse of May 6th may give us some new light on this subject, and astronomers are hopefully waiting its results.

County Commissioner's Meeting.

The receipts of the crop year to date foot up 123,794 bales, as against 131,660 bales to same date last year, a decrease this year of 8,875 bales.

Vessel Blown Over.
During the gale on Saturday night the German barque *Atlantic* was blown over and she now lies on her beams end in about 14 feet of water. She was lying alongside of a wharf at the Empire Floating Dock undergoing repairs and had chains run out to floating stiffenings which gave way and the vessel was blown over on her side. Her ports being open for repairs she filled with water and sank. It is not known as yet what damage the vessel has sustained. Efforts will be made to raise her immediately.

Personal.
Rev. A. J. Barrow, of Baltimore, preached in St. John's Church yesterday morning to a large congregation. His sermon was an excellent one and was heard with much pleasure. Mr. Barrow has been invited to assume charge of the parish and will remain here among us for two weeks before making up his mind in the premises. He is at present the guest of Dr. W. H. Green. We hope that his short stay in our city—if it is not to be prolonged—may be a pleasant one to him.

Newton *Enterprise*: One would have supposed that such cold would have destroyed all prospect for peaches this year. But as well as we can learn from others and from our own examination we find that while a larger proportion was killed, some trees escaped with a right respectable number of sound peaches.
